CHEOPLASTIC PROCESS Of Mounting Artificial Teeth. DATENTED by Dr. Blandy, formerly Profes-

DATENTED by Dr. Blandy, formerly Professor on the Battumore College of Dennai Surgery, is certainly one of the greatest discoveries of the present age, and destined to work a great change in mechanical dentistry.

The undersigned having used the Cleoplastic Process in more than tony cases, with perired success, but one having failed to give entire sanifaction, it being preferred to gold plate by all who have tried both, feels no hesitation in recommending it as superior to any other method of mounting sentiems. The same accuracy in fining, perfect cleanings, beauty and durability, cannot be obtained by any other process.

The material sets can be meerted with perfect success, without the use of chesps which are so destructive to the matural origins, and ought to be discommanded by every operation regarding the good of his patients. Professor Thomas Bond, of the Baltimore College of Bestal Singery, after using and testing the 'Circoplastic Process' for himself, in a letter to Dr. Blands, says. "My ophnon is, that your patent in the hands of sailling operators, must supersed all others now in nee, for it is advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them, but none has any advantages over all of them.

WOOD'S HAIR DYE—This advantable article is repidly improving the hair. No article of a similar kind, now before the public enjoys a better reputation as a restorative and invigorating hair tome. Its pertuin rehemical qualities have a heneficial effect upon the growth and character of the hair, giving a silky and glossy texture to that which was formerly of a coarse and dry nature. It has, also, we understand, a tendency to preserve the youthful color and appearance of the hair, and destrosting or counteracting the effects of age. With such recommendation in its favor, we hardly perceive how any lady or generateman should be without so valuable as adjunct to their toilet.

Report of the Committee appointed to supermeted the burning of the Iron Snies, at Reading, February 27, 1857.

The undersigned, members of the committee, do respectfully report, that we saw the two Safes originally agreed upon by Farrel & Herring, and Evana & Watson, placed side by side in a furnace, viz. The Safe in use by the Paymaster of the Philadelphia and Reading Railread Company, in his office at Reading, manufactured by Farrel & Herring, and the Safe in use by the Paymaster of the Philadelphia and Reading Railread Company, in his office at Reading, manufactured by Farrel & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books precisely alike.

The fire was started at 84 o'clock A. M., and kept up until four cords of green hickory, two cords dry ouk and half chesinat top wood were entirely consumed, the whole under the superintendence of the aubscribers, members of the committee. The Safes were then cooled off with water, after which they were opened, and the books and papers taken out by the committee and sent to H. A. Lantz's store for public examination, after they were fact caumined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans and Watson were but slightly affected by the meinse heat while those taken from the Safe manufactured by Farrels and Herring were in our judgment damaged fally fifteen per cent, more than those taken from Evans & Watson's Safe.

Ve believe the above to have been a fair and impartial trial of the respective qualities of both safes.
