HINTS ABV--The Stock.--" Between hay and grass" is a proverbially hard time for cattle and stock of all kinds. One's calculations to any to come out a little short in real Freme and Nair Garibald' Shirred, batdles, N (Jouvin's Silk, Berl Ladies, G kerchiefs kinds; N Skirts, Ba МI Always CASSIM have Ga a first-cl All the PARA SPRIN HOU ...om quarrel, so it is best to allow a week or fortnigt's difference in their ages. Sheep.—We are strong advocates for shearing sheep unwashed. They may thus be sheared much earlier; there is little danger of their taking cold; the coolness of the weather is supposed to in-fluence a more rapid renewing of their covering, and by the time the summer's sun beats down hot and schorching upon their backs, they are sufficiently protected not to be blistered, as sometimes happens in late shorn flocks. All flocks ought to be dipped after shearing. Unloss the ticks or lice are very thick, the dipping should be postponed till warmer weather than we usually have in May. The gradual ac-customing of sheep to, grass is quite as important as the same treatment for cattle. Do not withold the grain, but keep it up until after the flock is well established upon grass. They should also be turned to grass gradually, two or three hours a day, in addition to their full regular fee-ding of hay, etc. No one should overhook the great value of his stock as manure makers. This will in many parts of the country make it very remunerative to have the cows all yarded or stabled at mi-ght, and the sheep folded. *Buildings*, etc.—Painting should be of ev ery HEMP of the ce Compan REAL Floor Oil Window Matts, Please the advar where ye motto is
