CARLISLE FOUNDRY. ng Implement Depot.

F GARDNER & CO. now manufacture and keep constantly FOR SALE, at their extensive Steam Works on-East Main st., Carlisle, a largo assortment of Agricultural Implements, of well known and approved usefulnoss to Farmers, among which they would cull especial attention to

WILLOUGHNY'S OBLEBRATED

Patent Gum Spring Grain Drill,

Patent Gum Spring Grain Drill, which has taken over fifty first class promiums at State and County Fairs. To the furmers of Cum-berland, York and Perry counties we need not speak in detail of the merits of this drill, as scores of them are now in use on the bost farms in these counties. Its reputation is established as the most complete grain drill now manufactured in the United States. It sows Wheat, Rye, Outs, Barley and Grass, evenly and regular, without bunching the seed. The gum springs pass the drill over stumps and stones, with-out breaking pins or the drill. For even and regi-lar sowing, the Willoughby Gum Spring Drill is un-equalled by any other. We also manufacture and sell the following articles, which we can recommend to farmers as reliable implements of established character:

Morrison's Patent Corn Planter, Lash's Patent Straw and Fodder Cuttor, Bridoudolf's Patent Corn Skeller, Johnston's Cast Iron Hoys' Trongh, Harn's Patent Cider Mill.

Also, Three and Four Horse Powers and Thresh-ing Machines, Cast Iron Field Rollers, Plough Castings of various patterns, Corn Crushers, and other articles for furmors too numerous to mention. Also, Egg Coal Stoves and ten plate Wood Stoves, with an immense variety of other eastings for house keepers and others. We have also an attractive variety of patterns for

IRON RAILINGS.

and Cometery enclosures, to which we would call

STEAM ENGINES AND MILL GEARING,

To this dopartment of our business we give par-ticular attention. Our already extensive stock of patterns for paper, flour and saw mill gearing, is constantly increasing. Mill owmers and millwrights will be furnished with a printed catalogue of our

various mill patterns on application. Our machine shop comprises all the various tools for turning, planing and finishing shafting and casting, by good-and careful machinists.

STATIONARY STEAM ENGINES,

of every desirable capacity, from 10 to 25 horsa power, built in the best style and on accommodating terms. Engines built at our establishment may be seen in successful operation at many of the largest distilleries and tannueries in Carlisle, and Cumb'd, Perry and Dauphin cos., to the owners of which we confidently refor for information as to their efficien-ev. Bowene working Steam Maximus descence activity

cy. Persons wanting Steam Engines are carnestly requested to call and examine before contracting

Connooted with our establishment is a steam Sash and Door Manufactory which is now in complete order for the manufacture of every description of

BUILDING MATERIALS,

for the most costly as well as the plainest house

attention

DAVID SIPE.

tain preventive has yet been given. Wood ashes sprinkled on the vines before they bend over to the ground is said to answer the purpose. The idea is a good one and deserves the attention of planters. It is not an expen-sive material and is easily applied, and if it only answers in part, the balance is not lost as ashes make just about as good a fertilizer as can be used for potatoes. Some persons cut off the vines, others bend them down and throw soil over them—this is labor without reward and we give our hearty support to the use of ashes. Let planters try the remedy. Some months ago we published in these colunns a plan pursued by some farmers of Ohio, for the preservation of potatoes in bar-rels, bins and heaps. Salt doubtlessly is the upplies of best thing that can be used for that purpose, and as we had the experience of a gentleman who had used if, and whose veracity is beyond question, we would devise its use to prevent

rot in potatoes that may be stored for winter use as well as spring sales.

gers save one, the safe storing thereof. Corn has never promised better at this season than it does now. Oats, though planted late as a general thing, gives promise of a large crop. Potatoes are doing their very best, as well also the smaller crops. Farmers had better see to sowing turnip seed this month and the beginning of next, for a general crop. There is not that attention given to this important root that there should be. Englishmen say that the failure of the turnip would be a greater loss to them than the failure of the wheat crop.

Farmers are now busy securing the wheat crop. Hay enough has been cured to last for two seasons, and well cured too, and vet

the meadows are to bring their portion yet. Although, the farmer has his full reward, and gratitude to the bountiful giver of every good, should fill the heart.

THERE SHOULD BE NO WASTE GROUND .-Where a weed will grow a useful plant will also grow. The first is useless and cumbers the ground. A good garden should always have a few cabbage, beet or tomato plants to be used in odd spots, as they will call his attention to their proper growth and the extir-pation of weeds which are sure to spring up in such odd places. As soon as early peas are over, pull up the stalks and set in cab-

bage or tomato plants. Keep putting in some seeds such as lettuce, radish, cucumber enbis. Carpet chain; Feathers; Cotton Batting; Counterpanes, &c., &c. All the above goods and many others; we offer dire, peas &c., as soon as an early crop has passe

THE TROUBLE-Since we have raised corn we have never seen suckers grow so rapidly or in such quantities. Porhaps it is because the ground is kept so clear of weeds that it throws its strength into the corn and causes the suckers to start because the corn freent grow fast enough to take up the strength of the soil. Keep the weeds down, first cost. Carlisle, February 25, 1862.

BEANS FOR SHEEP .--- B. F. Taber, of Cayuga Co., writes us that he intends to raise a crop of beans every year, more or less to feed his Co., writes us that he intends to raise a crop of beans every year, more or less to feed his sheep, his experience "in feeding them last winter and spring having satisfied him of their superiority for keeping the sheep in first-rate condition, growing a large fleece of their superiority for keeping the sheep in first-rate condition, growing a large fleece of wool and making milk at lambing time, besides improving the manure."

A GOOD IDEA.—That is a good idea of Clark's: "The frest is God's plough, which he drives through every inch of ground in the Post-Office, cornor of Hanover and Pomfred
