BARN BURNED .- We learn from the Shippensburg News that on Monday afernoon the barn on the farm of William Smith (of Balzar.) a few miles north of that borough, was consumed by fire. We understand the fire originated from some oys who were sm oking pipes or cigars at a straw stack adjacent to the building. The fire occurred about four o'clock in the afternoon, while Mr. Smith was in town with a load of grain. The harn was a new one, only being erected a few years ago. We are not fully informed of Mr. S.'s loss. There was some grain detroved together with gears and farming utensils. He had an insurance on the property to the amount of \$900, in the argan Company.

PROMISSORY NOTES .- A man drew a ote promising to pay one hundred dollars. He used a printed form, but did not close up the blank devoted to dollars, nd after it had passed from his hands and become negotiable paper, somebode inserted 'and flity' after the one hundred and before the printed word dolars, making the note read one hundred and fifty dollars. The note thus altered got into the hands of an innocent part y who presented it to the drawer, but payment was refused. Suit was brought, an going the rounds of the papers. We, the Supreme Court decided that the maker of the note was liable for its face, because through negligence he had no drawn a line between the written word 'hundred' and the printed word 'dollars. Any testimony that the drawer might offer to establish the fact that he gave note for only one hundred dollars, mus go for nothing, as 'there was nothing on the face of the note showing that it has heen altered.' Evidence of an alteration on the face of the note would have changed the case. Let this decision be a lesson to all drawers of promissory notes No one can be too careful in such mai

MURDOCH'S LECTURE. -The announce ment that Jas E. Murdoch was to give a reading, brought a large and appreciative audience at Rheem's Hall, on Tuesday evening, and great as were the expectations of the people, no one came away disappointed. Mr. Murdoch fully sugfained the world-wide reputation he has long had as an elocutionist, and which has made him the peer of M'Cready, Booth and Forrest. He gave the variety necessary for a promiscous audience, and every part was well sustained, from the celebrated court scene in the Merchant of Venice, down to Lovel's ridiculous farce of the Irisman and the gridiron. The ride from Ghent to Aix was very graphic and the rendering of the speech of the law yer in the case of Bardel vs. Pickwick, was true to nature, and fitly characterized many a court scene on even thi side of the Atlantic. SALT AS A PREVENTATIVE OF SMALL-Pox.-Dr. Carl Both, in an article in January number of "Good Health," has the following "sure preventive" of smallpox: A due proportion of salt, eaten regularly every day, in connection with all articles of albuminous food, meat, flour, etc., will render the body invulnerable to small-pox, especially if the following acres of Cumberland county, according and like articles of diet are added:

Good course flour, containing good and indecomposed gluten, not too many eggs, not too much candy or sugar in any form particularly in connection with the use of albuminous food, the occasional use of acid, fresh fruits, onions, or horse-radish mustard, or something of similar character; these being necessary for properly balanced blood in our state of civiliza-

A GOOD WORD FOR LOCAL PAPERS. The New York Times says you might nearly as well forget your churches, your academies and school-houses, as to forget your local paper. It speaks to ten times he audience that your local minister does, and if it has any ability at all, it is read eagerly each week from begin ning to end. It reaches you all, and if it has a lower spirit and less wisdom than a sermon, it has a thousand times better chance at you. Lying as it does, open on every table, in almost every house, you owe it to yourselves to rally liberally to its support, and exact from it as able, high-toned a character as you do from any educator in your midst. It is in no sense beneath notice and care, unless yourselves are beneath notice and care, for it is your representative. Indeed, in its character it is the summation of the importance, interest, and welfare of you all. It is the aggregate of your consequence.

OLD predjudices are dying out. New facts are killing them. The idea that invalids weakened by disease can be relieved by prostrating them with destructive drugs, is no longer entertained except by monomaniaes. Ever since the introduction of Dr. Walker's VINEGAR BITTERS it has been obvious that their regulating and invigorating properties are all sufficient for the cure of chronic indigestion, theumatism, constipation, diarrhoea, nervous affections, and malarious fevers, and they are now the stand-ard remedy for these complaints in every section of the Union. feb. 8—4t.

PROGRESS OF THE REVOLUTION.—A new light dawned upon the world with the introduction of Plantation Bitters twelve years ago. Drastic purgation went out-restoration and renovation came in. The eyes of the people were opened to the great fact that the way to care disease is to strengthen and support its victims, not to place them at its mercy by depriving them of the little strength they have. It soon became ovicent that as a means of infusing vitality into the feeble system, regulating the secretions, curing indigestion, and reforming a billious habit of body, no medicinal preparation then known was at all comparable to the new restorative. Since then hundreds of attempts have been made to rival the Bitters. They have all failed, and the Grand Revolution as Madical Treatment, which was commenced in 1869, is still all falled, and the Grand Revolution on Medical Treatment, which was commenced in 1869, is stil in progress. Nothing can stop it, for it is foundthe principle, now universally acknow ed on the principle, now universally adapted by dged, that physical vigor is the most formida ble antagonist of all human ailments, and experience has shown that Plantation Bitters is a perience has shown that the party and the perience has shown that the perience has shown the peri
