N. B .- The price in Great Britain of the five Peri a seat, and observing one of the few vacant occupied in part by Col. H., she proceeded to seat herself. The colonel, with characteristic courtesy, made room for the ample display of crinoline. A few moments had elapsed, when the dark-skined Venus turned suddenly to the colonel, and inquired: "Mister, did you see ary yaller put trunk aboard this train?"

'Well, really, madam,' rejoined the Ken-

tuckian, there are so many yellow trunks that I am unable to say whether the one to which you allude was put aboard or not.' This did not suffice our heroine. In a mo-

ment or two-the colonel having declined an invitation to go out and look up her yaller trunk-she arose suddenly, and, extending the infant African in her arms in the dire tion of our friend, exclaimed:

'Mister, will you hold this 'ere baby while

I go and see after that 'ere trunk of mine?' The colonel, assuring her, with ineffable grace and dignity, that he would be only too appy to oblige her, proceeded to dandle in his arms the sooty offspring of my lady. By this time, mirth pervaded every countenance, and an ineffectual effort to suppress a general titter told of the amusement the picture aff-orded. Moments fied—the whistle sounded—

but Venus did not make her appearance. Matters seemed coming to a crisis. At last one of the venerable Broadbrims

inspired by a benevolent comprehension of the burden of the Kentuckian's politeness seemed to entail upon him, and, perhaps, unwilling to add to the slightly malicious and excusable merriment of his auti-Southern associates, crept up to the seat occupied by the subject of this anecdote, and whispered, in a tone

sudible to all : ' Friend, art thou not afraid that she will leave it with thee?'

Leave it with me, my dear sir,' rejoined Col. H:, turning around, so that he could be distinctly heard by all present, and dropping

his voice to a loud whisper: 'Why, that is just what I should like. I'ts worth a hundred dollars in Kentucky !' The few Southerners present should with laughter, and the discomfiture of the disciples of brotherly love and sly fun was highly

amusing.

LIVE CATTLE WEIGHED BY MEASURE .- The only instrument necesssary is a measure with feet and inches marked npon it. The girth is the circumference of the animal just behind the shoulder blades. The superficial fact are obtained by multiplying the girth and length. The following table contains the rule to ascer-

The following table contains the rule to accer-tain the weight of the animal: If less than one foot in girth, multiply su-perficial feet by eight. If less than three and more than one multi-ply superficial feet by eleven. If less than five and more than three multi-ply superficial feet by sixteen. If less than seven and more than five, mul-If less then nine and more then seven, multiply superficial feet by thirty-three. If less then nine and more then seven, iply superficial feet by twenty-three.

multiply superficial feet by thirty-three. If less than eleven and more than nine, multiply superficial feet by forty-two. Example: Suppose the girth of a bulleck to be six feet three inches: length five feet fort six inches: the superficial area will then fort six inches the superficial area will the superficient six inches the superficient six i
