Touching the Hand.

The hand is the most perfect instrument which God has given for the use and study. of min. It is replete with the clearest widence of the most wonderful design. By it we obtain a more complete knowledge of the properties of matter than by any other organ of touch. The eye alone could never communicate to the mind many of the quatries of external things-size, distance. position. The muscles of the shoulder, arm, wrist, and those disposed about the arm it self, give this member astonishing f cility n performing the multitudinous operations n which we use it-grasping, reaching, oulling, thrusting, &c. There is a meaning in the inequalities of the fingers-the irming them at the tips with a horny substance—in the separation of the thumb from the four digits by a bed of muscle. Then only consider its beauty:

"What!" said he, as he took the hardened hand of a lat over whose vote he solicited, "do you walk on your hands?" Byron was of opinion that there was noth ing more distinctive of birth than the hand, and that it is almost the only sign of blood aristocracy can generate. In the second series of Sir Henry Ellis' "Historical Letters," there is one from a Venetian minister, who was in England at the time Elizabeth ascended the throne, and he describes her as a lady " great elegance, both of mind and body; her eves be cutiful, and, above all, her hands which she did not conceal, "e sospra il tutto bella mano de la quale fa professione."-Whilst I am quoting from the Italians, I may as well mention that Gr denigo, orate, di Roma, describes Leo X, as "of a most a ble stature, with a very large head, and with hands superlatively beautiful;" and, accordingly, in Raphael's famous picture ... the Pope at Florence, the hands are care fully printed, Forssart mentions a certai Gaston de Foix surnamed Phæbus, who had remarkably "fine, long, and straight" fingers. Ever since the mortal taste of forbidden woe into the world, there has been no object more eagerly and perseveringly sought ofter by man than an acquaintance after futurity. It is quite certain that, except so far as God has been pleased to make an express revelation, man's attempts to ren der the veil transparent have been entirely fruitless; yet he has often deceived himself with the idea that some nostrum had answered his purpose. He has consulted the of beasts and fowls; and he has read on the table of his hand a portraiture of his life.— "Cardan," saith the credulous Sir Thomas Brown, in a letter to his friend, "hath a peculiar and no hard observation from a man's hand, to know whether he was born in the day or night; which, I confess, holdeth in my own."
