SEASONABLE HINTS ABOUT PERSONAL COM-FORT. - A thin showl may be made warm by olding a newspaper inside of it. The paper is impervious to the wind and cold air from outside, and prevents the rapid escape of the warm air beneath it. Every one knows that the heat of the body is carried off much more rapidly in a high wind than in a calm. The wind blows away the heat evolved from the body, but in perfectly still air this heat remains, and constitutes an atmospheric envelope so nearly of the same temperature with the body itself that the latter is not so quickly robbed of its natural heat.

BOOUS TELEGRAPH RESPATCHED. The N. Y. Day Book is responsible for saying-"%c greater trash is rublished than the long despatches in the morning papers, purporting to come from Washington. The stuff is written up in the newspaper offices in this city, either from brief genuine dospatches, or from the fertile and foolish imaginations of the scribblers themselves. It would be an unwarrantable imputation upon the sagneity of the conductors of these journals to sup-pose they would really pay for the transmis-sion of such silly gabble all the way from Washington.—It is supposed in some circles that the paper which furnishes the lar-12 gest amount of telegraphic intelligence is ahead of its rivals in enterprise, and this will account for the columns of incoherent. contradictory senseless trash that appears in most of the morning papers."
