DRILLING VS. HILLING.

The comparative merit of these two systems has long been discussed, but without eliciting any reliable data to show the superiority of either. Circumstances may sometimes favor the one and sometimes the other, as much frequently depends upon slight contingencies arising from sudden alternations of heat and cold, wet and dry seasons. After having perused an able discussion between two 'Practical Farmers,' on the characteristic excellencies of the two systems, I determined to give the two a fair trial. To do this impartially, I selected a piece of light, sandy soil, which had not been cropped for several years, and which, after having been manured with old stable dung at the rate of twenty-five one-horse loads to the acre, was carefully plowed, and after receiving a thorough working, planted on the first of May. The piece contained exactly one acre, and was divided into sixths. On the first sixth corn was planted in drills, three and a half feet apart—the drills being one foot asunder, and each hill containing three grains of corn. In these drills, one grain of poudrette, mixed with the same quantity of wood ashes, the whole being saturated with urine, was dropped before depositing the corn, and covered with one inch of soil. The second division was furrowed and planted in corn—the same seed being used as on the first division; the rows being the same distance between them as that between the rows, viz: three feet and a half in the clear. Seven kernels of corn, and the same kind of manure in equal quantity, was allowed to the hill: the details of dropping, covering, &c., were also the same. On the third sixth, beans were planted in drills two feet apart, the seed being deposited by a corn planter in such a way that one stock would stand on every four inches. On the fourth division the hill system was adopted—the rows being two feet apart, and the hills in the rows eighteen inches—eight beans being allowed to the hill. One gill of poudrette was allowed to each hill and somewhat less than a common teaspoonful to each stalk of beans in the drills, which was a fair apportionment, doubtless, taking into consideration all the circumstances. The fifth allotment was furrowed three feet apart, and planted in potatoes—the hills three feet apart—one good sized potato cut into quarters being allowed to each hill, but no manure. The sixth division was furrowed, and the potatoes similarly cut, placed eight inches apart in the drills, and both lightly covered. One piece in a hill was probably light under the circumstances, but two pieces to the hill, or a nearer approximation or arrangement of the hills in the rows would have been equally objectionable, as it would have been liable to the complaint of over-seeding. After the several crops were fairly up, gypsum was applied to the potatoes, but no farther manuring applied to corn or beans—the quantity used on the potatoes being half a bushel to each of the divisions. On harvesting the crops, the product of the several plots were ascertained, by measurment, to be as follows:

Corn drilled on No 1,	10 bushels, 7 quarts.	
" planted in hills No. 2	3 "	1 peck.
Beans, drilled, No. 3	3 "	6 quarts.
" in hills, No. 4	2 "	1 peck, 3½ qts.
Potatoes, drilled, No. 5	21½ "	
" in hills, No. 6	18½ "	

It will thus be seen that the superiority of product was in every case in favor of drilling. The weight of fodder, bean haulm and potato vines was also superior on the drilled divisions; but as no means of ascertaining the discrepancies in the several parcels were adopted, they cannot be exhibited with the same accuracy observed in our report of the more important portions of the several crops.

In mentioning this result to a friend, he assured me that in the course of several years he had made repeated experiments, all of which had resulted in demonstrating the superiority of the new system over the old.—He had tried it, he assured me, in the cultivation of all hoed and weeded crops usually grown in this section, and also in several of the cereals—all of which were successful, though in different degrees.

Bone Dust.

Several years since an individual distinguished for his liberal and zealous efforts to promote the cause of agriculture, but who was somewhat skeptical as to the value of bone dust as a manure, resolved to avail himself of a favorable opportunity, and give it an impartial trial. He selected for the experiment a soil consisting of a light, sabulous texture, reposing on a subsoil of coarse gravel, and so porous as to admit of ready descent. On this land, in seasons of ordinary drought, no little inconvenience was experienced from the failure of moisture, as all the water which fell, was almost immediately passed into the subsoil, as through a filter, and without producing any apparently beneficial effects upon the growing crop. On this soil, or rather land, he planted ten quarts of beans—manuring every other row with bone dust—the intervening rows being undressed with the exception of a spoonful of gypsum in each hill. The favorable effects of the dust were so apparent, that the difference between the dusted and plastered rows was readily distinguishable almost as far as the crop could be discerned, and at harvest the former yielded double the crop afforded by those upon which plaster had been applied. The high estimation in which ground and crushed bones are held by the agriculturists of Great Britain, prove their value, although from the superior humidity of the soil and atmosphere of that country, both ground and crushed bones produce greater results than they ordinarily do with us. On turnips, beans, wheat, and, indeed, on almost every variety and species of vegetation, their effects are markedly apparent, communicating a healthy and vigorous luxuriance. The lime contained in bones, renders it a valuable manure for the wheat plant, the grain of which, according to the most correct analysis, contains, in one hundred parts, 33 per cent. of ashes, of which 12 per cent. are lime salts, and 15 of silica, or sand. Any manure, to be of immediate service, must contain the principles required by the plants to which it is applied. Plants possess not the power of generating a single constituent of which they are composed, whether mineral or vegetable, these are all primarily derived from the soil, or from the articles applied to it as manure.—*Bonsalum, November 2, 1863.*

Imported Mediterranean Wheat.

We have received from the Commissioner of Agriculture several parcels of very fine looking imported Mediterranean wheat. We have complied with the request of the Commissioner, and have placed it in good hands for trial, though more satisfactory results would have been attained had the samples been forwarded at an earlier period. The importation of this wheat should be continued by the department, as there is little doubt of its entire superiority as a whole over all other varieties of wheat yet introduced. It ripens early and is less liable to the attacks of the fly and other enemies of the wheat plant than any other kind with which we are familiar.—*Phila. Culturist.*

FENCE TIMBER.—As fence mending and setting is one of the first duties after the frost is out of the ground, so a standing job for the winter is the getting out of a good supply of posts, rails and stakes. Let it not be forgotten.

DOCTOR HOOFLAND'S GERMAN BITTERS, prepared by Dr. C. M. Jackson, Philadelphia, Pa., will effectually cure Liver Complaint, Dyspepsia, Jaundice, Chronic or Nervous Debility, Disease of the Kidneys, and all diseases arising from a disordered Liver or Stomach.

Such as Constipation, Inward Piles, Fulness or Blood to the Head, Acidity of the Stomach, Nausea, Heartburn, Disgust for Food, Fulness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Hurried and Difficult breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, dimness of Vision, Dots or Webs before the Sight, Fever and Dull Pain in the Head, Deficiency of Perspiration, Yellowness of the Skin and Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flushes of Heat, Burning in the Flesh, Constant Imaginings of Evil, and great Depression of Spirits. And will positively prevent Yellow Fever, Billious Fever, &c.

HOOFLAND'S GERMAN BITTERS!

Are not a new and untried article, but have stood the test of fifteen years trial by the American public; and their reputation and sale, are not rivalled by any similar preparation.

The proprietors have thousands of Letters from the most eminent

CLERGYMEN, LAWYERS, PHISICIANS, and CITIZENS,

Testifying of their own personal knowledge, to the beneficial effect and medical virtues of these Bitters.

Do you want something to strengthen you?

Do you want a good Appetite?

Do you want to build up your constitution?

Do you want to feel well?

Do you want to get rid of nervousness?

Do you want energy?

Do you want to sleep well?

Do you want a brisk and vigorous feeling?

If you do, use HOOFLAND'S GERMAN BITTERS.

PARTICULAR NOTICE.

There are many preparations sold under the name of Bitters, put up in quart bottles, compounded of the cheapest whisky or common rum, costing from 20 to 40 cents per gallon, the taste disguised by Anise or Coriander Seed.

This class of Bitters has caused and will continue to cause, as long as they can be sold, hundreds to die the death of the drunkard. By their use the system is kept continually under the influence of Alcholic Stimulants of the worst kind, the desire for Liquor is created and kept up, and the result is all the horrors attendant upon a drunkard's life and death.

For those who desire and WILL HAVE a Liquor Bitters, we publish the following receipt: Get ONE BOTTLE HOOFLAND'S GERMAN BITTERS and mix with THREE QUARTS OF GOOD BRANDY OR WHISKEY, and the result will be a preparation that will FAR EXCEL in medical virtues and true excellence any of the numerous Liquor Bitters in the market, and will COST MUCH LESS. You will have all the virtues of HOOFLAND'S BITTERS in connection with a GOOD article or Liquor, at a much less price than these inferior preparations will cost you.

ATTENTION, SOLDIERS!

AND THE FRIENDS OF SOLDIERS.

We call attention of all having relations or friends in the army to the fact that 'Hoofland's German Bitters' will cure nine tenths of the diseases induced by exposures and privations incident to camp life. In the lists, published almost daily in the newspapers on the arrival of the sick, it will be noticed that a very large proportion are suffering from debility. Every case of that kind can be readily cured by Hoofland's German Bitters. Diseases resulting from disorders of the digestive organs are speedily removed. We have no hesitation in stating that, if these Bitters were freely used among our soldiers, hundreds of lives might be saved that otherwise will be lost.

We call particular attention to the following remarkable and well authenticated cure of one of the nation's heroes, whose life, to use his own language, "has been saved by Bitters."

PHILADELPHIA, August 23rd, 1862

Messrs Jones & Evans.—Well, gentlemen, your Hoofland's German Bitters has saved my life. There is no mistake in this. It is vouched for by numbers of my comrades, some of whose names are appended, and who were fully cognizant of all the circumstances of my case. I am, and have been for the last four years, a member of Sherman's celebrated battery, and under the immediate command of Captain R. B. Ayers. Through the exposure attendant upon my arduous duties, I was attacked in November last with inflamation of the lungs, and was for seventy-two days in the hospital. This was followed by great debility, heightened by an attack of dysentery. I was then removed from the White House, and sent to this city on board the Steamer "State of Maine," from which I landed on the 28th of June. Since that time I have been about as low as any one could be and still retain a spark of vitality. For a week or more I was scarcely able to swallow anything, and if I *did* force a morsel down, it was immediately thrown up again.

I could not even keep a glass of water on my stomach. Life could not last under these circumstances: and, accordingly, the physicians who had been working faithfully, though unsuccessfully, to rescue me from the grasp of the dread Archer, frankly told me they could do no more for me, and advised me to see a clergyman, and to make such disposition of my limited funds as best suited me. An acquaintance who visited me at the hospital, Mr. Frederick Steinbron, of Sixth below Arch Street, advised me, as a forlorn hope, to try your Bitters, and kindly procured a bottle. From the time I commenced taking them the gloomy shadow of death receded, and I am now, thank God for it, getting better. Though I have taken but two bottles, I have gained ten pounds, and I feel sanguine of being permitted to rejoin my wife and daughter, from whom I have heard nothing for eighteen months,: for, gentlemen, I am a loyal Virginian, from the vicinity of Front Royal. To your invaluable Bitters I owe the certainty of life which has taked the place of vague fears—to your Bitters will I owe the glorious privilege of again clasping to my bosom those who are dearest to me in life.

Very truly yours,

ISAAC MALONE.

We fully concur in the truth of the above statement, as we had despaired of seeing our comrade, Mr. Malone, restored to health.

DR. SWEET'S

INFALLIBLE

LINIMENT,

THE

GREVT REMEDY

For Rheumatism, Gout, Neuralgia, Lumbago, Stiff Neck and Joints, Sprains, Bruises Cuts and Wounds, Piles, Headache, and all Rheumatic and Nervous Disorders.

For all of which it is a speedy and certain remedy, and never fails. This Liniment is prepared from the recipe of Dr. Stephen Sweet, of Connecticut, the famous bone setter, and has been used in his practice for more than twenty years with the most astonishing success.

As an Alleviator of Pain, it is unrivaled by any preparation before the public, of which the most skeptical may be convinced by a single trial.

This Liniment will cure rapidly and radically, Rheumatic Disorders of every kind, and in thousands of cases where it has been used it has never been known to fail.

For Neuralgia, it will afford immediate relief in every case, however distressing.

It will relieve the worst cases of *Headache* in three minutes and is warranted to do it.

Toothache also will it cure instantly.

For Nervous Debility and General Lassitude arising from imprudence or excess, this Liniment is a most happy and unfailing remedy. Acting directly upon the nervous tissues, it strengthens and revives the system, and restores it to elasticity and vigor.

For Piles.—As an external remedy, we claim that it is the *best* known, and we challenge the orld to produce an equal. Every victim of this distressing complaint should give it a trial, for it will not fail to afford immediate relief, and in a majority of cases will effect a *radical* cure.

Quinsy and Sore Throat are sometimes extremely malignant and dangerous, but a timely application of this Liniment will never fail to cure.

Sprains are sometimes very obstinate, and enargement of the joints is liable to occur if neglected. The worst case may be conquered by this Liniment in two or three days.

Bruises, Cuts, Wounds, Sores, Ulcers, Burns and Scalds, yield readily to the wonderful healing properties of DR. SWEET'S INFALLIBLE LINIMENT, when used according to directions. Also *Chilblains, Frosted Feet, and Insect Bites and Stings.*

CARLISLE FOUNDRY

Farming Implement Depot.

F. GARDNER & CO. now manufacture and keep constantly FOR SALE, at their extensive Steam Works on East Main st., Carlisle, a large assortment of Agricultural Implements, of well known and approved usefulness to Farmers, among which they would call especial attention to

WILLOUGHBY'S CELEBRATED

Patent Gum Spring Grain Drill,

which has taken over fifty first class premiums at State and County Fairs. To the farmers of Cumberland, York and Perry counties we need not speak in detail of the merits of his drill, as scores of them are now in use on the best farms in these counties. Its reputation is established as the most complete grain drill now manufactured in the United States. It sows Wheat, Rye, Oats, Barley and Grass, evenly and regular, without bunching the seed. The gum springs pass the drill over stumps and stones, without breaking pins or the drill. For even and regular sowing, the Willoughby Gum Spring Drill is unequalled by any other. We also manufacture and sell the following articles, which we can recommend to farmers as reliable implements of established character:

Harrison's Patent Corn Planter,
Lash's Patent Straw and Fodder Cutter,
Bridendolf's Patent Corn Sheller,
Johnston's Cast Iron Hog Trough,
Harn's Patent Cider Mill.

Also, Three and Four Horse Powers and Threshing Machines, Cast Iron Field Rollers, Plough Castings of various patterns, Corn Crushers, and other articles for farmers too numerous to mention. Also, Egg Coal Stoves and ten plate Wood Stoves, with an immense variety of other castings for house keepers and others. We have also an attractive variety of patterns for

IRON RAILINGS,

and Cemetery enclosures, to which we would call attention.

STEAM ENGINES AND MILL GEARING

To this department of our business we give particular attention. Our already extensive stock of patterns for paper, flour and saw mill gearing, is constantly increasing. Mill owners and millwrights will be furnished with a printed catalogue of our various mill patterns on application. Our machine shop comprises all the various tools for turning, planing and finishing shafting and casting, by good and careful machinists.

STATIONARY STEAM ENGINES,

of every desirable capacity, from 10 to 25 horse power, built in the best style and on accommodating terms. Engines built at our establishment may be seen in successful operation at many of the largest distilleries and tanneries in Carlisle, and Cumb'd, Perry and Dauphin cos., to the owners of which we confidently refer for information as to their efficiency. Persons wanting Steam Engines are earnestly requested to call and examine before contracting elsewhere.

These celebrated Machines are adapted to every variety of sewing for family wear, from the lightest muslins to the heaviest cloths. They work equally well upon silk, linen, woolen, and cotton goods,—earning, quilting, gathering, hemming, felling, corting, and branding,—making a beautiful and perfect stitch, alike on both sides—and perform every species of sewing, except making buttonholes and stitching or fancies.

Full instructions for operating the Machine is given gratuitously, at the sales rooms. When the Machine is sent some distance, so that personal instruction is inconvenient, a card of direction is sent, which is a sufficient guide.

The qualities which recommend the Wheeler & Wilson Machine are—

1. Beauty and excellence of stitch, alike on both sides of the fabric sewed.
2. Strength, firmness, and durability of seam that will not rip nor ravel, and must either
3. Economy of thread.
4. Its attachments and wide range of application to purposes and materials.
5. Compactness and elegance of model and finish.
6. Simplicity and thoroughness of construction.
7. Speed, ease of operation and management, and quietness of movement.

Sewing Machines.

SINGER & CO'S

"LETTER A" Family Sewing Machine, with all the new improvements, is the best and *cheapest*, and *most beautiful* of all Sewing Machines. This Machine will sew anything from the running of a tuck in Tarletan, to the making of an Overcoat. It can fell, hem, bind, braid, tuck, gather, quilt, and has capacity for a great variety of ornamental work. This is not the only Machine that can fell, hem, bind, and so forth, *but it will do no better than any other.* The new and improved Hemmer adapted to turning a hem of any width is added without extra charge.

Call and examine them at No. 3, Glass' Row, West side of Public Square, and next door to the Democrat Office.
