A PAINFUL RUMOR.-It is stated that there is a belief existing among the people of Cape May, that Mr. Cain, the father of the Cain taunly, who were burned up by the de-truetion of the Mount Vernon Hotel, was muron fire. The j-welry of all the members of the family was found near the charred remains, but not a dellar of gold or silver coin has been recovered, and there is every reason to believe that there was considerable in their possession. Young Cain, who escaped from the hotel, but was so badly burned that he died soon afterward, alleged that he saw a man in his room when he left near those of the father, and it is inferred. good. from their poculiar position, that they were all murdered.

There seems to be a persevering determination on the part of some unknown villian to burn down Mr. Cooper's property. In June, 1854, a stable which stood on the same ground was fired and entirely consumed; and only three weeks ago another stable belonging to him was set on fire and burnt out, as our readers will recollect. So far, no clue whatever to the discovery of the perpetrator has been obtained .- Inland Daily.

HOW AN ECONOMICAL INDIVIDUAL SAVED Two CENTS .- Last Friday afternoon, an economical gentleman from Bucks county, attempted to save two cents by driving his wagon through a gate on the Germantown turnpike without paying the toll. NEW ROUTE TO CALIFORNIA .- The great the Livery Stable on Walnut street between scheme of the Honduras Railroad Company with a capital of \$10,000,000, under a British charter, is about to be brought out under the most favorable auspices. The directors are divided between England and the United States, and some of the most influential firms give countenance to the project, and appear in the directory and as agents to procure subscriptions. The difference of distance between New York and San Francisco, as compared with the Panama route is 1.103 miles, and the difference from Liverpool to San Francisco, touching at Kingston, Jamaca, is 831 miles. It is estimated that at the present rates of speed by steam and rail. that the time between New York and San Francisco can be accomplished in thirteen days, four hours, and that steamers can be built, and with increased railway speed, the time can be reduced to eight days, sixteen will bring San Francisco within speaking distance of New York.

> Douglass Gerrold, one of the famed to America to lecture. Gerrold commenced life as a sailor, and after six years' salt water experience became a compositor in a Lonlon newspaper office. His first literary achievement was an essay on German music, which the author, after the manner of Benamin Franklin, dropped into the lion's mouth, the editor's box where he was a printer, and two days after he had the delight of setting up his own article, none of the editors being aware of the author's name. Jerrold next dropped another anonymous article in the box, on Fashionable Charity, which is written with all his peculiar vigor. This caused so great a stir that the editor, the author to call upon him-in other words, he was requested to "Stand and unfold yourself." He did, much to the astonishment of the editor, who at once recognized his talents, took him from the case and put him to the desk.

COWHIDING ON THE OHIO RIVER .-- We unerstand that a severe case of lynching occurred on Wednesday last on the steamer Forest Rose, which is lying up on account of low water, just below French Island, in which Capt. Allen the commander of the boat, was the victim. It is charged that Capt. Allen had insulted or made improper proposals to the wives of the pilot and mate of the boat, whose husbands were temporarily absent sounding the river a short distance below. They escaped to a neighboring boat, and on the husbands being informed of the outrage, they at once went to the Forest Rose and cowhided Capt. Allen in a one side.

Prof. O. J. Wood—Dear Str.—Lake pleasure inhearing voluntary festimony to the magic effects of your wonderful Hair Restorative. As far back as 1836 my hair commenced falling off, until the top of my scalp became bald and smooth as glass, and it has command to fall for a great many years, nothwithstanding I have used many celebrated preparations for its restoration. Seeing your advertisement, I was induced to give your article a trial, and to my after a stomethment, I found after a few applications that my hair became firmly set and assumed a very glossy and beautiful appearance; and, by the time I had used a quart bottle my baid head was covered over with a young and vigorous growth of hair, which is now from one to two inckes in leight, and growing very fact. Yours, truly Hair Restorative—In our columns to-day willbe found Prof. Wood's nower issement of the above article to which we call attention. What it has done, we have write-set upon everal of our acquaintances in St. Louis. Hair once gray met our view, black or brown, as the case night be, being the color or enfymanhood; and as fine and glossy as silk, and that without any olier application than he Restorative—If it has done this upon others, will it not do the same tor any of our request whose single to year. We will be found the same tor any of our request whose single to year. We will be found that the profession of the profession of the profession of the profession.
