PRESIDENT HEPBURN.—We are pleased o notice that Prof. Andrew D. Hepburn, of Miami University, Oxford, Ohio, has recently been elected President of that Institution. Prof. Hepburn is the oldest confor Hon. Samuel Hepburn, of this and for some years has taken a position among the ripest scholars and The Presidency of an Instution such as Miama University is a distinguished years; but the future career of the college under his admirable management will doubtless soon convince the Board of Trustees that they have the right man in the right place.

MINAMAR RAILROAD EXTENSION The citizens of Waynesboro and vicinity are making ap effort to secure an extension of the proposed Miramar railroad to that place. The Record of last week informs us that "the committee on the proposed Miramar rallroad extension have not yet been able to make a full reportabut we understand the prospects for the road are most encouraging. If the amount of stock required is subscribed the question of the road will be settled, and that speedily. Complete guaranties are offered that the grading will be furnisted in four months, and the coucommittee expect to obtain these written guarantees in the course of a week, secured by ample bonds, and then vigorous action should be had to get up the stock subscriptions at once. The great advan tages offered by this road, in opening up immense resources of this region, and the communication with the coal and lumber regions, as well as the general avenues of trade and travel, are beyond calculation. It therefore behooves opportunity to slip through our fingers." SUDDEN DEATH .- Mr. Henry Snyder, of North Middle ton township, who had

announced himself as a candidate for County Commissioner, died at his sidence on Sunday night last. He had been in Carlisle on the Friday previous in his usual health, but took suddenly ill on his return home, and died, as we have said, on Sunday night. Mr. S. was an estimable man, who had the friendship of a large circle of acquaintances. He was in the 70th year of his A LIVING CURIOSITY. - The Perry Freeman says: "Mr. William M'Kee, of this borough, has in his possession a living calf with two caudal appendages. The extra or additional tail, which is a to show the watch, which he did. They far simile of the natural, is attached to

head and shoulders, about six inches in length, and from its general appearance or mode of connection, may prove an or-nament of long duration. All classes ie of connection, may prove an orand conditions of mankind should see this fere curiosity, as it is of itself, not only an object of beauty and attraction, but dearly demonstrates the philosophy of 'inore crnamental than useful,' and handsomely burlesques the grace, ease. comfort and utility of many of the fashions of the present day."

A WELL MANAGED RAILWAY.—The Harrisburg street railway is an instituof the kind we have ever seen in this country. Not long since we took the on the ground that taxes on the dealer cars at the depot, and were over half an made them necessary. Most of the hour getting out to the ball field; and taxes have been taken off but we have we see by the Patriot that the condition of the road is getting no better rapidly.

These warm days the windbroken mules give out entirely. On the day we speak of we changed mules two or three times, and cars once. The following from the Patriot, is a little too good to

A gentleman informs us that last week a passenger handed the conductor of a street car a dollar note for his passage; not having the necessary change.
This was a stunner to the receiver of fare, and he soon stopped the car and was hobbling around various places to have the greenback changed. After a have the greenback changed. After a run of five or ten minutes he returned in triumph, and being asked by the passenger whether the company did not furnish him with small change he an awared: "Yes; they give me twenty-five cents in the morning, but that isn't beautiful to change a dollar."

NEW TELEGRAPH.—A telegraph line as been erected between this place and Mt. Holly, and within a week or so will be completed to Pine Grove iron works. The line between this place and Holly has been put up by the Mt. Holly Paper Company, and that between Holly and Pine Grove by the South Mountain Iron Company. The work was done under the superintendence of Mr. John Campbell, telegraph agent at this place, and will doubtless prove a great convenience to the companies d, as well as the people in that vicinity.

Novelty.—The work of raising the trusses to support the roof of the new Presbyterian Church, has occasioned considerable interest among those of cople who haven't anything els to do. These heavy timbers are raised into position by an immense derrick ersetted by some ship carpenters from Philadelphia, and the operation is a cided novelty in this latitude.

A FRIGHTFUL SNAKE STORY .- The oh for snake " yarns" is at its zenith the bave one to contribute; but, unany others, the truth of ours i aned for by a reliable gentleman. day last week, at the house of

y named Ulrich, near Middle Spring, ake made its app earance. It seem Mrs. Ulrich left her little child play the floor while she went up stairs id some domestic duties. After re ing there for some time she heard percries of laughter coming from the dand she retraced her steps to see the Im agine her horror when looking room she saw a huge black snake d around the child's body and enad around its neck, all the while the one laughing until the tears rolled down its cheeks. Struck with fear her please of the same alarmed her husband working near by, who came in and evidently saved the child's life by drawing if from the folds of the snake, whilst Mrs.

That no justice of the peace, clergy man. Li loosed it with a hoe, and they were thus was delighted with its strange companion

and seemed regretful that it should be so murderously dealt with. - Valley Sentinel. More New Candidates .- We pubfor Senator; and Harry Manning, without and Alf. H. Addams, of the person performing the marriage ceremony, shall, at the time of joining them in marriage, knowingly or wilfully perform such marriage ceremony in disregard of the provisions of the first section of the act aforesaid. ng for County Surveyor.

How to KEEP Cool.-In these hot days a cool apartment is a real luxury to be had far oftener than most people suppose possible. The secret consists, not in letting in cool air, for naturally all do that whenever they have the chance; but in keeping out the hot air. If the air outside a room or house be cooler than the air inside, let it in by all means; but if it be hotter, carefully

keep it out. A stair-case window left open during the night will often cool the passages of a house, and the rooms, too, if the doors be not shut; but it must be closed at eight or nine o'clock in the morning, honor to confer on one of Prof. Hepburn's or, if on the sunny side, at four or five o'clock, and the blind drawn down. -The mistake people generally make is to throw open their windows at all rs of the day, no matter whether the here outside be cool or scorching.

Let us have some air they say, and in comes the treacherous breeze—for even hot air is pleasant while it is blowing, taking away perspiration, and thereby cooling the skin; but the apartment is made warmer, instead of cooler, and as soon as they move out of the draught they find their room to be more uncomfortable that before.

Let in cool air-keep out hot-that is the only formula to insure the minimum of discomfort. Sitting rooms may generally be kept cool during the whole day if the doors be only opened for ingress and egress, and the windows kept closed and shielded from direct sunshine by a blind. If the atmosphere of a room be impure from any cause, let it be renewed; hot air is less injurious than bad air. If a room he small in comparison with the number of persons engaged in it, free ventilation becomes

In cooking apartments the temperature will probably be higher than outside; hence the free admission even of us to wake up and not allow this golden hot air will be desirable. If persons do not object to sit in a direct draught of air, windows and doors may be opened, a breeze being more refreshing, even though several degrees warmer than still air; but, under nearly all other circumstances, rooms should be kept closed as much as possible until after sundown, or till the air outside is cooler than inside. Let in cool air; keep

Robbery. On Tuesday, while John Culberison was en route to the "Row," and near Clark Johnston's, he was accos ted on the road by two colored persons, who inquired of him the time of day.-He replied that he had no watch with him. They, however, said they knew better, and with threats compelled him forcibly took it from him and then left the top of the neck, mid way between the Mr. C. thinks the villians were white men in disguise, and would be able to recognize them if seen again. As sevbeing concerned in this highway theft. we think the better way for them to do would be to return the property, than o serve a term in the penitentiary.-Shippensburg News.

THE COST OF LIVING.—The cost of living is kept up by the high prices which are demanded for nearly every article, whether scarce or not. These originally carried up by the war. High rates were then charged, and justified our citizens, that was raised 20 per cent. during the war on the ground that it was taxed to that amount. The tax was long since taken off, but the 20 per cent. advance remains.

BITTEN BY A HORSE.-On Saturday morning last, a lady named Margaret Gill, living at Mr. John Thompson's, in Southampton township, Franklin county, was severely bitten on the cheek by horse, and an exceedingly painful wound was produced. 'The horse bit downwards, through her bonnet, and some of the pasteboard of the bonnet remained in the wound. She was at the time engaged in greasing a sore shoulder of the horse. Her face was very much swollen and a wound caused which may remain annoying for some time to come.—Shippensburg Sentinel.

CONTRASTING COLORS.—A very little knowledge of the harmony and contrast of colors is essential to one who wishes to dress with good taste. Red harmonizes with orange, orange with vellow. violet with red, and green with blue. Green contrasts with red, sky blue with orange, yellow with violet, blue with orange-red, indigo with orange-yellow, and violet with bluish green. In arranging a boquet, place a blue next to an orange flower, a yellow near a violet, and a red or white should have better with red or pink.

TIMELY HINTS -As the hot season is fairly upon us, the following directions for the treatment of sunstroke cases will be found valuable:

1st. Apply ice or ice-cold water to the top of the head, and if the burning is felt at the base of the skull, apply cold water, taking great care not to wet the

back.

2d. Give to drink hot (if possible)
cayenne pepper, or ginger stirred into
water, as strong as the patient can take
it. Fluid "essence of Jamaica ginger" is excellent for this purpose as a pre ventive. 8d. Quickly wrap the body in a blan

sd. Quickly wrap the body in a blanket or other warm covering, for life depends on restoring the natural circulation and stimulating free perspiration.

4th. Do not allow the sun's rays to touch the patient's head for at least twenty-four hours. .

A RIGHTEOUS LAW .- The last Legislature passed and the Governor signed the following Act "relating to Clandes tine Marriages," viz:

SECT. 1. Be it enacted by the Sens minister, or other person who shall take upon himself to perform the marriage ceremony, shall be liable for the penalty for joining in marriage persons under the age of twenty-one years, as provid-ed in the second section of an act, en-titled "An Act to prevent clandestine marriages," approved February 14th, Anno Domini one thousand seven hunthe names of four new cadidates dred and twenty-nine, unless such jus day, viz-James M'Culloch, of New- tice of the peace, clergyman, minister,

THE annual cry about mad dogs is again aking possession of the newspapers.-Whather on authentic case of hydropho bia ever occurred in this country is much loubted. However this may be, it is very ertain that dogs are no more liable to the diseases which frighten people into the idea that they have an attack of by drophobia in cold than in warm weather In fact, in hot countries the disease i scarcely known. If a dog becomes sick for any reason, and especially in warm weather, he is very likely to froth at the month, for this is his only means of perspiration-in other words, that which passes through the pores of the skin of man beings and of most animals, can only pass from the dog through his mouth. This induces frothing, which is oo often at once taken as evidence of hydrophobia by many nervous people,

suspect that more real good would be accomplished if such authorities were muzzled instead of the dogs.

There is much more danger from cats, in this regard, than from dogs-a hundred to one. It would seem to be the part of prudence, to apply the muzzling practice to them instead of to the less dangerous animal.—Bloomsburg Colum

SUNSTROKE AND ITS TREATMENT .-Sunstroke and stroke of lightning, says Dr. Hall, in his standard publication The Journal of Health, as far as present light extends, cause death in the same manner; the blood is expanded and gases are liberated, both tending to distend the veins, which causes in the brain a species of apoplexy; this distension of the blood vessels induce pressure on the brain, and consequently all loss of sense and feeling: the muscles are paralyzed, all motion ceases, and the functions of the body are arrested. As a remedy be prescribes, application of cold cloths or ice page to the head, and mustard plaster to owels as soon as possible. But something more speedy than this is an imperative necessity in most cases, or death will ensue in a few moments. Skillful and eminent physicians in this country, upon actual experiment, founded upon true philosophy, have ascertained that speedy recovery takes place within an hour if the patient is bled from both arms in the old fashioned way. From the largest distended vein the blood may only flow by drops at the first second or two, but as it flows freer the relief be_ nomes almost miraculous, and speedy and complete.

LADIES. BEWARE.-Dr. Pancoast. o Philadelphia, remarked the other day, after performing a painful operation on eral persons are strongly suspicioned of an interesting little girl, whose feet were ruined by wearing wrongly constructed shoes: "This is' a beginning of a large harvest of such cases." And what else can be expected? Mothers walk the streets with heels on their boots from two and a half to three and a half inches high, and not more than an inch in diameter, and their daughters follow the same bad practice. In many cases severe sprains of the ankles are suffered. But these are not the worst fruits of the highagainst the fore part of the boot, and soon begin to assume unnatural positions. In many cases they are actually dislocated. In others the great toe passes under the foot, the tendons harden in that position, and lameness is contracted, for which there is no cure but the knife. When the injury does not take this form, it issumes other aspects almost as distress ing and horrible. There are thousands of young girls, tiptoeing it along our treets to-day, who, in a few years, will be cripples if their parents do not interfere and remove the cause.

> SEASONABLE RECOMMENDATIONS. Persons in charge of horses and mules would do well during the warm season, when the mercury keeps up among the eighties and nineties, to carefully comply with the following recommendations: The Society for the Prevention of Cruelty to Animals would call attention to the suffering of horses and mules in the streets during the present hot season, and recommend to drivers and others having animals under their care the most watchful and considerate treatment. It would recommend the wet sponge upon he head; to furnish them with a little drinking water as often as practicable, when not overheated, and at the same time to cool the mouth and face, and, as further means of refreshing the animal. to throw water upon the legs and such other parts as are liable to chafe by perspiration or otherwise; to drive slowly and lessen the load usually imposed in

cooler weather: to loosen the check rein, or better, dispense with it altogether. RAILROAD TIME MARKER .-- An instrument has recently been invented that marks "the ebb of time," showing plenty of follage around it. White how many minutes there are prior to any contrasts with blue or orange, but still event. If placed in the post office it reads: "Mails open in thirty minutes;" one minute later it reads: "in twentynine minutes," then in twenty-eight, and so on. At a railway station it reads: "This train leaves in ten minutes." then in eight, etc., and when the index reach-0, the train starts. Thus any passenger, on entering a station, knows just how much time he has for getting tickets. checks, a newspaper, and a seat, without onsulting a watch or a clock to ascertain the hour of the day.

THE duty of every head of a family tho earns by his daily toil a comfortable living for his wife and children, to take out a life policy is very plain. As long as he lives the family is provided for; but his income being temporary, provision for his companion and little ones ceases at his death. Insure at once in the North American Mutual Life Iusurance Co., of Philadelphia. Office of the Harrisburg Branch, 31 S. 3rd. St., Harrieburg, Pa .security for policy holders.

FLIES.-Those who desire to be rid of these troublesome summer pests, need only use the following simple remedy: Take half a spoonful of black pepper in powder, one teaspoonful of brown sugar, and one teaspoonful of cream : mix them well together, and place them in a room on a plate where the flies are troublesome and they will soon disappear.

CHILDREN'S SERMON .- On next Sabbath morning, at 11 o'clocks a sermon will be preached to children in the Emory M. E. Church by the pastor.

ANDREW STEPHENS, who resides near Oakville, last week had a finger amputated, by coming in contact with a mowing

SPRING ELECTIONS TO BE RESTORED .lowing act, passed at the recent ession of the Legislature, restoring the spring elections in 1872, was approved by Gov. Geary on the 28th of June :

Gov. Geary on the 28th of June:

An Act to repeal the fifteenth section of an act entitled An Act further supplemental to the act relative to the elections of this Commonwealth, approved April 17, 1893.

SEC. 1 Bc. it cnacted, &c., That the fifteenth section of an act entitled An Act further supplemental to the act relative to the elections of this commonwealth, approved April 17th, 1893, be and the same is hereby repealed, and that in the year 1871, and annually thereafter, all elections for city, ward, borough, townelections for city, ward, borough, town-ship and election officers in the different ship and election officers in the different cities and counties of this common wealth shall be on the days and at the times they were held as provided by law in the different cities, wards, boroughs and townships, in said counties, prior to the seventeenth day of April, 1869, the date of the passage of the act aforesaid.

SECS 2. That the term of the different little ward becomes the many law and elec-

hydrophobia by many nervous people, and alarm magnifies the trouble until madness is imagined.

The cruel and senseless practice of muzzling dogs, so often resorted to by municipal authorities, would drive human beings to madness if practiced upon them, but the helpless dog usually manages to bear it with equanimity. We suspect that more real good would be send until their successors are duly elected and qualified pursuant to this act; Proand qualified pursuant to this act; Pro-vided further, this act shall not apply to any elections provided for by special laws since the passage of the act of April 17th, 1869, and that the said elections in the county of Clearfield shall be held on the ast Friday in December, in each year.

WEIGHT AND MEASURE. -" A pint s a pound the world around," run the old adage; still we don't exactly see now our grocers and traders persist in adhering to the impracticable system of neasure instead of weight, in handling goods. There are so many articles that cannot be conveniently measured, and oth ers that ought not to be, that it seems singular that some agreement is not en tered into among retailers, by which the measure of value shall be determined by the unerring test of weight. It is all well enough perhaps that lumber should be rated by the measurement but it does not follow that a peck of rutabagas, only one of which can be got into a measure, should be thus valued. Nor is there any propriety in buying the neck, with something to act on the and selling eggs by the dozen or fruit by the quart. There seems to be no good reason why vegetables of various kinds should be sold by the bushel, peck or half peck, any more than tea, coffee or sugar by the quart. If eggs are sold by count, why not poultry, pigs and even beef cattle. The principle is the same, and there is comparatively as much difference in the size and weight of eggs as of fowls or animals. In some parts of the country, at the South and West, the word bushel and quart is never heard in market, but all commodities

> CAN A WOMAN KEEP A SECRET.-The Nineteenth Century, a periodical published at Charlestown, thus treats this much mooted point:

are sold by weight.

Men say women can't keep a secret -the reverse-women can, men can't. Women carry with them secrets that would kill any man. Woman nev-er tells; man always does. Woman suf-fers and dies; man blabs and lives. Man can not keep a secret; woman cannot make it known. What is sport to the man is death to the woman. Adam was a sneak. Eve would have kept the ap-ple a secret. Be ye faithful. Who ever heard a woman talk of her lovers flascos? Everybody has heard a man gossip. Men are coarse in their club room talk, women refined in their parlor conversation. Who ever heard a woman telling of her lovers? Who has not listened to the dissipation of men; men boast; women don't. Women never tell tales out men doll'. Wotten hever ten tates of school; men are always blabbing. So down with another old adage. Women can keep a seeret, and her abilily to do is proved by the conduct of a St. John (New Brunswick) girl, who did not tell er lover she was worth four millions in

EXTRAORDINARY OFFER.-The enterorising publishers of the American Stock Journal offer to send the whole twelve numbers for this year, and \$1 00 worth of books, all for the regular subscription to the Journal, which is \$1 00 a year. All our farmers and stock raisers should take advantage of this liberal offer, as the Journal is worth many times the money besides getting four valuable manuals devoted to stock raising, the price of which is 25 cts. each. Specimen copies of the Journal will be sent free to all by applying to the publishers, N. P. Boyer & Co., Parkesburg, Pa.

Locusts -It is announced that the eventeen year locusts have made their appearance in various parts of the West. and great apprehensions have been expressed that they would work serious injury upon the growing crops. There are several misapprehensions in vogue in regard to the seventeen year locusts. In the first place, the insect known by that name is not a locust at all, and is no more like the Asiatic-locust, which is so destructive to vegetation, than a humming-bird is like a flying fish. It cannot devour grain or other vegetable growths, for the excellent reason that it has no laws to devour with. It lives only two or three weeks, and during its brief life takes all the nutriment it requires, which s very little, by suction. But it often appears in great numbers, and renders a arge extent of territory alive and vocal with its murmuring, humming noise, and frequently causes the atmosphere to become very offensive by the smell arising from the accumulation of its dead. The insects have a sting, which is called the ovipositor, about half or three quarters of an inch in length, and with this they will perforate the limbs of trees, depositing eggs in the cavities thus made. The imbs chosen for this purpose are mostly young and green, and from the place of deposit to their end they usually become yellow and dry. This leads to the belief that great mischief has been done, when in fact there is very little or no harm. The seventeen year locust, so called, is not an agreeable visitor, but is comparatively a harmless one. The young fruit nurseries suffer more than anything else

THE Pennsylvania Railroad Company has commenced the erection of a bridge over the railroad and canal at their depot A. C. Bellows, Gen'l Agent. \$100,000 at Harrisburg, for the passage of vehicles leposited with the Auditor General as and pedestrians. It will be 15 feet high over the road, and five hundred and sixty feet long.

> MERCHANTS and Hotel Keepers should be particular to take out their licenses romptly. The fact of a licence having en granted is no protection to them against prosecutions for illegal traffic. unless such license has been litted and the taxes and fees thereon duly paid.

THE little girl who has a snake in her tomach now is Hattle M. Cole, daughter of John P. Cole, of Buckingham, Wayne county, Pa. She is ten years old, and has had it there for some time.

THE Lochiel Iron Works, located in Harrisburg, were sold on Thursday afternoon last, at public sale to Messrs. Lyman Gilbert & Co., for the sum of \$279,740 20.

REVENUE DECISION.-The Internal Revenue Commissioner decides that where an original deposit in a savings bank of less than \$500 is increased to over that amount by interest allowed o remain and added to the principle, the aggregate is liable to taxation, under section 100 of the act of June 30, 1864, amended.

Witn a proper and judicious system of Fish culture, waters that have been and are now comparatively useless may be made a hundred fold as profitable as any equal number of acres of land, and not with a tithe of the labor required upon the land.

MORE TALL OATS.-Mr. Samuel Hoff man, of Dickinson township, left at ou office vesterday, several stalks of oats neasuring exactly six feet. Next! TO NEBRASKA CALIFORNIA, & KANSAS AND THE B. & M. R. R. LANDS.

The "Burlington Route," so called, lies right in the path of the Star of Empire. It runs almost path of the Star of Empire. It runs almost liately in the centre of the great westward novement of emigration. Crossing Illinois and own, it strikes the Missouri river at thre These three points are the gateways into thre reat sections of the trans-Missouri region.

The Northern gate is Omaha, where the great actific road will take you to the land of gold nd grapes, sunny mountains, and perpette

immer. The middle gate is Plattsmouth, which ope pon the south half of Nebraska, south of the latte river, a region unsurpassed on the conti ent for agriculture and grazing. Just here are he B. & M. Rairroad lands, concerning which jee. S. Harris, the land officer at Burlington, own, can give you all information, and in the leart of them is Lincoln, the State Capital and,

resent terminus of the road.

The Southern gate leads to Kansas, by connections with the St. Joe and Kansas City. pest of coaches, Pullman Palace and Pullman dining cars, and should you take the journey for the journey's sake alone, you will be repaid, or take it to find a home or a farm, and you can not find either better than among the E, & M. lands, where you can buy on ten years' credit and at a low price.

Business Notices

To WHOM IT MAY CONCERN !- Take notice! As I wish to treat all my customers allke, I will hereafter give a credit of six months on all my work, or five per cent. off for Cash. All accounts payable on 1st of January and July. As counts payable on let of January and July. As my success depends upon making good work, I endeavor to get well seasoned stock and good workmen. Thankful for past favors, I beg a continuance on the same.

April 27, 1871-1y

WE call the attention of our readers to the folowing remarkable cure of Mr. C W. Ahl of Carisle, Pa., by the use of HOOFLAND'S GERMAN MEDICINES. His certificate is vouched for by the Editors of the Carlisle Volunteer, one of the nost influential newspapers in the State. DR. C.M. EVANS.

DR. C.M. EYANS.

Dear Sir: In the year 1857 I was attacked with Dyspensia. From that time until the year 1851 I continued growing worse, and was reduced from a strong and healthy man to more living skeleton, weighing but illy pounds. During those four years I had the attention of the most celebrated physicians in New York, Philadelphia and Baltimore. I also visited the watering places, and tried every remedy I could hear of for the cure of Dyspensia, without experiencing any relief whatever, and I finally in despair gave up all hope of being cured, and returned home with the feeling that death alone could alleviate my sufferings. In this extremity, at the urgent solicitation of my wife, I began the use of "HOOF LAND'S GEIMAN BITTELLS," although with no more faith in its efficacy that T had in preparations previously tried.

After using four bottles of the Bitters, to my surprise I felt I was improving. My food tasted well, and there was a very marked change for until I acaken sixteen bottles, and then, to my inexpressible gratification I found myself perfectly cared.

of any kind, and to any and two pounds.

I make this statement voluntarily, and hundreds of the residents of the Cumberland Valley who knew my condition will vouch for it. I am satisfied I was thoroughly and permanently cured by the use of HOOFLAND'S GERMAN BITTLERS, and I take especial pleasure in recommending it to all who may be suffering from Dyennesia.

ommending it to all who may be suffering now My position pecuniarily is so well known to citizens in Carlisle, and to numerous persons out of the brough, that I can may be received with making this slatest on the control of the property of the control of the wonderful cure performed in my case. I honestly believe; had it not been for HOOF-LAND'S GERMAN BITTERS, I would have gone to my grave long ago. LAND'S GERMAN BITTERS, and the means of whith the hope that I may be the means of bringing those Bitters of the notice of all who may be suffering as I did, I give this certificate Gratefully, Yours, C. W. AHL.

DEAFNESS, Blindness and Catarrh treated wit he utmost success, by J. Isaacs, M. D., and Pro ssor of Diseases of the Eye and Ear, (his spe essor of Diseases of the Eye and Ear, (his spe ciality) in the Medical Co ego of Ponnsylvania, 2 years experience, (formerly of Leyden, Hol-land,) No. 305 Arch Street, Philadelphia, Testi-monials can be seen at his office. The medical faculty are invited to accompany their patients, as he has no secrets in his practice. Artificia yes inserted without pain. No charge for exmination. March 17, 1870—ly

Mied.

Ayer's Hair Vigor

Renovation of the Hair! THE GREAT DESIDERATUM OF THE AGE.

July 13, 1871;

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Fided or gray hair is soon restored to its originate olor and the gloss and freshness of youth. Thin hair is thickened falling hair checked, and balding hair checked, and baldness often, though not always, cured by its use. Nothwhere the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. In-

A dressing which is at once

stead of fouling the hair with a pasty sedin t will keep it clean and vigorous. Its occa stonal use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substan-ces which make some preparations dangerous and injurious to the hair, the Vigor can only medit but not harm it. If wanted merely for a HAIR DRESSING,

othing else can be found so desirable. Con nothing elected belond so desirable.

taking neither oil nor dyo, it does not soil whitcambric, and yet lasts longer on the hair, giving
it a rich, glossy lustro and a graceful perfume. Prepared by Dr. J. C. Ayer & Co.,

PRACTICAL AND ANALYTICAL CHEMISTS, LOWELL, MASS. PRICE \$100.

J. B. HAVERSTICK, Agent, Carlisle, Pa. NSURE AGAINST ACCIDENT. INSURE AGAINST ACCIDENT.—
Accidents will happen to persons traveling, on business or pleasure; to the mechanic working at his trade; to the farmer cultivating his farm; to the professional or business man in the active pursuits of life. No one is exempt from it. Then take a yearly policy in the TRAVEL ERS', of Hartford, the oldest and only generaccident insurance company in America, it costs but from \$5 to \$90 per thousand, according to occupation and degree of hazard. This insurance guaranties the payment of a stipulated sum per week, from \$5 to \$90, for total disability, or the payment of the principle sum insured from \$1,000 to \$10,000 if the injury cause ied sum per week, from \$5 to \$50, for total disability, or the payment of the principle sum insured from \$1,000 to \$10,000 if the injury cause death within three months. We understand that J. C. Stock, the active life agent of the Charter Oak, has accepted the agency for this company for Carlisle and vicinity, and has already taken \$00,000 of insurance, Who would not have a policy when the protection offered is worth more than it costs?

July 6, 1871—3m

VALUARLE FARM FOR SALE. The subscriber offers his farm, situated in ver Spring township, about half a mile from Hoguestown road, at private sale. This meontains

90 ACRES OF LIMESTONE LAND, all under fonce and cultivation. The improvements are a good Stone Mansion House, Stone Bank Barn, Corn Crib, Wagon Shed, a very superior apple Orchard, and other Fruit Trees,—There is a well of nover-failing water convenient to the dwelling, and Trindle Spring runs through a portion of the property. Stock can be watered in all the fields. This is one of the good farms of old Silver Spring, is in excellent condition in every respect, and is "celebrated as a grain-growing farm." For terms, &c., call on the proprietor, residing on the premises.
