pounted to superintend the burning of the Iron Safes, and Reading, February 27, 1857.

READING, March 4.

The undersigned, members of the committee, do respectfully report, that we saw the two Safes originally agreed upon by Farrel & Herring, and Evans & Watson, placed side by side in a furnace, viz. The Safe in use by the Paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books precisely atke.

The fire was started at 84 o'clock A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the committee. The Safes were then cooled off with water, after which they were opened and the books and papers taken out by the committee and sent to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans and Watson were but slightly affected by the intense heat while those taken from the Safe manufactured by Farrels used Herring were in our judgment damaged fully fifteen per cent. more than those taken from Evans & Watson were but slightly affected by the intense heat while those taken from the Safe manufactured by Farrels used Herring were in our judgment damaged fully fifteen per cent. more than those taken from Evans & Watson while those taken from the Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both safes. DANIEL S. HUNTER, HAVING A. NICOLLES.

H. H. MUHLENBERG, JAMES MILHOLLAND.

The following named gentlemen residents of Rgading and its vinning, who saw the above fire, have parchased twenty-eight Safe from Evans & Watson since the burning up to May 1-st 1857.

HERRING'S SAFE!

THE ACKNOWLEDGED
CHAMPION.
The recent trails at Reading have endorsed the current of public opinion, and confirmed the verdect of more than 200 accidental fires, proving conclusively that "Herring's" is the Only Safe that will not burn Extract from the Committee's Report on the Trial of Iron Safes at Reading:
"On the 26th of February all the members of the

Safes at Reading:

"On the 26th of February all the members of the committee thet to witness the Safes and books and papers, (placed in them.) and were perfectly satisfied that all was right. The day following, the burning took place, under the superintendence of the Committee. After a fair and impartial burning for five hours, the Safe of Messrs. Evans & Watson was first opened, the Safe being on fire inside, and the contents partially consumed, while the contents in the Safe of Messrs. Fatrel's & Herring were in good condition, and no fire inside."

The farms consist of the best limestone soil of the most superior quality for farming, in a rapidly improving place, into which an extenrapidly improving place, into which an extensive emigration is now pouring. The property is located in Elk Connty, Penna., in the midst of a thriving population of some 10,000. The climate is perfectly healthy, and the terrible plague of the west, fever, is unknown. It also has an abundance of the best quality of coal and iron. The price to buy it out is from \$3 and iron. The price to buy it out is from \$3

sum of \$100 and under, paid in advance, a discount of \$5 per cent. will be allowed, and for
over \$100 a discount of 10 per cent.
In considering the advantages of emigrating
to this locality, the following are presented.
First—The soil is a rich limestone, capable
of raising the heaviest crops, owing to which
this bettlement has attained its present great
prosperity.

prosperity.

SECOND—It is the centre of the great northwest coal basin, and is destined soon to become one of the greatest business places in the state. It will supply the great Lake market, (according to population and travel the greatest in the Union.) It has five workable veins of the best bituminous coal, amounting in the aggregate to over 22 feet, which makes 22,000 tons of coal under each acre. This will make the

land of inestimable value. The eminent state geologist, Dr. Chas. T. Jackson of Boston, has made a geological survey of the land, and analysed the coal, the iron ore and the limestone. This report, together with maps, will be furnished to inqui-
