Hover's Liquid Hair Dye.

This hair bye needs only a trial to satisfy all of us perfection as a Dye, and the following estimation from that eminent Analytic Chemist, Processor Booth, of the U.S. Mint, will only confirm what housands have previously borne testimony to.

"Laboratory for Practical Chemistry, S. Stephen's Pince, S. Philadelphia, Pebruary 17, 1857.

"Being we'l acquainted with the substances composing Hover's Loquid Hair Dye, I am satisfied that by following the simple directions given for its use, it will not inque the Hair or Skin, but will give a mutural and durable color to the hair.

Hover's Wrinig links, including Hover's Fluid, and Hover's Wrinig links, including Hover's Fluid, and Hover's machine lies, are too well known and introduced to regare any additional testimony of their character. The sales have been increasing since their first introduction, giving evidence that the articles truly possess that intrinsic merit claimed at first for them by the Manufacturer.

nurning of the from Safes, at Reading, February 27, 1857.

Reading, February 27, 1857.

Rrading, March 4.

The undersigned, members of the committee, do respectfully report, that we saw the two Sofes' originally agreed upon by Fairel & Herring, and Lvans & Watson, placed side by side in a furnace, viz. The Safe in use by the Paymaster of the Philadelphia and Bracing Railrond Company, in his office at Reading, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books precisely alike.

The fire was started at \$\frac{1}{2}\text{ o'clock A. M., and kept up until four codes of green hickory, two cords dry onk and half chestiant top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the committee. The Sufes were then cooled off with water, after which they were forced and under the superintendence of the subscribers, members of the committee. The Sufes were then cooled off with water, after which they were first examined and marked by the Committee. The books and papers taken from the Safe inanufactured by Evans and Watson seech tat slightly affected by the intense hent while thise taken from the Safe manufactured by Farrels and Herring were in our judgment damaged fully fitteen per cent, more than those taken from Evans & Watson's Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both safes.

JACOB H. DYSHER,

The following named gentlement, residents of Reading and its viminity, who saw the above fire, have purchased twenty-right Safes from Evans & Watson since the burning up to May 1st, 1857:—

rheum.

Five to eight bottles will cure the worst case of scrofula,

A benefit is always experienced from the first bottle,
and a perfect cure is warranted when the above quantity is taken.

Reader, I peddled over a thousand bottles of this in the vienity of Boston. I know the effect of it in every case. So sure as water will extinguish fire, so sare will this cure humor. I never sold a bottle of it but that sold another; after a trul it always speaks for itself. There are two things about this herb that appear to me surprising; first that it grows in our patures, in some places quite pientiful, and yet its value has never been known until discovered it in 1836—second, that it should core all kinds of humor.

In order to give some idea of the sudden rise rise great popularity of the discovery, I will state that in April, 1853, I peddled it and sold about six bottles per day—in April, 1854, I sold over one thousand bottlea per day of it.

Some of the wholesale Druggists who have been in business twenty and thirty years, say that nothing in the annals of patent medicines was ever like it—There is a universal praise of it from all quarters.

In my own practice I always kept it strictly for himors—but since its introduction as a general family medicine, great and wonderful virtues have been found in it that I never suspected.

Several cases of chiefpic fits—a disease which was always considered meurable, have been cured by a few bottles. O, what a mercy if it will prove effectual in all cases of chat awful malady—there are but few who have seen more of it than I have.

I know of several cases of dropey, all of them aged people, cured by it. For the various diseases of the divers, sick Hendache, Dyspepsia, Ashima, Fever and Ague, Pain in the Side, Diseases of the Bpine, und particularly in diseases of the kidneys, &c., the discovery has done more good than any medicine ever known.

No change of diet ever necessary—eat the best you
