Water apparatus that has ever been brought to this place. In this new patented process, the water is charged with carbonic acid gas, made directly fram pare far-bonate of soda, which gas is washed before it goes into the fournism, so that no foreign or offensive mai-ter is allowed to mix with the water. The generator is capable of sustaining a presence of two handred pounds to the square tack, which pressure can be regulated by a gauge which is attached. Thus the water is forced to take up and absorb all the carbonic acid gas uhat it will hold; when so charged it is fit for-us, has a peculiar sparking appearance and con-tains all the carbonic acid that is requisite to give it that pecular quality which makes this kind of Soda so acceptable to the pulate and so argreeable to the stomach, and therefore superior to all those waters under from Barbie Dest, Whiling, &c.
