THE PROCEEDS .- The net profits of the dinner given on the Fourth of July, in aid of the Soldiers' Monument Association, were \$386.81. This was doing well. but not as well as we had hoped.

PASSED THROUGH.—Gen. Grant and lady passed through our town on Monday evening last, on his way to Doubling Gap Springs. While the cars stopped at the depot the General stepped out on the platform and bowed to the crowd that had assembled there. He accompanied his wife as far as Newville and then returned in a special train to Washington

THE NEW LIQUOR LAW,-The Town Council of the borough of Mechanicsburg have passed a resolution calling upon the Chief Burgess and Police in that town to rigidly enforce the provisions of the new_ liquor law passed by the last Legislature.

BURGLARY.-On Wednesday morning of last week, during market hours, three | physical elements of which the effects are men, wearing masks, entered the house of Mr. John Cramer, on South Pitt street, and took from a second story room a the mountains we feel more facility of rechest, which they broke open with a ham- spiration, less heaviness of the body, more mer and chisel. BASE BALL-Amateur vs. Grier.-An exciting game of Base Ball was played on the grounds of the Amateur on last Tuesday, between the "Amateur" Club, of curious, to examine the way in which Carlisle, and the "Grier" Club, of Carlisle Barracks, which resulted in a most signal triumph for the Amateurs. But seven innings were played when darkness coming on game was called by the Umpire. The following is the score.

THE CANADA THISTLE LAW.—Several of the State Legislatures have lately enacted laws against the Canada thistle, and we trust they all will wherever there is the least danger of its making its appear-

In our own Legislature, some five years ago there was a similar law passed against this, the vilest of all the encumberances of a farm-mortgages scarcely excepted. This law provides in effect, that, "Hereafter any individual or corporation allow ing the Canada thistle upon his premises from the lands of a careless and thriftless old bachelor is the very scare-crow of hapneighbor, may, after five days notice, enfound growing, cut it, and recover full cost for the labor and trouble.'

LARGE WHEAT.- We learn from every quarter of the harvesting of excellent crops of wheat. Indeed we have not seen a single farmer that does not claim above the average of past years, as to weight and quality of grain. A farmer friend tells us that three cuts of the cradle in his wheat made a full sheaf-usually it takes from five to six. His wheat weighed full 60 pourds to the bushel.

BE CAREFUL.—The present warm weather will no doubt engender much sickness, and our readers should be very particular in what they eat and drink, both as regards quality and quantity. Already we hear reports of cholera, dysentery and various summer complaints, resulting no doubt, in most cases from the decayed vegetables. The markets are filled with green trash, some folks will not control their appetites, and disease is the result. We advise all to be careful in their diet and see well to that of their children. Above all, live temperately and avoid all subjects of undue excitement.

PENALTY FOR STEALING FRUIT.—Persons who steal fruit should remember that the law of 1860 imposes a penalty of \$50 fine and sixty days' imprisonment for any such offense, when proven before any Alderman or Justice of the Peace. The same law provides a penalty of from \$5 to \$50, with costs, for wilfully entering or breaking into any orchard, yard or garden-the fine being one-half to the informer and one-half to the owner of the

THE DEMOCRATIC PRESS.—The late Democratic Convention, at Harrisburg, recommended that all Democrats make vigorous efforts to increase the circulation of Democratic journals throughout the land, and also to give them their individual support and patronage, as the power and success of the Democratic party depends on the character and efficiency of the Democratic newspaper press.

SEASONABLE SUGGESTIONS.—The following hints are seasonable, and may be true, they are at least worth trying: Oil of pennyroyal will keep musquitoes out of a room, if scattered about even in small quantities. Roaches are exterminated by scattering a handfull of fresh cucumber paring about the house. No fly will light on the window which has been washed with water in which a little gar lic has been boiled.

"The perfumed light Steals through the mist of alabaster lamps, And overy air is heavy with the breath Of orange flowers that bloom I' the midst of roses,"

Such was the flowry land filled with healing airs and life-preserving products, where Dr. Drake discovered the chief ingredients of his wonderful Tonic Medicine -PLANTATION BITTERS—the enchanted tropical island of St. Croix. The PLAN-TATION BITTERS, combining all the medicinal and tonic virtues of the healing and life-sustaining products of that favored Great Remedy for Dyspepsia, Low Spirits, and all other Stomachic difficulties.

country we hear the most encouraging and satisfactory accounts of the produce of our present harvest. The grain which has been gathered in has not only been unusual in quantity but in quality. The the yield more than abundant. The weathwas not interrupted to any extent, by clouds and storms, but the skies have smiled upon the industry of man in securing the bounties of heaven. We have scarcely deserved all this, for our sins have arisen up in judgment against us. and we have merited punishment instead of goodness and mercy. We have therefore received more than our just deserts. and if we ever had occasion to be thankful it is now. Our harvest home this year should be of an unusual character. From the Atlantic to the Pacific, the people should assemble themselves together with voices of prayer and praise, for all have been blessed alike. The rains of the eason have fallen upon the just and unjust, and "seed time and harvest," and the golden fruits of increase have been withheld from none.

MOUNTAIN AIR .- The neighborhood of hills and mountains, permitting a great change of air, with little travel, is a great advantage. The decrease of heat and atmospheric pressure, when we ascend, are un ieniable. Rousseau says: "It is a general impression of every person that in clearness of the mind, the passions become that when we elevate ourselves above the common dwelling-place of man we leave there all low and terrestrial sentiments, SUDDEN DEATH AT CARLISLE BAR- and that the nearer we come to the erthe-RACKS.—On Wednesday afternoon of last rial space the spirit of man obtains more week, Mr. Michael Gibbons, an old and of the celestial unalterable purity. We become serious without melancholy, quiet without indolence, satisfied to exist and Barracks, and died in a short time after- to think." He also adds: "I doubt if wards. The old gentlemen had been at any violent agitation, any hysterion the grounds when he fell over in a fit am surprised that baths of healthy mountain air are not of the greatest remedies in medicine, and oftener prescribed.

COST OF A POUND OF TEA,-It is instructive and sometimes profitable, as the cost of a commodity is piled up between producer and consumer by freights, handling duties, exchange, and the comnissions and profits of middlemen. Tea for example, is sold by the grower in China and Japan at various prices, from about fifteen to thirty cents a pound.— With freights added, it is said to cost when laid down in any of our principal seaports an average of fifty cents in gold a pound for superior brands or "chops." Taking this as a starting point the additional charges before it reaches the table of the consumers are said to accumulate as follows:-Original cost of tea imported, 50 cts; discount on currency to pay for it, 20 ets.; duty in gold, 25 ets.; discount on currency to make up the gold, 15 cts.; profit of importer, 12 cts.; profit of jobber, 13 cts.; profit of retailer, say 29 cents. Total, \$1.74. Of this fiftyfour cents are comprised in three profits, thirty-five cents in exchange for gold, twenty-five cents in duties, and ten cents in contingencies; in all one dollar and twenty-four cents, in addition to the cost on board ship at our wharves. Before the war the cost would have been about as follows:—Original cost, imported, 50 cts.; ten per cent. for contingencies, 5 cts.; profit of importer, 5 cts; profit of

Total, 80 cents. THE BACHELOR.-In the vast field of human affections, says a cotemporary, the piness, who drives away the little birds on any lands where the weed is of love that come to steal away the little hemlock seeds of loneliness and despair. Where is there a more pitiable object on this earth than a man who has no amiable woman interested in his welfare? How dismal does his desolate room appear, when he comes home at night, weary and hungry; a barren table, and a lonely pillow, which looks like the white urn of every earthly enjoyment. See the old bachelor in the dark afternoon of life, when his heart is sinking to its sunderance! Not a solitary star of memory gleams over his opening grave! weeping wife to bend like a comforting angel over his dying pillow and wipe the death damp from his brow! No fond daughter to draw his chilly hand into the soft pressure of hers, and warm his icy blood with the reviving fires of availing affection! No manly boy to link his breaking name with the golden chain of honorable society, and bind his history in the vast volumes of the world he is leaving forever. He has eaten and drank, and drank and died, and earth is glad she's got rid of him, for he had little else to do than cram his soul into the circumference of a sixpence; and no human being, save his washerwoman, will breathe a sigh at his funeral.

PEPPER.-Pepper is an almost universal condiment. Black pepper irritates and inflames the coating of the stomach; red pepper does not-it excites, but does not irritate; consequently it should be used instead of black pepper. It was known to the Romans, and has been in use in the East Indies from time immemorial, as it corrects that flatulence which attends the large use of vegetable food .-Persons in health do not need any pepper in their food; but to those of weak and languid stomachs, it is manifold more ealthy to use cayenne pepper at meals than any form of wine, brandy, or beer clime, are, without doubt, the World's that can be named, because it stimulates DLAIN and FANCY PRINTING of without the reaction of sleepiness or de-

THE HARVEST.—From every part of the | A GOOD EXAMPLE.—An exchange thus records the good example of a prominent Democrat, in the proper dissemination of Democratic principles: "One of our subscribers came to our office one day last week and renewed his subscription sheeves have not only been plentiful but | for another year. He then ordered a copy of the paper to be sent to his two er too, has been as fair and pleasant as could be desired. The labor of the field paid for them a year in advance, remarking that these were times when men ought to read the truth." We record this example of an humble but earnest Democrat with pleasure. It is worthy to be followed by others. Let the people read sound papers and understand fully the aim and objects of the Jacobin lead ers, and there will be a change in public opinion. Old men should encourage the young men to take and read Democratic papers. Let them grow up with correct principles. We commend the above to the consideration of our friends in thi STOVES AND TINWARE county.

Persons of sedentary habits troubled with weakness, lassitude, pulpitation of the heart, lack of appetite, distress after eating, torpid liver, constrpation, de, deserve to suffer if they will not try the celebrated PLANTATION BITTERS, which are now recommended by the highest medical authorities, and warranted to produce an immediate beneficial effect. They are exceedingly agreeable, perfectly pure, and must supersede all other tonics where a healthy, gentle stimulant is required.

They purify, strengthen and invigorate. They create a healthy appetite.

They are an antidote to change of water and diet.

They strengthen the system and collyen th They prevent miasmatic and intermittent f ers. They purify the breath and acidity of the stom ache and the weak strong, the languid brilling, and are exhausted nature's great restorer.
