The most Popular Monthly in the word—N. Y. Observer.

No Magazine in Europe or America is so well known, none has half as many renders, and, we may safely say, none has received so large a tribute of admiration from the cultivated classes, that delight in a healthy, diversified, elevating periodical incrinary. It is the foremost Magazine of the day. The fireside never had a more delightful companion, nor the milition a more entertaining front, that Harper's Magazine.—Methodist Protestant. (Baltimore).

Twenty-five cents buys if the cheapest tichest, and most lasting laxury for the mone; thill we know Tiree dollars secures in for one year, and what three dollars ever went so fat? But the same amount in clothes, caning, drawing, miniture, and how much of a substantial lung is obtained? If there, facts, and sentiments hay ca monetary value—above addit the bumor that retreshes, the pleasantines that bring a genite smile, and brighten the passage of a truth to your brain, and the happy combination of the real and the magnative, without which no one can live a hie shove the animal, are to be put into the scale opposite to dollars and cents, then you may be certism that if Harper were three or four times as dear, it would amply repay its price. It is a Magazine proper, with the idea and purpose of a Magazine—not a hook, not a scientific periodical, not yet a supplier or light gosing and chaity micedote—but a magazine that takes every form of interesting, dignified, and aftractive literature in the grasp.—Southern Temes.

Hammonyon Lands. NEW ENGLAND SETTLEMENT.

RARE OPPORTUNITY .-- TO ALL WANTING FARMS-in a healthy place, twenty-five miles

on account of its being in the mistor a great market. Every article raised upon this land finds an immediate sule. The water is excellent, and no such thing as tever is known.

The soil is a sundy or clay loam, with a clay bottom and retartive of manures. It is fee of stones and easily worked. It abounds largely in the physphates, and such is its fertility that from the crops produced both upon this land and the large area adjoining under cultivation, it will be found not to be excelled anywhere in the production of crops most adapted to its market. The reader may be well aware that the earliest and the best fruits and vegetables come from New Jersey, which are annually exported to the amount of millions of dolars. The land, besides being accessible in every way for fertilizers, has an abundant supply of the best quality of muck manure.

Lumber and building materials can be had on the spot at a cheap price, from the mills. Other mills are now being opened, and brick yards being started on the ground. A person can put up a frame tenement for present conventience, for one hundred dollars. On account of the extensive emigration, this is the best ourse to pursue in order to get a place to live in at first. Carpeniers and builders are on hand to put up houses on the best terms.

In setting here the emigrant has many advantages. He is within a few hour's ride of the great cuttes in the Middle Sintes and New England; he is incar his old friends and associations; he is in a settled contry, where every improvement and comfort of civilization is at hand; he is in a healthy place, and is not subject to the certainty of losing the greater part of his family and his own health by those malignant fevers which make the graves of so many millions of the young and hardy in far off regions away from home and frends. Besides, he has a mild climate and open winter.

There are three trains daily to Philadelphia, and to all those who improve the railroad company gives a free ticket.

PURIFY THE BLOOD.

Lindsey's Improved Blood Searcher ages not claim to be a UNIVER-AL PANACEA for every disease known, but the proprietors claim for it the power not only of draining out all impurnies of the blood, but by the skilful combination of well-known vegetable remedies, it will care all diseases nrising from a derranged state of the liver, drive out dyspepsia, and give renewed tone and vigor to the stomach. That the Blood Searcher is all that is claimed for it, the proprietor can produce THE PROOF.

It is only a few years since it was discovered, and yet it has grown into such a business that a large Laboratory has been built expressly for its inamufacture—a large number of men employed in putting it

up, and still the SUPPLY DOES NOT EQUAL THE DEMAND!

We ask any candid man, could this he so, if the Medicine did not possess all the virtues claimed for it?

The proprietors have hundreds of certificates from men of probity and standing in the community, showing what the medicine is doing daily for the suffering. Ask any person who has ever used the Blood Searcher whether reliet was experienced.

Let the afflicted give it a trial—a single bottle will convince the most skeptical of its efficacy.
