Lancaster, May. 24, 1856. At the Family Medicine Store, I Nithe Odd Fellows' Hall, McCORKLE & DEL-LETT have just received the most perfect Soda Water apparatus that has ever been brought to this

Water appuratus that has ever been brought to this place.

In this new patented process, the water is charged with carbonic acid gas, made directly from pare carbonate of soda, which gas is washed before it goes into the fountain, so that no foreign or offensive matter is allowed to mix with the water. The generator is capable of sustaining a pressure of two hundred pounds to the square anch, which pressure can be regulated by a gauge which he attached. Thus the water is forced to take up and absorb all the carbonic acid gas that it will bold; when so charged it is fit for use, has a peculiar sparkling appearance and contains all the carbonic acid that is requisite to give it that peculiar quality which makes this kind of Soda so acceptable to the plante and so agreeable to the stomach; and therefore superior to all those waters made from Martle Dust, Whiting, &c.
