Another Triumph.

To the President of the Prilabelphia, Sept. 29, 1839.

To the President of the Prilabelphia Adricultural Society:—The subscribers, your committee to examine the contents of a Salumander Sufe. of Evans & Watson, after being exposed to a strong free on the Fair Grounds for eight hours, respectfully represent:
That other seven cords of oak wood and three of pine had been consumed around the Safe, it was opened in the presence of the committee, and the contents taken out. a little warmed, but not even scorched.

Several Silver Medals heretolore tectived by the manufacturers, and a large quantity of documents were in the Safe, and came out entirely unnipared.

The experiment satisfied us of the capacity of Sales of this kind to protect contents from any fire to which they may be exposed.

The Committee awarded a Diploma and Silver Medal.

Wilmington, Del., Sept. 17, 1859.—Messes, Evans & Watson Philadelphia:

GEVLEMEN:—The Salamander Fire-Proof Safe of your manufacture, purch sed by us from your agent. Ferri-Re Garren, of our city, some nine months ago, was severely tried by burgiar. Inst Saturday night, and although they had a sledge hammer, cold chisels, drill, and ganpowder, they did not succeed in open ing the Safe. The lock being one of "Halt's Patent Powder proof," they could not get the powder into it, but drilled a hole in the lower panel and forced in a large charge, which was ignited, and although the door, inside and out, showed the explosion not to have been a small one, it was not forced open. We suppose they were the greater part of the uight at work on it. We are much gratified at the result of the attempt to enter it, and if the above facts are of any service, you are at liberty to over them. STILL ANOTHER.

Yours, Truly, BAYNARD & JONES GREAT FIREI—ANOTHER TRIUMPH!!

Knoxville, Tennersee, March 13th, 1850.

Messrs, Evans & Watson, Philadelphia:—Gentlemen—It affords me great pleasure to say to you that the Salamander Sale, which I purchased from you in February, 1859, proved to be what you recommended it—a sure protection from fire. My storehouse, to gether with several others, was burned to the ground in March last. The Safe fell through into the cellur, and was exposed to interne heat for it or eight hours, and when it was taken from the ruins and opened, all its comenia were found to be in a perfect state, the books and the papers not bring injured any whatever. I can cheerfully recommend your Safes to the community, believing, as I do, that they are as user fireproof us it is possible for any Safe to be made.

Improved Patent Stoves, Furnaces and Air Heaters.

A RE now ofered to the public, and are guaranteed A to be the cheapest and most complete working Stovers and Heaters ever offered in the United States. They have proven themselves to be a perfect success. These Stoves and Heaters give you the greatest amount of heat to be obtained out of a given quantity of fuel, and allow no waste heat or gas to waster up the smoke flue, they burning the gas completely and permitting none to leak into the room.

One of these Stoves or Heaters will heat as much at three ordinary stoves, with the fuel that would be used in one. You have then but one-love to buy instead of two or three, which is a saving in first cost in fuel, in wear and 'car of carpets and furniture, trouble in making fre, space required, &c.

They are so arranged that you can distribute the heat throughout the house, all the heat can be used in the rooms above or below, or half used below and half above, as may be desired, at any time. This feature of distributing heat was never before so perfectly attained as in this improvement. In any arrangement ever invented.

We use no external casing over the exterior heating surface to carry heat up stairs. We use no soapr stone or clay cylinder, which crack, clink and prevent radiation, but we use iron cylinders, and prevent them from becoming red hot, burning out and accrelling the air to set upon and arryounds the heat chamber directly over the fire; also, inside the draft chamber, thereby causing the air to set upon and carry off rapidly the heat from all the henting surface internally and externally, thereby securing a great amount of warm air, free of gas, dryness, or of being scorched, or sny unpleasuments used in coal fires, and causing it to circular. It also prevents any part from burning out, it endoon getting red hot in prevents the forming of sulphuric acid, which securing of rapidly the heat from all the henting surface internally and externally, thereby securing a great amount of warm air, free of gas, d

We have now in course of completion a large Cast Iron, Double Air-Heating Furnace for buildings of all description. It has met the approbation of scientific men and those desiring to heat buildings will find it to their advantage to use our Furnaces. In a word, its Editors will use their best endeavors to get up just such a paper as will eventually find its way to every fireside in the land—that shall be a welcome resitor wherever it goes—cqually popular in the workshop and the office—at the fireside of the fartner, or in the counting-room of the merchant—a paper that parents can with aniety place in the hands of their children without note or comment, feeling certain that influence will be to slimulate their minds to the pursuit at knowledge, or lead them to abhor vice and wrong.

OUR CROSH ATTOM AND PROSECTION OUR CIRCULATION AND PROSPECTS.

The New York Weekly has gone up to a circulation which places it second in point of circulation in the list of publications of the day. There is but one weekly publication in the world having a larger circulation than the Weekly. The indications are, at present that the circulation of the Weekly will soon reach half a million. Where the newsmen were taking tens, they are now taking hundreds of copies. This is the general effect among the first theorand News Agenta who are now regularly selling the New Tork Weekly, while from nearly every post office in the country, we are daily getting subscriptions and orders for specimens. daily getting subscriptions and others for speciment.

How and where to get the Weekly.

Wherever there is a News Agent, get the peper from him. By so doing, you do not you the risk of losing your money through the Post Office, or having to pay for what you will never get. If the paper you are buying from the Agent stope, you do not lose advance subscriptions sent to a place where you have no means of looking after it. We trust the day is not far distant when every town, large enough to sessuin a Post Office, will have its News Agency.

New Agricultural Settlement. TO ALL WHO WANT FARMS. RIRE opportunity in a delightful and

neating elimite 25 miles southered of Phindelphia. On the Camden and Atlantic Railroad, New Jercy.

An old estate consisting of several thousands of acres of productive soil has been divided into Farms of various sizes to suit the purchaser. A population of some fifteen hundred, from various parts of the Model States and New England have settled the past year, improved their places, and raised excellent crops. The price of the land is at the low sum of \$15 to \$20 per acrs, the soil is of the best quality for the production of Whent, Clover, Corn, Peaches, Grapes and Vegrinbles. It is considered the best Fruit Soil in the Union. The place is perfectly secure from frosts—the destructive enemy of the fariner. Crops of grain, grass and finit are now growing and can be seen. By examining the place itself, a correct judgment can be towned of the productiveness of the land. The terms are made easy to secure the rapid improvement. The result has been that within the past year, some three hundred houses have been exceed, two mills, one steam, four stores, some forty vineyards and Peach orchards, planted, and a large number of other improvements, making it a desirable and active place of business.

and active place of business
THE MARKET, as the reader may perceive from its location, is the Best in the Union.

Produce bringing double the price than in locations away from the city, and more than double the price than the West. It is known that the earliest and test (raits and vegetables in this initiate come from New Jerses, and are annually exported to the extent of millions.

New Icraes, and are annually exported to the extent of millions.

In locating here, the settler has many advantages, the is within a few hours ride of the great cines of New England and Middle States, he is near the old friends and association, he is in a retiled country where every improvement of comfort and civilization is at hand. It can buy every article he wants at the chaptest price, and sell hit, produce for the highest, (in the West this is reversed,) he has schools for his children, divine service, and will enjoy an open winter, and delightful climate, where fevers are utterly unknown. The result of the change upon those from the north, has generally been to restore them to an excellent state of health.

In the way of building and improving, lumber can be obtained at the mills at the rate of \$10 to \$15 per thousand. Bricks from the brick yard opened in the place, good carpenters are at hand, and there is no place in the Union where buildings and improvements can be made cheaper.

The reader will at once be struck with the advantage of the senter will at once be struck with the advantage of the senter will at once be struck with the advantage of the senter will at once be struck with the advantage of the senter will at once be struck with the advantage of the senter will at once be struck with the advantage of the senter will be advantaged to the senter will at once be struck with the advantage of the senter will be advantaged to the senter will be adva carpenters are at hand, and there is no pince in the Union where buildings and improvements can be made cheaper.

The reader will at once be struck with the advantages here presented, and ask himself why the property has not been taken up before. The reason is, it was never thrown in the market; and unless these statements were correct, no one would be invited to examine the land before purchasing. Thus all are expected to do. They will see land under cultivation, such is the extent of the settlement that they will no doubt, ment persons, from their own aciphorhood; they will winness the improvements and can judge the character of the population. Dr. M'Lane's CELEBRATED VERMIFUGE LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popu-

lar remedies now before the public. We refer to Dr. Chas. M'Lanc's Celebrated Vermisuge and Liver Pills. We do not recommend them as

universal Cure-alls, but simply for what their name purports, viz.: THE VERMIFUGE. For expelling Worms from the human system. It has also been administered with the most satis-

factory results to various Animals subject to Worms. THE LIVER PILLS, For the cure of LIVER COMPLAINTS, all Bilious Derangements, Sick Head-Ache, &c. In cases of

FEVER AND AGUE, preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure. As specifics for the above men-

tioned diseases, they are Unrivaled, and never known to fail when administered in accordance with the directions. Their unprecedented popularity

has induced the proprietors,

FLEMING BROTHERS, PITTSBURGH, PA. to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. M'Lane's Čekbrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner.
