Agricultural.

BEET SUGAR.

After several years trial and experimenting in Iroquos county, Illinois, the first enterprise involving considerable capital, of making sugar from the beet, has failed to succeed. Fine sugar has been made and sold, but the outlay and expenses have been such, that it has failed to pay, and where first started will probably be abandoned. So far as we can learn from those who have been at Chatsworth, the soil was most unsuitable for beet culture, being very adhesive and tenacious, and containing an excess of nitrates, as is the case with many prairie soils.

It seems to us at this distance, and viewing the matter from a farmer's standpoint, that more attention was paid to procuring the machinery and importing from Europe labor skilled in the manufacture of beet sugar, than to an examination of the agricultural capacities of the soil and its suitableness for root culture. As good healthy sugar beets are the great preliminary for making *beet sugar*, this should have been the first point to be secured, and probably requires more *practical* than *theoretical* knowledge. We think that sugar from beets may become one of our great staples, but the proper soil and climate in our widely extended territory may yet have to be discovered.

There was every reason to expect that a fair trial of beet culture, with a view to sugar, would have been made the past season by Col. Patterson, of Philadelphia, at his farm near Waterford, on the C. & A. Railroad; but from causes which may not occur again, the crop of beets was a failure.

We observe, in California very successful experiments have been made. The right place or places will certainly be discovered. We quote the following from one of our exchanges, as giving some ensight into the process of manufacture:

"The beets are first washed in the revolving cylinder of wood, which is placed in a tank through which flows a stream of water. They pass into a grater, and are reduced to a soft pulp, then to the centrifugal where the juice is separated, not by pressure, but by centrifugal motion. Lime water is now added, turning the juice black as ink; it is then supersaturated with carbonic acid gas heat to 180°, and then passed into the saturating pans, where it is treated with muriatic acid, and again heated to 280°. It is then forced through the filter presses, and divested of earthly matter, woody fiber, and the lime. It is now called thin juice. It is next pumped into the open evaporating pans, and reduced to *thick* juice by steam coils. We next find it in large vats of animal charcoal or bone black. It is filtered from this, and comes forth clear, and is now ready for the first vacuum pan, and is boiled in *cacuo* at a temperature of 170 degrees, some 40 degrees below the boiling point in the open air. From here it goes into a similar pan, called the finishing boiler, and is reduced to sugar. It is then in the form of mush sugar, and is run into coolers of two hundred pounds, to complete the crystalization. It is then in the form of mush sugar, and is run into coolers of two hundred pounds, to complete the crystalization. It is then put into the centrifugal and separated from the molasses. The machine revolves sixteen hundred times a minute. To complete the process, a small quantity of water is dripped on the sugar when in motion to wash out of the last particles of molasses. The molasses has a strong affinity for the nitrates, and also holds that peculiar beet root odor, thus leaving the sugar in pure clear crystals, without any smell or offensive taste. It is then dried on tables, and is packed in barrels for market."—*Practical Farmer.*

FAULTS IN BUILDING.—The *American Builder* enumerates these faults in planning and erecting houses.

1st. Cramping a house down to the smallest possible space, so as to make more "yard room," which will never be used.

2d. Making no calculations as to the size of rooms or the location or furniture.

3d. Building chimneys by guess, so that one has to have a dozen lengths of useless stove-pipe, or else place his stove in the most inconvenient locations.

4th. Arranging windows and doors so that one opens against the other, or in the very spot to be occupied by a piece of furniture, or so placing them that no fresh air can get through the house, even though the whole should be open.

5th. Providing no means of ventilating rooms save by open doors or windows: hence all the impure air which is generated by breathing, cooking and fermentation, as it is rarified, rises to the top of the room, and there remains to breed discomfort, disease and death.

6th. Nailing sheathing to the outside of the studding and clapboards (or siding) close to the outside of that, leaving small or no air-chambers between them, and, as in nine cases out of ten, green materials are used for each covering have been used, they shrink and rot, soon making a honeycomb of the shell, though plastered with paint and cement.

7th. Laying the floors directly on joists, or at best, laying it with culls full of knots and shakes, which are but little better than nothing, and, as a consequence the floor is always cold and uncomfortable.

8th. In finishing, first lay the bases, pilasters and casings, (perhaps of green lumber,) and then lathing and plastering up to them, so that when they dry large orifices are left to let in cold and moisture.

9th. Letting his work out, as a whole, trusting to the honesty of the contractor to do it, without any plans or specifications properly drawn, and without any one to oversee or criticise, or direct it.

TO CLEAN PAINT.—There is a very simple method to clean paint that has become dirty, and if our housewives would adopt it, it would save them a great deal of trouble. Provide a plate with some whiting and have ready some clear warm water and a sponge and squeeze nearly dry; then take as much whiting as will adhere to it, apply it to the paint surface, when a little rubbing will instantly remove any dirt or grease. After which wash the part well with clean water, rubbing it dry with soft chamois. Paint thus cleaned looks as well as when first laid on, without any injury to the most delicate colors. It is far better than using soap, and does not require more than half the time and labor.

NOVEL HITCHING POST.—The Icelanders have a curious custom, and a most effectual one, of preventing horses from straying. Two gentlemen, for instance, are riding together without attendants, and wishing to alight for the purpose of visiting some object at a distance from the road, they tie the tail of one horse to the head of the other, and the head of this to the tail of the former. In this state it is utterly impossible that they can move either backward or forward, one pulling one way and the other the reverse; and therefore, if disposed to move at all, it will be only in a circle, and even then there must be agreement to have their heads in the same direction.

GRAHAM BREAD.—Three pints of warm water, one cup of Indian meal, one of wheat flour, three tablespoons of molasses, or one cup of brown sugar, one teaspoonful of salt, one of soda dissolved in a little hot water, one cup of yeast. Mix the above, and stir in enough unbolted wheat flour (Graham) to make as stiff as you can; work with a spoon. If you wish to make it into loaves, put in enough to mould it. If made with home-brewed yeast, put to rise over night. If with brewer's yeast, make it in the morning, and bake when light in loaves the ordinary size. Bake one hour and a half.

ROSADALIS

THE GREAT AMERICAN HEALTH RESTORER, purifies the blood and cures Scrofula, Syphilis, Skin Diseases, Rheumatism, Diseases of Women, and all Chronic Affections of the Blood, Liver and Kidneys. Recommended by the Medical Faculty and many thousands of our best citizens.

Read the testimony of Physicians and patients who have used Rosadalis; send for our Rosadalis Guide to Health Book, or Almanac for this year, which we publish for gratuitous distribution, it will give you much valuable information.

Dr. R. W. Carr, of Baltimore, says:
I take pleasure in recommending your ROSADALIS as a very powerful alterative. I have seen it used in two cases with happy results—one in a case of secondary syphilis, in which the patient pronounced himself cured after having taken five bottles of your medicine. The other is a case of scrofula of long standing, which is rapidly improving under its use, and the indications are that the patient will soon recover. I have carefully examined the formula by which your Rosadalis is made, and find it an excellent compound of alterative ingredients.

Dr. Sparks, of Nicholasville, Ky., says he has used Rosadalis in cases of Scrofula and Secondary Syphilis with *satisfactory* results as a cleaner of the Blood I know no better remedy.

Samuel G. McFadden, Murfreesboro', Tenn., says:
I have used seven bottles of Rosadalis, and am entirely cured of Rheumatism; send me four bottles, as I wish it for my brother, who has scrofulous sore eyes.

Benjamin Bechtol, of Lima, Ohio, writes, I have suffered for twenty years with an inveterate eruption over my whole body; a short time since I purchased a bottle of Rosadalis and it effected a perfect cure.

Rosadalis is sold by all druggists.
Laboratory, 61 Exchange Place, Baltimore. CLEMENTS & CO.

THE BONDS

OF THE

Chicago, Danville & Vincennes,

RAILROAD CO.

UPON EXAMINATION
WILL BE FOUND TO BE THE BEST
AND THE
Cheapest Yet Offered to The Public.

THIS WILL BE BORNE OUT BY

The rich country [illegible] connected with the road, and the capital stock.
The excellence of the 65 miles already built, and its equipment.
The plans completed, and the money expended, for vigorous finishing of the line in the spring.
The excessive earnings to accrue from the completion of the whole line.
The ample sinking fund for the certain redemption of the bonds.
The very liberal interest running over a term of 40 years.
The security afforded by registry.
The mortgage covering the entire road, equipment, franchises, and all property, present and future—and the security of twice the amount of bonds issued.
The low currency price they are now offered at.

All this is verified in detail in the complete pamphlet, which can be had of us.

We know these bonds to be good, and we know the character and capacity of the company's estimates can be implicitly relied upon to give these bonds the highest standard. We therefore freely and fully recommend them.

Hair Renewer.

Ayer's

Hair Vigor,

Restoring Gray Hair to
Natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of coating the hair with a pasty sediment it will keep it clean and vigorous. Occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which enter some preparations dangerous and even fatal to the hair, the Vigor can do it no harm but not harm it. If wanted for use as a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy hue and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co.,
PRACTICAL AND ANALYTICAL CHEMISTS,
LOWELL, MASS.
PRICE $1.00.

For Sale by HAVERSTICK & BRO'S., Agents, Carlisle, Pa.

Medical.

DR. WM. D. HALL, and Drs. MARY S. HALL, Homœopathic Physicians and Medical Electritions. Office and residence No. 37 South Hanover street, Carlisle Pa. All acute and chronic diseases skillfully treated. Special attention will be given to the cure of all chronic diseases as Scrofula, Cancer, Bronchitis, Epilepsy, Dyspepsia, Tetter, Liver Complaints, St. Vitus' Dance, Goitre, Paralysis, Neuralgia and General Debility.

Ladies suffering from Prolapsus Uteri, Leucorrhea, Amenorrhœa, Dysmenorrhœa, Nervous Affections, and any form of Uterine Complaints can be speedily cured. The above diseases have their origin in loss of the vital power of the body, brought on by injurious excesses, sedentary habits, and the use of powerful medicines. Females suffering from any chronic affection, are especially invited to call and examine Drs. Hall's superior method of treating diseases.

Health we consider to be an equilibrium of the electric condition of the human system, and the more perfect the equilibrium, the more perfect the health. Disease, on the contrary, is either a *plus* or *minus* of the whole, or a portion—making one part *plus* and the other *minus*, and thereby causing obstruction and stagnation of the vital fluid. Electricity is the natural element of the Nervous System, the connecting link between mind and matter, and the most subtle substance known. It circulates the blood; is the cause of voluntary and involuntary motion; produces all the chemical changes in the system—the decomposition and recomposition—and always cooperates with vitality in imparting health and strength to the human system. If electricity is the generating agent of animal life, how important then it must be in the continuance of that life, as also in the preservation of health. We would here state, for the benefit of those unacquainted with the subject, that the application of Electro-Magnetism Galvanism and Electricity as a therapeutic agent for all diseases, is a fact well established by many years' practice.

Great evil, as well as good, has resulted from the reckless and indiscriminate use of Electricity. It has been applied by the learned and unlearned—hap-hazard, without any assurance of accomplishing the desired object; and when successful, was looked upon as the result of *good luck*, rather than the effect of an Immutable Law. When its operations are thoroughly understood, the case properly judged, and the application scientifically made, there can be no uncertainty or doubt about the result. It soothes nervous Irritation, equalizes the Circulation, restores a healthy balance to the Disordered Functions, and imparts a vigorous tone to the body.

This discovery is the result of many years hard and scientific investigations. Its great superiority over all other systems for the cure of diseases has been practically tested in different parts of the country. Thousands of invalids have been treated, suffering from almost every form and condition of disease common to all sections of our country, who, after treatment by the most eminent medical men, had been given up as incurable; and in nearly every case a cure had been effected.

Our offices are strictly private—consultations free, patients in the country visited at any hour of the day or night.
Dec. 23, 1869—6m.

Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders which were aggravated by the scrofulous contamination until they were painfully agitating, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this *Sarsaparilla* is advisable, even when no active symptoms of disease appear. Persons afflicted with the following complaints generally find immediate relief, and, in time, cure, by the use of this *SARSAPARILLA: Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears*, and other eruptions or visible forms of *Scrofula* or *Erysipelas*. Also in the more concealed forms, as *Dyspepsia, Liver Complaint, Heart Disease, Fits, Epilepsy, Neuralgia*, and the various *Uterous* affections of the muscular and nervous system.

Syphilis or *Venereal* and *Mercurial Diseases* are cured by it, though a long time is required for subduing these subtle maladies by any medicine. But long continued use of this medicine will cure the complaint. *Leucorrhœa* or *Whites, Uterine Ulcerations*, and *Female Diseases*, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. *Rheumatism* and *Gout*, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also *Liver Complaint, Torpidity, Congestion* or *Inflammation* of the *Liver*, and *Jaundice*, when arising, as they often do, from the gambling noisome in the stores for the strength and vigor of the system. Those who are *Languid* and *Listless, Despondent, Sleepless*, and troubled with *Nervous Apprehensions* or *Fearsome*, or any of the affections symptomatic of *Weakness*, will find immediate relief and convincing evidence of its restorative power upon trial.
