A Desperate case of Tetter and Barber's lich, exceed by the use of Lindsey's Blood Searcher. I, the uncoisingned, some time in hist March, was severely affilied with what was promounced by my physicians to be a certain kinn of Tetter and Barber's lich. My sondition was one of the greinest misery: my lace was simest constantly raming with the food corruption that excaped from the tubertees, by which it was admost competely covered. After being under the care of my physicians for near two monits, without the feat-born hit. I was induced to make a trial of Lindsey's Blood Searcher and the result was that in using one bottle and a half I found a perfect cure. I may also say that I eagerly fried wintever was resonanced as a cure. Such was my wrethedness that I even resorted to the dangerous experiment of pouring pure ercostee on my face and neck, but all to no puppose—the Blood Searcher was the first and only thing that did me any good. As a blood purifier it is mequalied, and I have great reeson to be grateful that I even made at rail of its healing virtues, and I con confidently recommended to any who may surfer from Tetter, or any other disease arising nom an impure state of the brood. JOHN DELLHEN F. Holindsysburg Fe., Judy 29, 1507.

An interpreting case of serofula cured by one bottle. A Desperate case of Tester and Barber's light, enced

soap and water. About the same time an absects torned just below the groin, which is due time broke and commerced a discharge, which was found impossible to div up or heal—the bed would be very much stated and the clothog of the child perfectly sickenting in a single might's time. Afterhaving the attentions of a physician for so long a time, and finding the child be getting water, we determined to try the effects of Mr. Landsey's Blood Searcher. This was in last March—and before two weeks had passed away the change was momest, and I for happy to say that in the use of a single todic out fittle hoy has been perfectly restored to be about the weather. The work is should be in every family—none should be without it. As a purifier or blood it is beyond all price.

Dr. J. M. Linder, Dear Steel have been using your improved Blood. Scareber since some time last summer, and I deem it to be a matter of duty to bear my testimony to its invigorating, blood restorative virtues. I have been tor a number of years, severely troubled with erysipelas and general debiting, but since I put myself under the influence of your improved Blood. Searcher, I find a very decided improvement. Infleed, my nequantimies frequently remark, that I look so fat and hearty, and know or not offer cause than the use of your improved Blood. Searcher, Judging from my own experience, I believe that this is one of the most valuable medicines that woman can be, especially those who are or have entered upon the decline of life. (From 10 to 30 years of uge.) I feel that it would have been above ingraining on uppear as a within so before the public, I have been a mained solely with relevence to the voice of consecution and day. You are at liberty to make whatever use you may deem proper of this statement.

PHILADELPHIA Manufactured SALAMANDER SAFES No. 26 S. Fourth street, Phila. Truth is mighty and must prepointed to superintend the burning of the Iron Sufes, a Reading, February 27, 1857.

Rending, February 27, 1257.

RRADINO, March 4.

The undersigned, members of the commutee, do respectfully report, that we saw the two Sufes originally agreed upon by Farrel & Herring, and Evans & Waison, placed side by side in a furnace, viz The Sufe in use by the Puymaster of the Philadelphia and Rending Railrond Company, in his office at Rending, manufactured by Farrels & Herring, and the Sufe in use by H. A. Lantz, in his store, manufactured by Evans & Wutson, and put in books precisely silke.

the Safe in use by H. A. Lantz, in his store manafactured by Evans & Watson, and put in books precisely alike.

The fire was started at \$\frac{2}{2}\$ o'clock A. M., and kept up until four cords of green hickory, two cords dry onk and half chesting to produce the superintendence of the subscribers, members of the committee. The Safes were then cooled off with water, after which they were opened, and the books and papers taken out by the committee and sent to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and pupers taken from the Safe manufactured by Evans and Watson were but slightly affected by the intense heat while those taken from the Safe manufactured by Farrels and Herring were in our judgment damaged fully fifteen per cent, more than those taken from Evans & Watson's Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both safes.
