IN putting this machine into the market for 1860, we have the best grounds for believing that it is the machine wanted by the Farmers of Penn-sylvania, and all other agricultural States. The advantages that we claim in this machine are these: It has no side draft, nor is there any weight 1 on the horses meets, as the inachine is perfectly balanced. It has also an Iron Outfor Bar. The Rake we claim is the blot ever invented, it has a revolving motion, and is completed of two separate rakes. It will lay the grain in sheaves of any size, (by altering the Rakes, which sha be done in a few minutes) keep the but ends of the sheaves perfect-ly straight, more so than it don by hend or any other Raiper in use. low prices.
