WHAT THEY SAY IN SOUTH CAROLINA.

Abbeville, S. C., Aug. 21, 1858.

Messrs Farrel, Herning A. Co., Philadelphia.

Gentlemen—The close attention which our own affares have required since the fire, has hitherto prevented as from writing tou shout the Rafe.

On occasion of the fire light of July, by which we suffered a large lose, our store, with a number of other buildings was consumed. The Safe, of your manufacture which we had in the store, was exposed to a most intense heat, as is well attested by the effects on its strong iron frame, which, from its fluked and scally appearance, looks as though it had been heated for a long time in a furiance. The Safe, with heaps of molien glass and kegs of nnils, fased into a mass, fell into the cellar, surrounded by burning materials, and there was suffered to remain (as the contents had been removed before the fire reached us.) until the 2d of August, 14 days afterwards.

The difficulty in cutting it open with the best tools that could be procured, convinced us of its power to resist the attempts of beginns and when it was opened, we found the interior, to the astomishment of all, entirely uniquered by fire.

This test has so fully convinced us of the capabilities of your Safes, that we would not part with the one we have must over a large som, were we debarred the privilege of getting another. Respectfully yours, R. H. WARDLAW&SON.
