THIS machine is so very simple in con

that a boy or girl 10 or 12 years of ago can perform the services of Washing with ease, and do it in 1-4 the time that a grown person can without a Machine. This is a great saving to those that hire; also, to the bone and muscles of those who are compelled to endure the trials of the washing day.— This Machine is a great self-labors aving Invention.

It is the universal expression of those who have used it, and they are legion, that the hitherto long and laborious work of washing-day is made quick and easy, by the use of this machine; and the time is now at hand when no family should be without one.

The Proprietors have no hesitancy in saying that this is the acme of Washing Machine Invention, and worth more than all others combined.— It is in fact the "NE PLUS ULTRA" in this line of invention. For confirmation of the above, call and examine one at the shop of J. R. Weaver,
