quantity of honey produced.

The Albany Country Gentleman of the 23d ins a letter from S. B. Parsons, dated Paris, January 19th, to W. D. Bishop Commissioner of Patents, which gives an in structive account of the result of his mission as an agent, acting under the instructions of the Patent Office, to obtain hives of Italian bees for that institution. He has purchased a number of hives for the Government, which were shipped from Genoa on the 28th of December last, and has also purchased one hundred additional hives for himself, which will be shipped during the present month.

According to the lowest estimate of Lang.

stroth; one hundred hives of bees should yield their owner, annually, five hundred dollars clear profit. The advantages of the Italian bees over our common species are stated by Mr. Parsons to be as follows: "First, that they will endure the cold better; second, that they swarm twice as often; third, their queens are abundantly more prolific; fourth, that the working bees begin to forage earlier, and are more industrious; fifth, that they are less apt to sting, and may be easily tamed by kind treatment; sixth, that the queen may be so educated as to lay her eggs in any hive in which she is placed, while the bees of such a hive, deprived of their own queen, will readily receive her; seventh, that its proboscis longer, and it can reach the depths of flowers which are entirely beyond the efforts of the common bee. The importance of this last superiority cannot be too highly appreciated. Eighth, that a young queen once impregnated, will continue fertile during her life-from

of importing a full hive from Europe is from twenty to twenty-five dollars, but as one queen impregnated will produce thirty thousand workers, and at least fifty queens in one scason, the country can soon be fully stocked with them. Mr. Parsons claims that the Italian bees can be handled and divided up with great safety, and that, if properly managed, from each hive fifty new ones can be obtained the first year, and consequently twenty-five hundred the second year. These calculations appear somewhat extravagant, but we are satisfied, from the information we have received from perfectly disinterested and well-informed sources, that the Italian bees are well worthy of the attention of our farmers, and all who possess proper facilities for bee culture.

A PROTEST AGAINST EARLY RISING .- Dr. Hall, in the February number of his celebra-ted journal, says that one of the very worst-economies of time is that filched from necessary sleep. The wholesale, but blind com-mendation of early rising is as mischievous in practice as it was errant in theory. Early rising is a crime against the noblest part of our physical nature, unless preceded by an early retiring. Multitudes of business men in large cities count it a saving of time, if they can make a journey of a hundred or two miles at night, by steamboat or railway. It is a ruinous mistake. It never fails to be followed by a want of general well-feeling for several days after, if, indeed, the man does not return home actually sick, or so near to it as to be unfit for full attention to his business for a week afterwards. When a man leaves home on business, it is always important that he should have his wits about him; that the mind should be fresh and vigorous, the spirits lively, buoyant and choerful. No man can say that it is thus with him after a night on a railroad or on the shelf of a steamboat. The first great receipt for sound, connected and refreshing sleep is physical exercise. Toil is the price of sleep. We caution parents, particularly, not to allow their children to be waked up of morning; let nature wake them up, she will not do it prematurely; but have a care that they go to bed at an early hour; let it be earlier and earlier, until it is found that they wake up themselves in full time to dress for breakfast. Being waked up early, and allowed to engage in difficult or any studies late and just before retiring, has given many a beautiful and promising child brain fever, or determined ordinary ailments to the production of water on the brain.

A RICH EDITOR .- The editor of the Prairie News, published at Okaloas, Mississippi, feels rich and thus lets himself out on somebody who called him poor:

A few days since some one had the hardi-

hood to call us "poor editor." We poor?— No sirree sorrel tail; not by a jug full, we sin't. Why, we have a good library; made up for the most part of patent office reports, and Kansas reports, a double barreled pistol; but it wont stand reared back; six suits of clothes, fourteen shirts, a cat, a bull pup, a game rooster, a gold watch, seventy-five cents, in clean cash, and no poor kin, and are going to have a pretty wife and — as soon as possible—own a lot! Talk about us being poor.

ENDURE HARDSHIP .-- As the gladiator trained the body, so must we train the mind to self-sacrifice, "to endure all things," to meet and overcome difficulty and danger. We must take the rough and thorney roads, as well as the smooth and pleasant; and a portion at least of our daily duty must be hard and disagreeable; for the mind cannot be kept strong and healthy in perpetual sun-shine only, and the most dangerons of all states is that of constantly recurring pleasure, case and prosperity. Most persons will find difficulties and hardships enough without seeking them; let them not repine, but take them as a part of that educational discipline necessary to fit the mind to arrive at its high-

Young man! thy mother is the best earthly friend. The world may forget thee—thy mother never; the world may wilfully do thee many wrongs—thy mother never; the world may persecute thee while living, and when dead, plant the ivy and the night shade of the dead, when the greenless grows. But the of slander upon thy grassless grave; But thy mother will love and cherish thee while living, and if she survive thee, will weep for thee when dead such tears as none but a mother knows how to weep. Love thy mother!

spring, when the cows are most turned out to grass. A few experiments in May and June showed that going without salt five days shrunk the milk from one to two per cent. in

What kind of an end does a shoemaker come to? A wax end.
