west coal basin, and is destined soon to become one of the greatest business places in the state. It will supply the great Lake market, (accord-ing to population and travel the greatest in the Union.) It has five workable veins of the best bituminous coal, amounting in the aggre-gate to over 22 feet, which makes 22,000 tons of coal under each-acre. This will make the land of inestimable values? land of inestimable value.

The eminent state geologist, Dr. Chas. T. Jackson of Boston, has made a geological sur-vey of the land, and analysed the coal, the iron ore and the limestone. This report, to-gether with maps, will be furnished to inqui-

Fourth-Three railroads are laid out through this property. The Sunbury & Eric Railroad gives us a market for our coal to the lakes—it runs from Eric to Philadelphia. A large part of this road has been finished, and is now in running order. A heavy force is now work-ing from Erie towards our land in the western direction, the means for the completion of which has been raised-it will soon be finished. The Allegheny Valley Railroad connects us with New York, Boston and Pittsburg. The Venango Road connects us with the West.

There are already good turnpike roads run-ning though this property, various other roads have been opened to accommodate the emigra-tion and settlement which has already taken place.

There is no opportunity equal to it now offered to the man who wants to provide himself a home in an easy way, and make a settlement where he can live in prosperity and indepen-dence in a climate PERFECTLY HEALTHY. No case of the fever ever having been known to occur in this settlement. It is not like going to the backwoods of the west, among perform interest eacher where there is no perhaps intolerant people, where there is no society, churches or schools, where the price

of land is high, and where the emigrant, after being used to the healthiest climate in the world, has to endure sickness and pain, and perhaps ruins his health and that of his family. But here is a thriving settlement, having three towns, containing churches, schools, hotels, stores, saw mills, and everything stores, saw mills, grist mills, and everything desired. There is a cash market at hand.— The lumber trade last year amounted to over two hundred million feet of lumber. In a short time, owing to the coal, it will become still more valuable, as a number of iron works and manufactories will soon be started; they are at Breact starting them extensively at Warren. Even for those who do not wish to go there, the payments are such that they can easily buy a farm to save their rising families from want in the future, or to gain a competence by the rise which will take place in the value of fands. By an outlay scarcely missed, a sub-stantial provision can be made. Persons should make early application, apply or write to E. Jeffries, Sec., No. 135 Walnut street, below Fifth, Philadelphia. Letters carefully answered, giving full information. Shares or tracts of land can be bought or secured by letter enclosing the first instalment resent starting them extensively at Warren.

EXTRACT

OF THE ORMIS JEWEL PLANT,

To Breinsving Tan, Freckles, Pimples, heau-tufying the complexion, giving the skin a healthy appearance, and for cleansing the teeth. The jewel plant has long been known by the United States Pharmacopoint, as a medicine for both nicer-nal and external diseases, but it is only within a year or two that it has been discovered to possive such qualities as recommended for above. It is a delight-tial extract, and highly scented by its own ingreein ents, and no lady should be without it as a tulet, par-ticolariy during the Summer reason, when we are more liable to be tanned and sub-burn than in any other.
