WHAT THEY SAY IN SOUTH CAROLINA. Abbeville, S. C. Aug 21, 155. Meases Farrel, Herring & Co. Philiadetphan Gentlemen.—The close attention which our own affairs have required since the fire, has hitherto pre-vended us from wrining von about the Safe. ... On occasion of the fire 19th of Jaly, by which we suffered in large base, our store, with a number of other boildings, was consumed. The Safe, of your manufacture, which we had in the store, was exposed to a most intense heat as is well attested by the ef-fects on its strong iron frame, which, from its flaked and sealy appearance, looks as though it had been heaved for a long time in a furnace. The Safe, with heave of molten glass and kegs of nails, fated into a mars, fell into the cellar, surformed by burning ma-ternsh, and there was, suffered to remain (as the con-tents had been removed before the fire reached us...) and the ed of August. 14 days afterwards. The difficulty in cutting it open with the best tools opened, we found the interior, to the astomshment of alt, entrefy annugreed by fire. This test has so taily convinced us of the capabili-ties of your Safe, that we would not part with the fire of your Safe, that we would not part with the fire of your Safe, that we would not part with the ine we have in the lore na large sum, were we debarred the privilege of getting another.
