"MERCHANT'S HOTEL," MECHANICS-Bung.—Our enterprising friend, Maj. T J. KERR, has moved into his splendid new and commodious hotel, at Mechanicsburg. Most sincerely do we hope his most sanguine expectations may be realized, for he is elever almost to a fault and will make a prince of a landlord. The Mechanicsburg Journal thus speaks of the new hotel and its proprietor:

THE NEW HOTEL.—It was with no small degree of pleasure that we recorded the progress of the enterprise which was to supply a want long felt here, in the erection of a first-class hotel, and we are exceedingly gratified in being able to an-nounce that it has been completed and occupied, about two weeks since, by the Proprietor, Maj. KERR. He has given it the title of "Merchant's Hotel," by which name it wili be known in the future It presents an imposing and very attrac-

tive appearance, and we venture to say that few towns in the State, of the size of ours, can boast of as fine a hotel as this. It is in every respect a superior building, and the term "first-class" is richly deserved.

A brief description of the building may perhaps be of interest: The building is three stories in height, 42 feet front, and three stories in height, 42 feet front, and 100 feetin depth. A portico extends along the entire front of the building, the ornamented wood work and pillars add greatly to the appearance of the building. A veranda also extending the full length of the building, on a level with the second floor, but not yet finished, will be an additional attractive feature. The office and gentlemen's sitting room are on the right gentlemen's sitting room are on the right side of the spacious hall, and are separated by folding doors, while the reception room is on the left side of the hall.

The main hall runs into another, pass-

Opposite the second hall is the dining room, which is fifty-two feet in length. The staircase leading to the second floor is in the second hall, at the terminus of the first hell. On the second floor are the first hell. is in the second hall, at the terminus of the first hall. On the second floor are the ball-room and parlor. The former on the left of the hall, over the office, is a splen-did room, 27×38 feet. The parlor is on the opposite side of the hall, and is also a fine room, of equal length with the other. The chambers on the second and third floors are cheerful and airy, and most admirably arranged. THIS is an article for Washing without rubbing, except in very dirty places, which will require a very slight rub, and unities other preparations offered for a like purpose, will not rot the clothes, but will leave them much whiter than ordinary methods, without the usual wear and tear. It removes grease as if by magic, and softens the dirt by sonking, so that rinsing will in ordinary cases entirely remove it. The powder is p.epared in accordance with chemical science, and upon a process peculiar to itself, which is secured by Letters Patent. It saves most of the labor of rubbing, and wear and tear. Also, for cleaning windows it is unsurpassed. With one quarter the time and labor usually required it imparts a beautiful gloss and lustre, much superior to any other mode. No water required except to moisten the powder. Directions with each package, And can be readily appreciated by a single trial. The cost of washing for a family of five or six persons will not exceed three cents. The manufacturers of this powder are aware that many useless compounds have been introduced to the public which have rotted the cloth, or failed in removing the dirt, but knowing the intrinsic excellence of this article, they confidently proclaim it as being adapted to meet a demand which has long existed, and which has hereto fore remained unsupplied. Manufactured by Broadway, Boston.

A GUA DE MAGNOLIA!

The prettiest thing, the "sweetest thing," and the most of it for the least money. It can be obtained everywhere at one dollar per bottle.

S. T.—1869.—X.—The amount of Plantation Bitters sold in one year is something startling. They would fill Broadway six feet high, from the Park to 4th street. Drake's manufactory is one of the institutions of New York. It is said that Drake painted all the rocks in the Eastern States with his cabalistic "S. T.—1869.—X." and then got the old granny legislators to pass a law "preventing disfiguring the face of nature," which gives bim we do know the Plantation Bitters sell as no other article ever did. They are used by all classes of the community, and are death on Dyspepsia—certain. They are very invigorating when languid and weak, and a great appetizer.
