At present, the profits of the Company are derived only from its local trafile, but this is already much more times sufficiently for the state of the more more than the more built. It is not doubted that when, the road is completed the through trafile of the only line connecting the Atlantic and Pacille States will be large beyond precedent, and, as there will be no competition, it can always be done at profituale rates.

It will be noticed that the Union Pacific Railroad is, in fact, a Government Work, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government faction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property.
