

Agricultural

From the Genesee Farmer. WHAT BREED OF SHEEP SHALL I REAR?

A subscriber of the Genesee Farmer asks us the above question. The answer must depend on circumstances—on the character of soil and the system of agriculture adopted...

In saying this we do not wish to be understood as asserting that, leaving the mutton out of the calculation, more wool can be obtained at a given cost from the long-wooled sheep than from the Merinos...

There can be no doubt of the truth of this proposition. It is a fact which we do not think should be in question. For we do not think that the case. Other things being equal, sheep undoubtedly consume food in proportion to their live weight...

The advantages of the Merinos are: 1. They produce more wool for the food consumed; 2. their wool usually commands a much higher price. The advantages of the long-wooled sheep are: 1. They afford more mutton for the food consumed; 2. the mutton usually brings a much higher price.

Under ordinary circumstances it is not easy to determine which of these two classes of sheep are on the whole most profitable. As before said, it depends much on the character of the soil, on the location, the system of agriculture, the proximity to market, and on the test of the breeder. So as our own taste is concerned, we should much prefer the large sheep, because we are better acquainted with their peculiarities, management, &c. We are of the opinion, too, that in the vicinity, where there is an increasing demand for good mutton, and where a mixed system of agriculture is adopted, the most profitable. We think this is the case even when their wool sells at the same relative price as previous to the war.

At the present time, however, their wool commands nearly or quite as high a price as the fine wool; and as long as this is the case, the long-wooled, and long sheep are much the more profitable breed of sheep. We may be asked what we mean by the long-wooled sheep for good mutton, and generally classed as "Long-Wools." The former include the Leicester, Lincoln and Cotswold; the latter the different varieties of the South Down, such as the Saxons, Hampshire and Shropshire Downs.

In our previous remarks we have not made this distinction. We have alluded to them all as long-wooled mutton sheep. In comparing them with the Merinos it may be well to designate all the English sheep as "Coarse Wools" and the Merinos as "Fine Wools."

The Best Varieties of Tomatoes.—A correspondent of the Germantown Telegraph writes as follows of different kinds of tomatoes: The Extra Early Red Tomato.—This variety ripens about one week earlier than other varieties, but is only of medium size, seedy and acid, and very inferior for its early ripening would not be worth cultivating.

The Fejee Island, in this vicinity, stands at the head of the tomato list. It is less acid, more solid and less seedy than the red tomatoes formerly cultivated by us, and a very prolific bearer; and although it commences ripening a few days later than some other varieties, after it once begins it ripens as perfectly and as rapidly as any other variety. The White or Light Green Color is a superior tomato, a good bearer, but hardly as prolific as the Fejee—perhaps would average a larger size, is of a native of a more torrid climate, as it requires more heat to bring it forward than other varieties. It grows upright in a tree or bush-like form; is of a dwarf nature, but requires staking before or after the fruit sets on to prevent it from falling over. It ripens late—the first specimen we began to ripen on the 1st of September. It grows as perfectly as any matured as rapidly and brightly red color, as large as the Fejee, and is quite as prolific, contains but few seeds, and is worthy of a prominent position, and very desirable for small gardens, as it occupies but little space.

Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, Trembling, Weakness, Pain in the Back, Muscular System, Heat of the Face, Eruptions on the Face, Dizziness of the Skin, Disruptions on the Face.

These symptoms, if allowed to go on, which this medicine invariably removes, soon follows Impotency, Epileptic Fits, in one of which the patient may expire.

Who can say that they are not frequently followed by those "dreadful diseases"?

Many are aware of the cause of their suffering, but none will confess. The records of the Insane Asylums and the melancholy Deaths by Consumption bear ample witness to the truth of the assertion.

THE CONSTITUTION ONCE AFFECTED WITH ORGANIC WEAKNESS, Under ordinary circumstances it is not easy to determine which of these two classes of sheep are on the whole most profitable.
