Eds. Rural American:—For several years I have practised giving sheep, cattle and horses sait, made fine, mixed with sifted hard wood ashes, equal parts; a teaspoonful to a cow once a day, or a larger quantity once or twice a week, and corresponding quantities to smaller animals and sheep.

Where old-fashioned chimney soot can be had, the effect is still better; then put equal parts salt, ashes and soot together. The severe winter weather of these northern regions operate on both man and beast, and some tonic is usual. gether. The severe winter weather of these northern regions operate on both man and beast, and some tonic is usually necessary in the spring to settle the system right. But I believe that if the above named articles were used for stock during the winter, condition powders would be less necessary. When I did not use this composition there was a strong urinal smell in the sheep pen and cow stable. Soot itself is a powerful antibillious agent, and a sure remedy if used as a preventive. Several years ago I had an ox, one of whose eyes run continually. In the Several years ago I had an bx, one of whose eyes run continually. In the winter it formed an icicle on his face, eight or nine inches long and nearly two in diameter. The icicle and running gradually disappeared, and in a few days nothing was to be seen, and it did not appear again. I give all my tock corn meal during the winter, withing the whose and sait into it when

putting the ashes and sait into it when given. I do not sell off my grain as some do, to enrich their pockets while it impoverishes the flesh of their and readers them more lightly to in impoverises the flesh of their animals, and renders them more liable to disease and death, and less able to bear their young. I also provide pens for sincep, and stables for cattle and horses, young and old with door between young and old, with doors between, so that they can do as they please withou I do not believe that a man can do justice to himself, his stock, or his God. justice to nimself, his stock, or his God, who will feed nothing butstraw, stalks, or even hay, and let them be exposed at night to the merciless blasts of old Boreas or be pinched in the fingers of "Jack Frost." S. B. R.

AMOUNT OF STRAW AND COARSE FODDER WASTED.—If we take the amount of grain and Indian corn raised in the United States, as by the census of 1860, we shall find, by allowing forty bushels of grain to the ton-of straw or corn fodder, that there were about 30,000,000 of tons. Now, at least one-third of this is wasted for overy purpose except manure, and vast quantities not even used for that Suppose we estieven used for that. Suppose we estimate this at one half the value put upon it by Mr. Mechl, or five dollars per ton, we have the enormous sum of \$50,-000,000 wasted, for want of proper economy, in a single year. We believe this estimate much below the real loss. These acts are worthy of a thorough examination by the farmers of the whole country. Let them study their own in-terests. Many of them with see where they have thrown away enough in ten years to double their property. Let them educate their sons for their calling. Impress upon their minus end all the proof a thorough knowledge of all the pro-Impress upon their minds the necessit cesses of nature connected with the growth of plants, and their uses in sustaining the animal economy. Impress them with a sense of the importance of their occupation and of its true eleva-tion in the scale of human affairs.— Teach them that no occupation or profession in life requires more accurate or thorough knowledge. Teach them that no occupation brings honor to the inno occupation brings honor to the in-dividual, but the individual to the occupation. Above all, teach them to shut their eyes to nothing, to examine all things, and to select that which is good.

SAVE THE SUDS .- The Massachusetts SAVE THE SUDS.—The Massachusetts Ploughman, in an article on "scap suds" says, that the value of this article as a stimulant of vegetable life cannot be too highly appreciated. It contains, it says, the aliment of plants in it state of ready solution, and when applied, acts not only with immediate and obvious effect, but with a sustained energy which pertains to few even of the most concentrated manures. When it is not convenient to apply it in irrigation the most seep. ted manures. When it is not convenient to apply it in irrigation, the most economical method, perhaps, of using it—the article goes on to say—it should be absorbed by some materials which may be used as an ingredient in the compost heap. Sods, muck and other similar articles should be deposited where the suds from the sink and laundry may find their way to them, and be absorbed for the benefit of the crops. In this way several loads of manure, very suitable for the support and sustenance of ble for the support and sustenance of any crop, may be made at comparative-ly small expense. The highly pures-cent character of this fermentable liquid cent character of this fermentable liquid qualifies it admirably for the irrigation of compost heaps, of whatever material composed. Bing a potent fertilizer, it must of necessity impart additional richness to almost any material to which it may be added. The article concludes with an appeal to all farmers and gardeners to "try, and mark the gesult."—Ex.

BUSHEIS PER ACRE.—It is to be hoped that no one will be taken in by the way many of those who have potatoes, oats, or anything else to sell, which they assert will produce enormously per acre. We all know the history of the Harrison, Goodrich's Seedling and the Early Rose potatoes, by which so many farmers have been deceived. First so many eyes are estimated to a potato, planted separately it will take so many potatoes to plant an acre; but instead of planting an acre a few rods are planted in a garden or some other carefully selected and prepared ground; the product of these rods is multiplied into an acre, and the result is placarded as so many bushels per acre!

The same thing is done with cats, with

wheat, with corn, and even roots, and in this unfair way the public is misled. Our sensible correspondent "J.," of Central New York, thinks we are in error in doubting that as many as eighty bushels of oats have been raised per acre, but he offers no proof to that effect. On the contrary his own experiments would go to prove what we say. What we do mand to know is for any farmer who has raised a small plot of five acres of any kind of oats in the United States to show, by such proof as would sub-stantiate any legal averment, that he obtained four hundred bushels from the field. This is what we want, and noth-

DRY WALKS FOR WINTER.—We should be remiss in our duty were we to neglect, at this season of the year, to repeat our counsel as to the great comfort and convenience which dry walks insure about dwellings, barns and outhouses generally, in winter and early spring. We are pained sometimes to see the utter negligence prevailing upon some premises in this respect. A fewold boards, or a dollar's worth or two of new boards, nice flatstones, or a liberal supply of coal ashes, would save ten times the cost in shoe leather, damp fee t, colds, doctor's bills and loss of time. Coal ashes laid on dry ground to the Coal ashes laid on dry ground to the depth of three or four inches after removing the mud, make a first-rate walk, and they can be put to no better use. The difference to be seen upon a premises where dry walks are provided wherever needed, when compared to others where this moral influence has ded wherever needed, when compared to others where this moral influence has no abiding place, is enough to make us shiver as well as to cause us to feet for the absence of social charities in the family. A Christian man exhibits the effects of the religion he professes in everything, and in nothing more than his domestic relations.—Germantown Telegraph.

IMPROVEMENTS BY CLOVER.—A southern paper mentions the case of an eighty acre farm, that had become so exhausted as to yield but four or five bushels of wheat per acre, but by the use of clover as a green crop had been made to produce this year from 20 to 25 bushels of wheat per acre.

Medical.

Dr. WM. D. HALL, and Drs. MARY B. HALL, Homeopathic Physicians and cellical Electritions. Office and residence No. 37 South Hanover street, Carlisie Pa. All acute South manover street, Carlisie Pa. All acut d chronic diseases skillfully treated. Specia, intion will be given to the cure of all chronic cases as Scrottila, Cancer, Bronchilly, Epi-sey, Dyspepia, Tettor, Liver Complaints, Epi-tus Dance, Goltre, Paralysis, Neuralgia and neral Debility. al Debility. les suffering from Prolapsus Uteri, Leucor-Amenorrhea, Dysmenorrhes, Norvous

General Dentity.

Ladies suffering from Prolapsus Uterl, Leucorrhea, Amenorrhea, Dysmenorrhea, Nervous Affections, and any Trin of Uter ne Complaints can be speedily cured. The above diseases have the speedily cured the above diseases have the original by solutions excesses, sectority habits, and the use of powerful medicines. For males suffering from any chronic affection, are especially invited to call and examine Drs. Hall's superist method of treating diseases.

Health we consider to be an equilibrium of the electric condition of the hum. nystem, and the more perfect he equilibrium, the more perfect the health. Disease, on the contrary, is elther a plus or minus of the whole, or a portion—inaking one part plus and the other minus, and thereby causing obstrution and stagnation of the vital field. Electricity in the natural element of the Nervous System, the connecting link between mind and matter, and the most subtle sub-tunce known. It checks the blood; is the cause of the contraction of the vital stage of the chemical changes in the system—the decomposition and recomposition—and always coperates with vitality in imparting health and strongth to the human system. If Electricity is the generating agent of animal life, how important then it must be in the continuance of that life, as also in the preservation of health. We would here state, for the benefit of those uncanning the stages.

inte, as also in the preservation of health. We would here state, for the benefit of those unacquainted with the subject, that the application of Electric-Magnetism Galvanism and Electricity as a therapeutic agent for all discuss, is a fact well established by many years' practice.

Great evil, as well as good, has resulted from the reckless and indiscriminate use of Electricity. 't has been applied by the learned and unlearned—hap-inzard, without any assurance of accomplishing the desired object; and when successful, was hooked upon as the result of great lack, rather than the effect of an immutable of the control of the contro

dered Functions, and Imparts a vigorous tone to the body.

This discovery is the result of many years hard and scientific investigations. Its great superiority over all other systems for the cure of discares has been practically tested in different parts of the country. Thousands of invalids have been treated, suitering from almost every form and condition of disease common to all sections of our country who, after tree timent by the most eminent medical men, had been given up as incurrable; and in nearl every case a cure had been effected.

Our offices are strictly private consultations free, patients in the country visited at any hour of the day or night. NO. 88 EAST POMFRIT STREET, CARLISLE, PA.

RHINESMITH & RUPP, Nos. 62, 61, 63 North Hanover St., fovember 11, 1869. Carlule, Penna. CTOVES, TINWARE, &c. JAMES McGONEGAL, would respectfully invite the attention of the public to his large stock of STOVES TIN & SHEET-INON WARE, &c He has made it an object in selecting the m st desirable, economical and durable Stoves in the market. His Cooking Stoves consist of the

NIMROD,
NIAGARA,
QUAKER CITY,
IRONSIDES,
FARMER, and others, which he guarantees to give satisfa-tion in every respect. His PARLOR AND OFFICE STOVES, e unsurpassed for beauty of design, durability ad economy of fuel. He also offers to the pube the justly celebrated EMPIRE GAS BURNER. le would call attention to a few of its merits.

I. It has no brick to be replaced once or twice. year. 2. Heating downwards, its rays of heat are fixed to the floor, heating the feet instead of ne face.

3. The burning of the gas by a second supply if fresh air is complete. The device is not found nother Stoves, consequently the air is a liways

pure.
4 It is a perpetual burner.
5. It makes no klinkers.
•. Is perfectfully clear from dust, the arangement is covered by putent and is perfect in its operation.
7. Its ventiletion is complete, and in every respect is a first class Stove and waranted to give satisfaction. Numbers of reference can be used in the nato the ments of this stove, but he would ask those who wish to get a desirable stove to call at his shop and see it in operation.

He offers among other Parior, Duning Room, and Chamber toves, the "BEACON LIGHT,"

a beautiful, economical and powerful heati Stove, patented 1869; also PARLOR HEATER for heating two or more Rooms, Portable Fu TIN AND SHEET IRON WARE constantly on band. SPOUTING, ROOFING, and JUBBING made to order of best material, and at reasonable prices.
