the "thousand and one" articles known vary from our rule in the present case, that we may call attention to the article Bitters." We desire it understood that we do so without any solicitation or promer interested parties. We sump'y do it as an act of duty towards those who are laboring under physical disability, weakness, and the various complaints arising from impurities of the blood. Having used the Bitters at the instigation of a friend, (and, we confess, with some misgivings at the outset), we found them a most valuable medical compound, and to our great satisfaction, accomplished the object for which they were used.

THE WEATHER.—Well, what of it?
Nothing worth mentioning. It is as coquettish as a Miss in her teens, and as changeable as Radical politicians.

> DON'T LIKE THE CABINET.-The Radical Republicans don't like Grant's Cabinet. The Morning I ost says of it: That the whole country will be as tonished at Grant's Cabinet is certain.—
> The Republican party, especially, is surprised. Very few of the men recently prised. Very few of the men recently considered prominent candidates have been chosen, and many of the ablest Republicans have been passed by

This Cabinet will be accepted by the Re-. publican party, but it will not be approv ed until its character is better known. Un tried, unknown a novelty and a surprise, it stands before the country as a girantic political experiment. Vast responsibilities are imposed upon its members, and as they discharge them so will they be judged.

A LESSON FOR THE DAY.—A certain ruler was asked by the Chief of the people to sit in the receipt of customs. But the Scribes and Pharisees said unto him: This thing can thou not do, unless thou "And when he heard this he was ex-ceeding sorrowful for he was very rich." And so another received the customs.

GEN. GRANT is said to have written his inaugural, as well as selected his Cabinet, without the aid of politicians. We don't doubt it—both look like pieces of his handieraft.

THE Radical Congress could not think of celebrating the birth-day of Washington; they have such a bitter hatred of rebels, and Washington was a "rebel" against what the British called "the est government on earth.'

SENATOR MORGAN, in arguing in favor of a pension or allowance of \$5,000 a year to Mrs. Lincoln, estimated the total cost of Mr. Lincoln's funeral at \$1,000,000. He said: "Altogether it cost the Government and the States not ess than one million of dollars.'

BLAINE, the new speaker of Congress, sa native of Pennsylvania, but a men ber from Maine. He is said to be first cousin to." Oh poor Mary," &c.

ELIHU B WASHBURN, who was Secretary of State just five days, has been appointed Minister to France. The Press says: "There is a nervous bostility among the people to Congre-sional dicta ion." We are glad to wel-come our contemporary on the Demo-

cratic platform .- Age. THE Spaniards claim to have obtained a great yictory over the Cuban revolu-tionists at Mavari, in the Eastern De-partment. This, like their reported suc-cesses, will most likely turn out a defeat.

By its charter, the Company is permitted sue its own FIRST MORTGAGE BONDS ie same amount as the Government Espais, a om re. These Bonds are a Fi at Mogigage to a the entire road and all as equipments. THEY HAVE THIRTY YEARS TO RUN, AT BIX PER CENT., and, by special contract both PRINCIPAL AND INTEREST

PAYABLE IN GOLD.

The U. S. Sup eme Court has recently decided that this contract is in all respects varid and of legal obligation.

Such securities are generally valuable in proportion to the length of time they have to run.—The longs t six per sent, gold interest bonds of the U. S. (the 's18) will be due in 12 years to run, they would stand no less than 125. A perfectly safe First Moriga e Bond like the Union Pac fie should approach this rate. The demand for ratiopean investment is afready considerable, and on the completion of the work will doubtless carry the price to a large premium.

SECURITY OF THE BONDS.

It needs no argument to show that a First Mort-gace of \$28500 per inde upon what for a long tran-must be the only indroad connecting the Atlan-tic and Facilities have be performed with the con-traction of the control of the con-trol of the control of the con-stance in gold. The present currency co-of thus interest is less than \$2550,000 per summer, by the control of the con-trol of the control of the con-trol of the control of the con-stance of the control of the con-trol of the con-trol of the control of the con-trol of th

Total,

This large amount is only an indication of the liminelies traffic that must go over the through line in a few months, when the great tode of Pacific travel and trade will begin. It is estimated that this business must make the cathings of the read from FIFTEEN TO TWENTY MILLION A YEAR.

As the supply of these bonds will soon cone, partners who desire to invest in them will find it for their interest to do so at ones. The piece for the present is paran encouncil interest from Jan. 15 reprietly. Subscriptions will be received in Cartisle i y A. L.
