WE HOPE OUR READERS will remember that cellars nearly always need attention at this season of the year. Many cellars are storehouses for apples, potatoes, onions, and many of these become rotten before spring, and when they reach this condition they should be at once removed. Apples and potatoes should be stored in a cool, dry place, and should be removed as soon as they are found to be rotting. It will make those that are left last longer, and will greatly increase the healthfulness of the house. A cellar filled with decaying fruits and vegetables at this season of the year is a breeder of sickness. See to your cellars now.

A SUCCESSFUL SURGICAL OPERATION.—Mrs. Susan Grant, of New Cumberland, had her lower jaw removed, on last Wednesday, for a cancerous affection, which had completely involved the bone and a large portion of the soft tissues. The operation was performed in Harrisburg, by Dr. H. L. Stickle, formerly of York, assisted by Drs. G. H. Hersh, J. W. Ross and T. L. Willets. Mrs. Grant is a lady sixty-two years of age, and the complication of heart disease rendered anesthetics inadmissible. Excision of the lower jaw is an extremely hazardous operation, and it is its successful execution which affords its success. —York Press.
