Advent of the Mosquito.

Again the gaunt mosquito comes, That brigand of the night! With all his starving family, To put my dreams to flight. And try and cettle his email bill, And take a draft at sight!

I hear again the dreadful sound That tells me who is near; I hear him wind his horrid horn And whet his poisoned spear: He sounds the battle blast, and ah! I feel that he is here!

I beat the air. I seem to wage With friends an an idle feud: My hopes, like poor Opheliu's, Are blasted in the bud; I'm vanquished in a single round,

And he attains "first blood!" In vain the rank eight I smoke. Quite wild and desperate grown; I try in vain to drive him out, And shut the window down: For still I hear those tranquil pipes, Monotonously drone!

Like Cook among the cannibals, 'Figureless to appeal.
Or like a mummy wind myself
In sheets from head to heel; The hungry wretch has picked me out To make himself a meal!

Hi- sucker, like a burglar's drill, Would pierce on iron door! He loves, as Alexander did,
To wade in human gare!
Like Everett, he is always dry, Like Cobb, a perfect bore.

But yet, his faults may not suffice All merit to efface; For sinner never yet was born Without some spark of grace; Bis failing is philanthrophy, He loves the human race!

He comes by night, as angels do, To chant his southing hymn; He hovereth over the haby's couch Just like the cherubim, By day he wadeth in the swamp; His legs are long and slim.

Oh! hear me to some frozen waste, Where polar tempesis blow! On train oil I will gaze unmoved, Or Greenland's chills of snow, And be content to pass my days Among the Esquimnux

For the Spy. An Australian Sketch. MELBOURNE.

The view from a ship at anchor in Hobsons Bay is very beautiful. To the Westfields of wheat shining like molten gold in interior there are almost interminable plains, the sun, and the dim vision of Mount Macedon faintly looming afar. At the water's edge lies Williamstown, just far enough off to have its deformities hidden by the friendly cloak of distance; to the east Sandridge and its busy cluster of boatmen, the far fame I "Station Peak" in the lack ground, and in front Melbourne itself, with its grown up daughter, Collingwood, looking (thanke to the rising ground on which it is built) a good deal bigger than it really is.

When you sept. 24, 1850. of the roofs seems to be broken at intervals by domas, towers and spires, but in Melbourns the sharpest eye can only detect two little dome-topped towers, one square tower and a very moderate spire. The two domes. somewhat like magnified pepper boxes, belong to the Cathedral, a venerable and exceedingly dirty edifice, presided over by an excellent, though rather slow-coach body of divines, assisted by a staff of subordinate curates, who are serving their apprenticeship here, and occasionally doing journeywork in country parishes. To a stranger it seems odd to see a regiment of soldiers march gravely into church, the privates taking seats reserved for them and the officers mingling their sad coats among the congregation. They have a clerk here too, a stout man with a hearse voice, whose face reminds you of Old Port. Every little while as occasion requires he fires off a loud Amen, with a sharp report, as if he was a musket. The music is very good indeed .-The minister, who to-day is one of the apprentices, entertains us with a short sermon upon "Wars and Rumors of Wars" not much to the edification of the soldiers, who ait bolt appear as if they understood a word about it, with the exception of the drummer, who akes copious notes on the head of his drum. their cocked hats high above their heads lest the fur receive damage, the regiment forms into marching order, the organ strikes up and so does the band and away we all

In the year 1853 there was not a single public library of any note in Melbourne .-There is a small one belonging to the Mechanic's Institute, a species of Lyceum, which is well conducted and pretty well patronized. There were few private libraries numbering more than three or four hundred volumes. Still it was not to be expected that in the infancy of the Colony, and especially a Colony where the main end was money-getting, that much attention should be paid to such things. The new comers thought of other things besides books to afflict humanity with his yarn. I considas neople began to settle and make Ausbegan to come back, and the Mechanic's least half a century. Institute has now a library numbering four of five thousand volumes. These however. are mostly works of the lighter character. Of valuable works of reference there are to call forth thunders of applause. I used comparatively none.

Collingwood and St. Kilda each boast their circulating library and reading room, both upon rather a small scale; and there is a fair attendance at the reading rooms .-The slight demand for valuable works, and the great distance from England render the upright behind their stiff stocks and dont price of books very high, and any increase to either public or private libraries is necessarily very gradual. The news-room is the most frequented. As we go up stairs to bed we hear a faint echo "Of the sait res wave."

The Philosophy of Whist.

Let me start with the declaration that lated by a private nobbler at the bar, the whist includes a large range of high qualities, and a great extent of acquirement .-The great whist-player must have patience, the edibles in charge of the landlord. The charity, forgiveness, forbearance, promptitude, considerable readiness in emergency. fortitude under calamity, a clear fuculty to calculate probabilities, an admirable mem ory, and a spirit at once self-reliant and trustful.
