In his new patented process, the water is charged with earbonic acid gas, made directly from pure car-boniate of anda, which gas is washed before it gots into the fonniain, so that no foreign or offensive mat-ter is allowed to mix with the water. The generator is capable of sustaining a pressure of two buildred pounds to the square unch, which pressure can be regulated by a gauge which is attached. Thus the water is forced to inke up and absorb all the carbonic acid gas that it will hold; when so charged it is fit for use, has a peculiar sparkling, appearauce and con-tains all the carbonic acid that is requisite to give it that peculiar quarky which makes this kind of Soda so acceptable to the palate and so aprecable to the somach, and therefore apperior to all those waters made from Marble Dust, Whiting, &c.
