A Committee of the second

If a farmer has a useful common grade stock, healthy and good breeders, milk-ers, &c., but the progeny never selling for more than barely sufficient to enable for more than barely sufficient to enable him to pay his way, just reckon the difficience it would make him if he went to a good breeder, say of. Short-H rn for instance, and bought a bull, minding when purchasing to see the dam of the animal he selects, for if he wants milk as well as meat, he must see that she gives some; then when his bull's stock comes into the herd, taking the place of the old ones, he will reap an advantage every way. It will be the same with sheep; the laying out of something extra for a ram or rams from a first-rate flock, will add to his wool and mutton, as also cause his future young ones to come to maturity earlier, young ones to come to maturity earlier, and, what will be of great consequence to the farmers of this country for years to come, these better bred animals can be brought out fat at that season of the year when all comon stock is low in ilesh, and all varieties of meat sell for 20 or 30 per cent, more than at other times. Live stock and plenty of it, is the great preventive to a farm running out, and to the owner becoming poor, it will brighten the faculties of a bad farmer, and draw out the latent powers of mind which have been rusting for years, for with a heavy stock of all years, for with a heavy stock of all kinds of cattle and slieep, he has to forecast for each day, week, month and year; aye, and for more than a year.—Country Gentleman.

HOW TO HAVE GOOD MEADOWS. Mr. N. Platt, of Bradford county, Pa., in a letter to the American Institute Farmer's Club, gives his experience as follows: My land is adapted to all kinds ofgrain and to tmothy grass and red clover. My practice is, when I sow a piece to grass, not to plow it again in less than eight years, and I frequently let it lie a much longer time. I have a meadow now which has been mowed for sixteen successive years, and it was never better than now. In fact my meadows under the right treatment grow sixteen successive years, and it was never better than now. In fact my meadows under the right treatment grow better as they grow older. I do it by returning to a meadow all the manure the hay made that was taken from it, and sowing a bushel of gypsum per acreech, year. In that way the yield of grass is heavier and finer and richer as the sod thickens. I use manure only for top-dressing the meadows; in that that way I get double price for it. It produces as much worth of grass as it would in grain, and also reproduces it self in the turf. My turf, when ready for plowing under, is a solid body of grass roots twelve inches deep or more, and so thick on the top thot no soil can be seen, I consider one such turf, when turned under, equal to 160 tuns of first-class barn-yard manure per acre.

Land so often plowed for grain gives up to the grain all the bone, beef, tallow there is in it consequently the grass crop is so destitute of nutriment that farm stock will not thrive well upon it, without grain a portion of the season. It furnishes a plenty of skin grass crop is so destitute of nutriment that farm stock will not thrive well upon it, without grain a portion of the setson. It furnishes a plenty of skin and rib as the cattle are witnesses, but the flesh is minus. Grass grown upon land kept in the right kind of o. der for grass will keep stock in first rate order at all seasons of the year. I have seen it tried in both ways, and know where of I speak. Raising grain on a piece of ground, three seasons to two of grass, enriches it in the same ratio that paying \$3 for \$2 would enrich a man. Like produces like in grass as in breeding, consequently manure made of good hay is best for meadows. It stands to reason for meadows to grass better than when their own production is honestly returned to them. Many of our writers on agriculture have incomes from other sources beside their farm, and can follow any system of rotation and have plenty of time and leisure. But the man who begins at the foot of the hill, runs in debt for two thirds of his farm, all his stock and tools, then clears his land of stone and stumps, walls it in, enriches it and puts on the buildings, and raises a family of children, must s und all the depths of true economy; in that case he must not raise too much grain, if he does the Sheriff will sell some of it for him.

### Raising Calves on Clover.

This we have seen practiced with good effect. David A. Hawn, of Stark, New York, is in the habit of turning out his calves as soon as the clover is large enough for a good bite, and he leaves them there without anything else, except salt, what they want, and water, till the clover is in blossom and fit to cut. He then turns them out, puts them with his cows till the clover has obtained sufficient growth again, which is In a few weeks, and there he leaves them till fall, or, in case a second crop is cut, till that is fit to harvest. So he keeps his spring calves during the summer. No bother to feed with milk or aught else; they are simply left to themselves (and their feed is usually along the fence.) They go into winter in the best condition, and are fed on clover and timothy alone during the winter.

No better calves are raised than David

winter.

No better calves are raised than David
A. Hawn raises in this way, on clover
alone, save a little timothy in the winter. And the reason is obvious—clover
is rich in nitrogen, in the flesh forming

ter. And the reason is obvious—clover is rich in nitrogen, in the flesh-forming p inciple.

Mr. H keeps his cows in good condition (on hay alone, cut early,) during the winter. The calves when they come are strong. They fed some sweet milk, then sour milk, and we believe, though we are not positave, some meal. At any rate, the calves, when turned out, are in good conditon. For the first few days they fall back a little, then fetch up, and keep growing all summer. Mr. H. has now four heliers, two years old this spring, three of which have come in, and yield a good quantity of rich milk. They are large, robust and healthy, and are the result of what clover alone will do.

We think there is no way, all things considered, as good as this to keep calves during the summer, and to raise young stock. It is cheap, and the least of trouble, while the stock is unsurpassed; not fat—this is not wanted—but grown, fally developed, and healthy, and will make good future cows.—Country Genterman.

A little boy residing in a village where the small-pox was prevalent, vaccination, its merits and effects, were the theme of talk. Sunday morning Georgie started for Sunday-school. During the exercises the teacher asked him if he had ever been baptized. Small-pox and vaccination happening to be uppermost in Georgie's mind, and being rather too young to know the difference between the sound of 'baptized' and 'vaccinated,' and being ashamed to be thought ignorant, he promptly and rather pompously answered; 'Yes, sir, I have been baptized five or six times—but it never took.'

MARQUART'S CELEBRATED LINIMENT FOR MAN OR BEAST.

Diploma districted by the Camberland, County Agricultural Society, 1888.

Abraham Marquart, Esq., has shown me the receipt of which his Liniment is composed. From my knowledge of the ingredients, I do not hesitate in certifying that it will be beneficial whore an external application of the kind is indicated.

A. STEWART, M. D.

Fally Converted. Fully conversant with the chemical components and medical effects of A. Marquart's Linitent, I cheerfully recommend it to those who may need it.

S. N. ECKER, M. D. ment, I cheerining recommend.

S. N. ECKER, M. D.

Mr. A. Marquart:—Dear Sir: I take pleasure in saying that: I have used your Liniment for chapped hands, and it curred them and made them lee! soft. I think it the best I have ever used, and would cheerfully recommend it to the general public.

WM. GRACY.

Newton township, Pa., Nov. 24, 1868.

I hereby certify that I have used A. Marquart's Liniment for Scratches and Spavin on two of my horses with the greatest success, and would recommed it to all who are in need of anything of the kind. C MELLINGER, county Treas'r. Stoughstown, Nov. 18, 1868.

Mr. A. Marquart:—Dear Sir: I have used abou half a bottle of your Linlment on my horse for a bad Collar Gall, which was the most obstinate sore of the kind I over saw; also on my arm for Rheumatism, and it has given entire satisfaction in both cases. I would not do withot it for ten times its cost, and cheerfully recommend it to the public.

MICHAEL LATSHAW.

Jacksonville, Pa., Nov. 20, 1888.

A. Marquart. Esc.: Dear Cir. A. Marquart, Esq.:—Dear Sir. I had a very severe attack of Rheumatism in my back, so that I could scarcely walk, which was very painful. After using hair a bottle of your celebrated Liniment, I was entirely cured. This is not a recommendation, but the plain truth. You can make any use of this you please.

JACOB LONG.

Walnut Bottom, Pa., Nov. 29, 1888.

Waltat Detcoll, Fa., Nov. 29, 2005.

Mr. A. Marquart:—Pear Sir: I hrve used your valuable Liniment in my family for different pains and aches, and it has proved satisfactory in every case. I do think, as an external Liniment, it stands without a rival. I would cheerfully recommend it to the public.

Respectfully,

GEORGE W. YOUM.

Jacksonville, Pa., Nov. 21, 1888. A. Marquart, Esq.—Dear Sir. It affords me pleasure to certify that I have used your Liniment on my neck, in a case of very Sore Throat, which was much swollen and very painful. After two or three applications, I found it to act like magic, and would recommend it as an excellent Liniment. JACOB SEVERS.

Walnut Bottom, Pa., Nov. 19, 1863

Ayer's Hair Vigor,

or restoring Gray Hair to natural Vitality and Color. A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored hair is soon restored to its original color

with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair om turning gray or falling off, and insequently prevent baldness. Free in those deleterious substances which ke some preparations dangerous and prious to the hair, the Vigor can benefit but not harm it. If wanted

rely for a HAIR DRESSING, othing else can be found so desirable.

ong on the hair, giving it a rich glossy lustre and a grateful perfume. Prepared by Dr. J. C. Ayer & Co., PRACTICAL AND ANALYTICAL CHEMISTS. LOWELL, MASS.
