·SINGULAR: TRANSFORMATION: The followng occurrence, reported by the York . Republican to have taken place in Stewartstown, in that county, on the 20th of May, belongs to the records of the wonderful." The story, the truth of which is vouched for by a responsible person, is as follows:

An Albino, or white negro, living with Mr. Abel Kirkwood, fell, from the effect of amopileptic lit, from the stoop of the house, where he was sitting on a chair, down to the distance of some ten feet. There he lay, struggling in his spasms for the space of half an hour, when he turned as black as the ace of spates. By Tuesday, the 22d, he was able to walk about town, and complained of nothing save a few bruises, occasioned by the fall, and the ebony hue which still shaded his once fair face Poor fellow, he was quite loth to part with the resemblance lie once bore to a white man, in exchange for his present shadowy phiz as a black. What is more remarkable, is that while his face is as black as Egyptian dark-ness, his hair is perfectly white, forming a most beautiful and striking contrast. The name of the man who has undergone this remarkable transformation is Nicholas Billingsly, and he is about twenty years of age.

This remedy, however, is but little better than the disease, and has a like result. Some of the intelligent physicans of New England think that is worse than the disease, because leath is certain, whereas nature would probably be able to overcome the disease in some cases and the animals live. The Boston Transcript says :- There is some talk among them of petitioning the Governor to call an extra session of the Legislature, for the purpose of giving them the legal right of summarily disposing of all their patients in the earliest stages of varioloid, in order that they may thus prevent the spread of the small pox." This would seem as rational a plan for the Doctors as it is for the Commissioners. There is no doubt that a proper investigation of the disease, and a careful medical attention to the animals affected by it, would result in getting the mastery of it, and render it controllable by remedial agents. Instead of sending out Commissioners with axes and clubs in their sicians to investigate the sullicet, and see what medical remedies can be suggested. N putting this machine into the market for 1860, we have the best grounds for believing that it is the machine wanted by the Furmers of Pennit is the machine wanted by the Farmers of Pennsylvania, and all other agricultural States.

The advantages that we claim in this machine are these: It has no side draft, nor is there any weight on the horses neeks, as the machine is perfectly balanced. It has also no Iron Cuttor Bar. The Rake we claim, is the best ever invented; it has a revolving motion, and is composed of two separatorakes. It will lay the grain in sheaves of any size, (by altering the Rakes, which can be done in a few minutes) keep the butt ends of the sheaves perfect. Attention 1st Regiment of Cumber-land Volunteers!
