truth that its sharp corners get terribly rounded. I leve truth as chiefest among the virtues; I trust it runs in my blood: but I never would be a critic, because I know taority of the laws of France does not ex-

-When we are as yet small children. long before the time when those two grown ladies offer us the choice of Hercules, there Penn'a R. R.-Departure of Passenger comes up to us a youthful angel, holding in his right hand cubes like dice, and in his left spheres like marbles. The cubes are of stainless ivory, and on each is written in letters of gold-TRUTH. The spheres are veined and streaked and spotted beneath, with a dark crimson flush above, where the light falls on them, and in a certain aspect you can make out upon every one of them the three letters L, I, E. The child to whom they are offered very probably clutches at both. The spheres are the most convenient things in the world; they roll with the least possible impulse just where the child would have them. The cubes will not roll at all; they have a great talent for standing still, and always keep right side up. But very soon the young philosopher finds that things which roll so easily are apt to roll into the wrong corner, and to get out of his way when he most wants them, while he always knows where to find the others, which stay where they are left. Thus he learns-thus we learn-to drop the streaked and spleckled globes of falsehood and to hold on to the white angular blocks of truth. But then comes timidity, and after her good-nature, and last of all polite-behavior, all insisting that truth must roll or nobody can do anything with it: and so the first with her coarse rasp, and the second with her broad file, and the third with her silken sleeve, do so round off and smooth and polish the snow-white cubes of truth, that, when they have got a little dingy by use, it becomes hard to tell them from the rolling spheres of falschood.

AN OPIUM DEN AT NINGPO .- At Ningpol accepted an invitation from the Rev. Mr. Russell, the Church of England missionary priest, and the Rev. Mr. Edkins, of the London Mission at Shanghai, to visit the opium dens of Ningpo city. Commander Dew, of the Nimrod, accompanied us. I had seen the opium-eaters of Constantinople, and I was prepared for emacipated forms and trembling limbs. I recollected buying a tabooshe in the bazaars of Smyrna from a young Moslem whose palsied hand and dotard head could not count the coins I offered him. I recollect the hashish-smokers of Constantine, who were to be seen and heard every afternoon at the bottom of that abyss which yawns under the "Adulteress's Rock" -lean, fleshless Arabs, smoking their little pipes of hempseed, chanting and swaying their skeleton forms to and fro, shricking to the wild echoes of the chasm, then sinking exhausted under the huge cactus-sights and sounds of saturnalia in purgatory. The Chinese exhibition was sufficiently disgusting, but was otherwise quite a failure .--These opium dens are ordinary Chinese cottages, with a room about twelve feet square, furnished with a bed, a table, and a sofa. In the first we entered three men sat upon the sofa. There was the opium pipe, the lamp, and the small porcelain cup of treacle-looking opium. One of the customers takes the pipe and the lamp, then dips a pin into the opium, turns it round and around, till he has the proper quantity of the jellified drug, inserts the pin in the pipe, applies the pipe to the flames of the lamp, and at the same time draws up the vapor by two or three long inhalations, not whiffs, for he draws it into his lungs; then he passes on the pipe, the opium being consumed and gradually lets the vapor slowly return through his mouth and his nose.

The members of this convivial society the respectfully solicits the support of the cincum of the congent of Columbia.

March 6, 1858-21 were good humored and communicative .--One was a chair cooly, a second was a petty tradesman, a third was a runner in a mandarin's yamun; they were all of that class of urbane population which is just above the lowest. They were, however, neither emaciated nor infirm. The chair cooly was a Statement of the Columbia Bank, sturdy fellow, well capable of taking his share of the porterage of a sixteen-stone mandarin, the runner seemed well able to run, and the tradesman, who said he was thirty-eight years old-say thirty-seven, for the Chinese commence to count their age nine months carlier than we do-was Personal do. remembered by all of us to be a singularly young-looking man for that age. He had passed from the opium dens we went into a Chinese tea garden—a dirty paved court, with some small trees and flowers in G with some small trees and flowers in flowerpots, and a very emanciated and yawning proprietor presented himself. "The man has destroyed himself by opium smoking," said Mr. Russell. The man being questioned, declared that he had never smoked an opium pipe in his life; a bad shot, at which no one was more amused than the reverend gentleman who fired it. I only take the experiment for what it was worth. There must be very many most lamentable specimens of the effects of indulgence in this vicious practice, although we did not happen to see any of them that morning .-A tiety are not, however, so universal, nor even so eonymon, as travellers who write in support of some thesis, or who are not above truckling to popular prejudices in England, are pleased to say they are. But, if our visit was a failure in one respect, it was fully instructive in spectary. In the first fact, and the Washington House.

DANIEL HERR.

WM.S. McCORKLE, visit was a failure in one respect, it was fully instructive in another. In the first house we visited no man spent, on an average, less than eighty each a day on his opium pipe. One man said he spent a hundred and twenty. The chair cooly spends eighty, and his average earnings are one hundred each a day. English physicians, unconnected with the missionary societies, have assured me that the cooly opium-smoker dies, not from opium, but from starvation. If he starves himself for his pipe, we need not ask what happens to his family.

The American Sittle Adriatic and the French authorities, we thought proper to inquire at the State Department whether the owners of the vessel had made any complaint in regard to her seizure, or whether our counsul at Lyons had made a report concerning the affair. Nothing, we learn, has been communicated to the De-

society to make liars of most of us,-not ab. stand, the opinion of the Secretary of State, solute liars, but such careless handlers of that our Government has no authority to in-I could not always tell it. I might write a criticism of a book that happened to please me; that is another matter.

PROFESSOR O. J. WOOD'S HAIR RESTORATIVE. PAIR RESTORATIVE.

POR producing hair on Bald Heads, and restoring frey thair to its materal color. This assonishing and unrequalted preparation has never failed to produce a growth on Bald Heads, when used according to the direction, and turn hair back to its original color, after having become gray, and remetate it in all its original health, basice, softeness and beauty. Remove, at once all seart, dandraft and unpleasant itching, scrofula, cruptions and feverish heat from the scalp. It also prevents the hair from hecoming unhealthy and inling off, and hence acts as a perfect flar invigorator and Tonic.

A gentleman of Boston writes to his friend in New Bethord thas:

found that before I had used all the second bottle, (which was eight weeks) my bart was entirely changed to its original color, light brown, and is now free from dandraff and quite moist. I have had my har cut five or six times since the change, and have never seen anything like white hor starting from the roots; and it is now as thick as it ever was, and does not come out at all. It has proved in my case all that I could wish to ask.

July 1,1855.

Yours, etc.—

Tom the Roston Herald,

Something Worth Knowing,—By using Professor Wood's Hair Restorative, gray hair can be perimently restored to its original color. The subjoined certificate from Johnson & Stone, Gurdiner, Maine, is but one of the many instances that are duly coming to our knowledge, of its wonderful effects. It is no longer problematical, but a self-evident truth, as hundreds in our community can testify.

Gardiner, Maine, June 22, 1855 Gardiner, Maine, June 22, 1855
DEAR Sin: I have used two bottles of Professor
Wood's Han Restorative, and can truly say it is the
greatest discovery of the age for restoring and changing the har. Before using it. I was a man of seventy.
My hair has now intained its original color. You
can recommend it to the world without the least fear,
as my case was one of the worstkind.
Yours, respectifity. DANIEL N MURPHY.

WHOD'S HAR DYE—This admirable nrucle is rapidly improving the hair. No arricle of a similar kind, now before the public, chops a letter reputation as a restorative and invigorous hair tonae. Its peculiar chemical qualities have a bencheral effect upon the growth and chiracter of the hair, giving a sidy and glossy texture to that which was formerly of a coaste and dry nature. It has, also, we under lared a tendency to preserve the youthful color and appearance of the hair, and destoving or counteracting the effects of acc. With such recommendations in its town, we hardly perceive how any hady or gen them a should be without so varigable an adjunct to their tortet.

A Desperate case of Tetter and Bather's Itch, care by the use of Landsey's Blood Scarcher. I, the indersqued, some time in last March, was severely a flected with what was pionounced by my physician to be a central kind of Tetter and Bather's tich. M condition was one of the greatest misery; my factors was almost constantly running with the tool corruption that escaped from the taberces, by which a was almost completely covered. After being under the care of my physicians for near two monits, without he least benefit. I was induced to make a trial (Lindsey); Blood Scarcher, and the result was that using one bottle and a half I found a perfect care, may also say that I engerly true whatever was recommended as a cure. Such was my wretchednesthat I ever recorted to the dangerous experiment apouring pure cross-one on my face and neck, but all it no purpose—the Blood Scarcher was the first an only thing that did me any good. As a blood partificity in a unequalled; and I have great reeson to be grainful that I ever made a trial of its healing virtues, in I can confidently recommend it to my who mays atter from Tetter, or, any other disease arrsing non a impure state of the blood. impure state of the blood. JOHN DELEHENT. Rolliday-burg, Ph., July 29, 1857.

An interesting case of scrofula cured by one both of Lindsey's Blood Searcher. This secrifice thatabot one year ago our luttle son axed four years, was mosorely affleted with what the physicians pronounce to be scrofula, and was treated accordingly for nearly a year, but without the slightest benefit. His eye were ranning a thin mattery immor almost constinily which would energe this eyes beyond the power to opening item until they were washed and eleaned be song and water. About the same time an abscess formed just below the good, which was found impossible to dry up or heal—the bed would be very meestamed and the clothing of the child perfectly sickering in a single nghr's time. After having the attention of a physician for solong a time, and finding the child to be getting worse, we determined to try the effect of Mr. Lindsey's Blood Searcher. This was in la March—and before two weeks had passed away the change was manifest, and I am happy to say that the use of a single bottle our little loy has been perfectly restored to health. We cannot speak too highly of this invalidable medicine, it should be in every marifest blood it is beyond all price.
