To attempt to cure bad legs by plastering the edges of the wound together is folly; for should the skin unite, a longy diseased condition remains undermeath to break out with ten fold fury in a few days. Any of the above discusers may be cured by well rabbing the Omitment three times a day into the chest, throat and neck of the patient; it will soon externate and give tomediate relief. Medicine taken by the mouth must operate upon the whole system ere its influence can be tell in any local part, whereas the Omment will do its work at once. Whoever tries the anguent in the above manner for the discuss a sained, or any similar disorders affection the chest of throat, will find themselves relieved as by a charm

Piles, Fistulus, Strictures.

The above and an companies will be removed by nigitly fomening the parts with warm where and then by most effectually rubbing in the Onament—Persons suffering from these direful complaints should lose not a moment in arresting their progress. It should be understood that it is not sufficient inverty to smear the Unitment on the effected parts, but it must be well rubbes in for some considerable time two or three times a day, that it may be taken into the system, whence it will remove any hidden sore or wound as effectually as though paipaids to the eye. There again bread and water positives, after the rubbing in of the Unitment, will do great service—This is the only sure treatment for firmles, causes of cancer in the stomach, or where there may be a general bearing down.
