much and b. wels, and expelling from the system all morbal matter, and substituting in its stead a reaching activity through all the functions of life.

HOW IT WAS DISCOVERED!

In the fall of 1-54 a daughter of Mr Lindsey was suffering from a malignant strate of Came turn One (Canker of the month). She had previously been prostructed by the artiack of Dyscritery, Inflammation, of the Langs and Heene Pevez, successively, which is exilted in the above named disease in its worst form. Her condition was most deplorable—her month and check were herally roten—the attending playscam pronounced the case a hopeless one. Exerything indicated a speedy and horithle death—the death of cacting out of life? At this critical unclurs, Mr Landsey prepared a compound for the purpose of all levinting, if possible, the points of the little sungery she was made to use it treely, and in a short time to his most debuhful asstorabined, there was a very perceptible change for the hetter. The mouth began to put on a bright and healthy appearance—the tout his cash became sweet—the appetite was restored and the child seemed to printle of a new and fresh his.

Hope was useptred, and the acc of the compound wastarbially continued the result of which, with the blessing of God, was her complete restoration. She is now percelly healthy! From this circum-tance. Mr Landsey was led to prepare with greater care and exactness what had so astonishingly carried his chind, and continued his experimental chois until the since edged in binging to perfection his great Great Romedy for Flood Depunity—since which time its effects have been almost manculous. Hundreds upon handreds, by it, have been sinatched from an uniminely grave and restored to the sweets of health and the order many man and and enter the saving powers and sing aloud its critices. An interesting cuse of scripfula cancil by one hottle of Linds-py. Blood Scarcher. About the same time an absects formed just below the grom, which is due time broke and committeed a discharge, which was found impossible to day up or heal—the bord would be very much stained and the clothing of the chard perfectly stekening and hading the child to be getting worse, we determined to try the effects of Mr. Lindsey's Blood Scarcher. This was in last March-and before two weeks had passed away the change was manifest, and I am happy to say that in the are or a single bottle our line boy has been perfectly restored to health. We cannot speak too highly of this invaluable medicine, it should be in every laming—none should be without it. As a parifier of blood it is beyond all price.
