PREVENTIVE OF SCARLET FEVER .-- A correspondent of the Boston Post suggests a simple preventive of searlet fever. He says -"Globule of Belladona, tuken every morning, by each and every member of a family -adults, children, servants, and all inmates -will certainly prevent the spread of this dreadful disease in every household that may adopt it, as certainly as vacinaation will prevent the small pox. Ten cents will purchang a year's supply of any of our Homoso pathists. A wet finger applied to a globule and placed upon the tongue of a child or adult is all that is necessary to be done to prevent the spread of this disease."

As they were personally acquainted it was natural to reyeal the solemn fact that they were all engaged to be married. After consultation further, they ascertained that they were engaged to one man whose acquaintance they had made through his advertisements for a wife. It is unnecessary to add that the engagements were broken off-the scamp having left for Europe after obtaining all their available funds--prior to the denouement.
