CHEOPLASTIC PROCESS Of Mounting Artificial Teeth.

PATENTED by Dr. Blaudy, formerly Professor in the Baltimore College of Dental Surgery, is certainly one of the greatest discoveries of the present age, and destined to work a great change in mechanical dentistry.

The undersigned having used the Cheoplastic Process in more than forty cases, with perfect success, not one having failed to give entire satisfaction in being preferred to gold plate by all who have tried both, takes pleasure in recommending it as superior to any other method of mounting artificial teeth now or ever known. The same accuracy in fitting, perfect cleanliness, beauty and durability, can only be obtained by any other process.

Persons who can be interested with perfect success without the use of clasps which are so destructive to the mucal organs, had ought to be discontinued by every operator regarding the good of his profession.

Professor Thomas Bond of the Baltimore College of Dental Surgery, at present and testing the Cheoplastic Process, on examining a letter to Dr Blaudy, says: "My opinion is, that your patent in the hands of skilful operators, must supercede all others now in use." I have examined specimens of their and some of my own inserted upon the Cheoplastic Process, and am decidedly of opinion that the former are superior in every particular."

The subscriber respectfully invites to call at the office of the undersigned, who is duly authorized to grant to those who may desire it, Letters Patent for the exclusive use or other rights in the counties of Lancaster, Chester, Berks, Dauphin and York.

HERRING'S SAFE!

THE ACKNOWLEDGED CHAMPION.

The recent trial at Reading have established beyond the current of public opinion, and confirmed the verdict of more than 200 accidental fires, proving conclusively that "Herring's" is the Only Safe that will not Explode.

Extract from the Committee's Report on the Trial of Iron Safes at Reading:

On the 26th of February all the members of the committee met to witness the Safes and books and papers (placed in them,) and were perfectly satisfied in all that was right. The day following the burning took place, under the superintendence of the Committee. After a fierce and unequalled burning for five hours in the Safe of Messrs Evans & Watson was first opened for the being on fire inside, and the contents partially consumed; while the contents in the Safe of Messrs Farrel & Herring were in good condition and no fire inside."

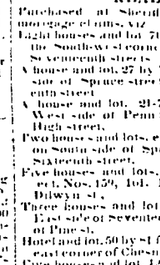
EVANS & WATSON,



PHILADELPHIA Manufacturers of SALAMANDER SAFES No. 26 S. Fourth street, Phila.

Truth is mighty and must prevail.

Report of the Committee appointed to superintend the burning of the Iron Safes, at Reading, February 27, 1857

READING, March 4

The undersigned, members of the committee, do respectfully report, that we saw the two Safes originally agreed upon by Farrel & Herring, and Evans & Watson, placed side by side in a furnace viz: The Safe in use by the Paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Messrs. Herring, and the Safe in use by H. A. Lantz, in his store manufactured by Evans & Watson, and put in books precisely alike.

The fire was started at 4 o'clock A. M., and kept up until four cords of green hickory, two cords dry, A half hour after the fire had been constantly consumed, the whole under the superintendence of the subscribers, members of the committee. The Safes were then cooled off with water, after which they were opened, and the books and papers taken out by the committee and sent to H. A. Lantz's Store for examination, where they were carefully examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans and Watson were but slightly subjected to the intense heat while those taken from the Safe manufactured by Farrel and Herring were in our judgment damaged to the extent of fifty per cent. more than those taken from Evans & Watson's Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both safes.

JACOB H. DYSHER,
DANIEL S. HUNTER.

Having been absent during the burning we fully coincide with the above statement of the condition of the papers and books taken out of the respective Safes.

G. A. NICOLLS,
H. H. MUHLENBERG
JAMES MILLHOLLAND
