From the Mechanics Own. A "Mechanic's Own" Ideas.

Do you suppose a mechanic has no ideas; that he is all muscle and no mind; a pas- tion from both brain and muscle; singular sive wheel horse to do another's bidding, that we should only see a curse in this edict without a single thought of his own? You when all the comforts and conveniences, as

to this conclusion. Mechanics have ideas, are created by it, when the whole foundavaluable ones, too, if they are not always tion and frame-work of civilized life depend "squared and smoothed and fitted" to those upon rightly apportioned mental and physof other men. It frequently happens that ical labor. the thoughts of other men are not fitted to theirs; the glitter of their genial expressions blinds their sight to the wholesome

unvarnished truths with which mechanics are so much in the habit of dealing, and with which from the first of their apprentice-hip they are constantly made familiar. The workshop affords manifold opportuni-

ties for getting facts, but in the usual drift of business favors the mechanic with little time and occasion to store and arrange them, to be "one bred to manual labor"? to dress them up with the embellishment of words, trace the connection with theory, or their application and relation to other facts; so the mind of the mechanic becomes in time more a doing than a talking facultya mind to work, fraught with the genuine fruit of nersevering application, than a mere mean title. If to his measure of skill be colloquial power, abounding with the tinsel-

ing of speech. It is very true the workshop imposes severe tasks upon the beginner, and repeats one of skilled industry.

them often to the hinderance of his head dragging his mind into the grooves of his

cal labor reminds me of a singular phrase

the title of living work, nor even the homely work," as if to say it is work to no purpose.

"busy idleness" of a noonday lounger. An characterized and superseded work. aimless activity besetting a man in the midst of his noble toil is a species of paral-

ysis which rapidly dumpens every spark of resolution he possesses, and must in time transform his willing faculties into a mere

mechanism, clock-wheel like, moving only as they are moved, and never beyond their fixed and appointed rounds. Let every mechanic beware of this inflex.

ible "set" which some men's brains take. There is no need of locking one's mind in the iron case of a degrading empiricism .--

An intellect is in a vice and the stamp of "dead work' is on it when muscle becomes the master mind. Taking a retrospective view of life and its

varied experiences, does it not seem that an immense amount of mind and character is often made to gain a mere "sleight of hand"

darkness, a phantem of living fire. The itary rank, was also destroyed. Months physical wants. very waves of the Scheldt seemed glowing afterwards, his body was discovered adher-It is by the sweat of their mows that mewith the conflagration, while its banks were ing to the timber-work on the bridge, upon chanics are to work out their destinies, which lighted up with a preternatural glare. It the ultimate removal of that structure and probably means a commingling of perspirawas a wild, pompous, theatrical spectacle. The array of soldiers on both sides the river chain which he habitaally wore. Parma along the dykes and upon the bridge, with himself was thrown to the ground, stunned banners waving, and spear and cuirass by a blow on the shoulder from a flying are much mistaken, reader, if you have come well as the "purple and fine linen" of life glancing in the lurid light; the demon fleet, guided by no human hand, wrapped in flame-Now, when on the way to your workshop

muscular force alone, try to supply all their

ask yourselves-what is learning a trade? If it be merely to "shove a jack plane," drive hand-saw, drill holes in a piece of iron after their centres have been "laid out" by the "boss," "chip and file" a rough casting to a plane surface, bore and fit wheels on their respective shafts, or do any common machine work to order-can you consure the great dictionary Johnson for defining a mechanic

But, you will say that is not the true definition. of a mechanic, reminding me that "one well skilled in the art of making machines," is a better one; it certainly presents the subject in a more encouraging way, and dignifies the mechanic with no sank in the stream.

associated all rightful dilligence, he need not be ashamed of his life's labor, if even no more is said of him than that his wea

What will you say when you learn, that "sons . f toil" with a base-born misnomer like boor, with character blemished by low assoused by Cornish miners. When they dig in ciates, habits blackened, like his garments, promising veins but find no ore, they call by the stygean murkiness of his trade, such profitless labor "Dead Work." The and his mind brought up "all standing," process of disclosing expected gain, but by an ever load of "dead-work," were comwithout success, they do not deem worthy petent to design and construct machines. If such be a mechanic I think it will pay name of work, but significantly call it "dead any one to look at the causes of this difference in tradesmen; even a hasty search may

It seems to have a meaning and an appli- reward him with the conviction that it is cation here, and points to a manner of work- due, not so much to the quantity of mere ing, as harmful to the tradesman as the work done, as to the thoughts which have

> There is a higher purpose in labor than see it aright and go about it with a proper

motive and a sincere aim. The mechanic who desires to enrich his life with the wholesome fruit of rightly directed labor, and to attain to the high vartage ground towards which his destiny however, little time to pursue these perilous looks, let him take to heart and remember investigations, and the party soon made

these wor ls: He who firmly resulves upon the actomplishment of any great and good end, hrs by that resolution surmounted the great barriers to it, and he who seizes and determines of derisive laughter. It was but child's play upon the grand idea of self-improvement, they thought to threaten a Spanish army, bacco, a load pencil, a piece of red chalk, will find that idea and determination burn- and a General like Alexander Farnese, with ing like a fire within him to carry out every such paltry fire works as these. Neverthe shoestring, a couple of buttons, a suspender purpose that recommends itself to his favor less all eyes were anxiously fixed upon the buckle and some change. From the latter -will find it searching out new paths, dis-covering means and removing difficulties Hope, which had now drifted very near the two three cent piece, two half dimes,

and flitting through the darkness, with ir- wound killed by the concussion of the air. regular movement, but portentous, aspect, at the caprice of wind and tide; the deathlike stillness of expectation, which had succeeded thd sound of trumpet and the shouts of the soldiers; and the weird glow which had supplanted the darkness-all combined of a ticket. The ticket clerk jerks out the with the sense of imminent and mysterious ticket and jerks in the money almost in an danger to excite and oppress the imagination. Presently, the Spaniards, as they gazed from the bridge, began to take heart again. One after another, many of the lesser vessels

dignifies toil by mental activity, is more spring. As the fleet of vessels dropped boats in the centre of the river. The

than a match for a legion of those who, by slowly down the river, they suddenly be veteran Robles, Seigneur de Billy, a Portu-

drifted blindly against the raft, where they entangled themselves among the hooks and gigantic spear-heads, and burned slowly out without causing any extensive conflagration. Others grounded on the banks of the river, before reaching their destination. Some

Last of all came the two infernations, swaying unsteadily with the current; the pilots, of course, as they neared the bridge, having noiselessly effected their escape in the skiffs. The slight fire upon the deck searcely illuminated the dark, phantom like

work blunting his mental sensibilities, and this same lexicographer stigmatized the hulls. Both were carried by the current clear of the raft, which, by a great error of labor. The depressing tendency of physi- this- "a mean, vulgar fellow." As if a judgement, as it now as peared, on the part of the builders, had only been made to protect the floating portion of the bridge. The Fortune came first staggering inside the raft and then lurching clumsily against the dyke, and grounding near Kalloo, without touching the bridge. There was a moments panof expectation. At last the slow match upon the deck burned out, and there was faint and partial explosion, by which little

or no damage was produced. Parma instantly called for volunteers to board the mysterious vessel. The desperate expedition was headed by the bold Rowland Yorke, a Londoner, of whom one day there merely to get a "job done," if we can only was more to be heard in Netherland history. The party now sprung into the deserted and now harmless volcano, extinguishing

the slight fires that were smouldering on the

deck, and thrusting spears and poles into

the hidden recesses of the hold. There, was
