800 MILES UNION PACIFIC

RAILROAD Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first-class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at onco. It is now probable that the re now finished and in operation. Although

Whole Line to the PACIFIC will be some pleted in 1869. The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operation; also 12,800 acros of land to the mile, taken in alternate sections on each side of its road; also United States Thirty year Bonds, amounting to from \$16,000 to \$15,000 per mile, according to the difficulties to be surounted on the various sections to be built, for and it is expected that not only the interest, but

the principal amount may be paid in services rendered by the Company in transporting troops, mails, &c.

THE EARNINGS OF THE UNION PACIFIC RAILEOAD, from its Way or Local Business only, during the year ending June 28th, 1868, amounted to over FOUR MILLION DOLLARS. which after paying all expenses was much morn han sufficient to pay the interest upon its Bonds, these carnings are no indication of the vast brough trails that must follow the opening of he line to the Facilic, but they certainly prove

ARE ENTIRELY SECURE. ARE ENTIRELY SECURE.

The Union Pacific Bonds run thirty years, are for \$1,000 cach, and have coupons attached. They bear annual interest, payable on the first days so journey and July at the Company's Office, in the City of New York, at the rate of six per cent, in gold. The principal is payable in gold at maturity. The price is \$102, and at the present rate of gold, they pay a liberal income on their cost. A very important consideration in determining the value of these bonds is the length of time they have to run.

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States, will decline as it has done in Europe, and we have a right to expect that such six per cent, see curlities as these will be held at as high a premium as those of this dovernment, which, in 1857, were bought in at from 20 to 22 per cent, above par. The export demmid alone may produce them, they are beyond the reach of political as. The Company believe that their bonds, at the present rate, are the cheapest security in the untries, and the right to advance the price at my time is reserved.

Subscriptions will be received in Carlisie by A. L. SPONSLER, and in New York
