HOLLOWAY'S PILLS AND OINTMENT!

Dropsy.

This, in most cases is the culmination of some other disease, hence difficult of curing, yet by the joint agency of the Pills and Ointment great relief can be obtained, and in many instances a cure effected. The Pills should be taken in doses of six to eight, night and morning, and the swollen parts (especially the stomach and right side, round to the spine) should be thoroughly rubbed with the Ointment for an hour twice a day.

Night Sweats and Restlessness.

Disorders of the Liver and many other disarrangements are preceded by night sweats. As a cure take four to six Pills every night before retiring, according to the strength of the patient, use substantial food, and take all the out-door exercise possible.

Palpitation of the Heart.

Rub the Ointment freely over the region of the heart, night and morning, and take four to six Pills twice a day, abstain from the use of all exhilarating liquids, (even tea and coffee, take plenty of gentle out-door exercise, and avoid violent exertion of any kind.

Urinary Obstructions...Bloody Urine, Involuntary Urine, and Urine by Drops accompanied with Heat and Pain.

Take six or eight Pills every night, and rub the Ointment freely over the region of the kidney. In all these diseases the hip bath should be used nightly with warm (not hot) water, and the treatment continued for four or five weeks after a cure, to prevent a return of the complaint.

Fever and Ague commonly called Chills and Fever.

This insupportable complaint is undoubtedly superintended by miasma, inhaled into the lungs and stomach. It is a bilious complaint, having its seat in the liver. Holloway's Pills are singularly adapted to the cure of this most annoying complaint. Take the pills night and morning, commencing with four each dose the first day, six the second, and eight the third. After that varying the dose according to circumstances. After a chill bathe the feet in a hot mustard bath, and drink warm tea or lemonade in order to produce perspiration.

Gonorrhoea, Gleets.

The worst forms of these diseases can be cured by taking six Pills to ten every night, so as to thoroughly cleanse the blood. Abstain from eating anything salt, or any kind of acids, pickles, pepper or mustard; eat plenty of fresh meat and raw tomatoes, avoiding spirits, wines, and sweet liquors of every kind, also tea and coffee, drink one or two quarts of *Evaded Tea* daily, and use an injection of one part Sulphate of Zinc, two parts Sugar of Lead well mixed with water, so as to form a weak solution. Inject from two to five times within the twenty-four hours. In ordinary cases use only the solution of Sugar of Lead, but in severe attacks or neglected Gleet use the compound.

Diseases Incidental to Women, Floodings, Whites, Obstruction of the Menses, and the Change of life.

In all cases these Pills will be found of inestimable service; for *floodings* take five Pills every night on going to bed; for *whites* five pills night and morning, live separately, drink nothing but water, and keep control over the passions. When a woman finds the great change—the turn of *Life*—coming upon her, take for one week in the first month six pills nightly, this will greatly assist nature in her operations, and purge the gross humors from the blood, and if necessary eight pills the second month. This with cooling diet and gentle exercise in the open air will shortly restore the afflicted to perfect health.

Conclusion.

On taking the Pills in the evening, avoid eating a rich heavy meal, and drink freely of some warm mucilaginous drink, such as Barley water, thin gruel or flaxseed tea, which are grateful to the stomach and assist the medicine in its operation.

Holloway's Pills and Ointment.

NOTICE.

To protect the public against counterfeits this book is copyrighted, and the TRADE MARK

which is printed on each label is recorded in the Patent Office in accordance with the Act of Congress, 1871, and will also appear in the water-mark of each sheet of the book accompanying every box and pot of the Pills and Ointment, and this guarantee given by the Law will be used to its utmost to protect the public against counterfeits.

Sole Agents for Holloway & Co. in the United States.

FOR THE CURE OF

Dyspepsia, Coughs, Colds, Headaches, Bilious Attacks, Fevers, Derangements of the Liver, and all disorders of the Stomach, Liver, Kidneys and Bowels, Rheumatism and Gout, and especially

FOR PURIFYING THE BLOOD!

By this means giving clearness to the Brain, a Fresh and Brilliant Complexion, and Buoyancy to the Body.

The Ointment

Is used in all diseases of the Skin, Piles, Fistula, Lumbago, Erysipelas, Swellings, Sore Throat, Inflammation of the Chest, Bolls, pains in the Limbs, Rheumatism, Scalds, Burns, Sore Breasts, Diseases of the Joints, Scrofula, Ulcers, Swelling of the Glands, Neuralgia, Salt Rheum and Weaknesses.

Dyspepsia, Indigestion, Indigestion of Spirits, Sick Headache and Nausea.

These common diseases have their origin in the stomach. The gastric juice, when secreted from bad blood, is deficient in those properties so essential to digestion, and unless the food is properly dissolved, the body is not suitably nourished. The bowels become constipated, the liver torpid, and a general derangement of all the functions of the body ensues, hence the importance of purifying the blood, and cleansing the stomach and bowels of all bilious humors.

HOLLOWAY'S PILLS are a most efficacious remedy for all derangements of the digestive organs, correct the morbid condition of the liver and organs subservient to digestion, promote a healthy secretion of bile, and cleanse the system of all humors and impurities, and restore the energies of body and mind. Six to Ten Pills should be taken nightly by adults, (according to the age and sex of the patient,) until a cure is effected.

Liver Complaint, Asthma and Difficulty of Respiration.

The symptoms in the first of these diseases varies according to the degree of inflammation existing, or of that portion of liver which is affected. If stagnant and corrupt humors lodge in the liver, and are allowed to remain, a torpid and diseased state of this most important organ is sure to follow, producing Asthma, difficulty of breathing, and other derangements, which, if not speedily extirpated by vegetable purging, will sooner or later end in confirmed Liver Complaint. Holloway's Pills, if combined with strict attention to diet, will remove at once, by their influences over the secretions, that congestion and unhealthy condition of the liver which generates these diseases. Commence taking four Pills morning and evening of the first day, and increase the dose (according to the age or strength of the patient,) two Pills until you reach eight, and continue this number as long as necessary to effect a cure. The Ointment should be freely rubbed over the affected parts twice a day, for ten or fifteen minutes.

Piles.

It should be remembered that all cases of this most annoying disease proceeds from a want of proper evacuations of the bowels. The foul humors, in place of being regularly and thoroughly expelled, are left to generate inflammations and swellings, commonly known as Piles, which, if neglected, will ripen into the still more dreadful disease Fistula. The most aggravated cases are cured by these medicines. Two or three of these pills taken night and morning will be found sufficient to produce one or two slight evacuations daily, and great care must be observed that no violent action of the bowels is produced. The patient should, if possible, sit in a warm—not too warm—bath for a few minutes, night and morning, but if that is unobtainable, bathe the parts freely with warm water, and then rub the anus and surrounding parts for five or ten minutes with the ointment. Falling Piles and Blind Piles require the same treatment, which, if continued for a short time, will make a complete cure of the most obstinate attacks. Great prudence must be used both in eating and drinking, avoiding high seasoned food, spirits, wine or malt liquor.

Rheumatism, Stiffness in the Joints, Gout, Lumbago, Unnatural Swellings, &c.

In all these cases the Ointment must be used freely two or three times a day, rubbing it well in, and keeping the parts affected covered with the Ointment. In severe cases heat some sand or salt, place it in a bag, and lay it on the part affected as hot as the patient can bear, for five or ten minutes. Afterwards well anoint with Ointment, and spread thickly on linen or cotton rags, and then cover over with flannel. The Pills should be used night and morning, in doses of five to eight, according to the strength and age of the patient.

Sore Throat and Quinsy.

Use five Pills night and morning, increasing the dose by one Pill each day to the number of ten, if necessary. Rub the Ointment thoroughly on the chest or throat two or three times a day, and observe a temperate diet.

Ulcers, Abscesses, Sores, Ulcerated Breasts, Sore Nipples, Wounds and Scrofulous Affections.

In order to effect a cure in these diseases, it is essential that they should discharge freely, and that the blood should undergo the process of purification; bathe the parts with warm (not hot) water twice a day, and then apply the Ointment freely, rubbing well in round the sores, and over hard swollen and inflamed places. (If the sores or ulcers are foul, a little brown sugar may be mixed with the Ointment previous to applying it,) and continue so as long as the discharge is of a thick, glutinous nature. Persons of robust constitution can take six to eight Pills night and morning, during the first week, six twice a day during the second week, and four the third week, continuing the treatment until the four humors of the blood are expured, and a cure effected. During the treatment the diet should be generous, consisting of roasted and broiled meats with vegetables, and a complete abstinence from all spiritous or malt liquors.

Diseases of the Skin, Salt Rheum, Scurvy, Scorbatic Affections, Ringworm, Scald Heads, Blotches, Pimples, &c., and Erysipelas.

The origin of all these diseases lies in the blood, creating excitement and great irritability, and can only be cured by acting powerfully on the first cause—the blood—and thus carry off through nature's channels those morbid impurities which are otherwise forced upon the outward surface of the body. Four to eight Pills—according to the age and strength of the patient—night and morning for ten days will produce sufficient purging and thoroughly extirpate the foul secretions; and while the internal medicine is at work, the external (the Ointment) must be freely applied twice a day—first fermenting the parts with warm water, in order to allow the searching properties of the Ointment the more easy to penetrate. In all cutaneous eruptions the outward application causes the parts to appear more inflamed, disregard that, but persevere and the disease will be removed.
