Fault Finders. This class of persons have cursed the progress of every entorprise, since the world began to brighten under the prom-

ise of final redemption. There is a class of people, ever ready to catch at every failure or indication of failure, to condemn the plan of oppera-

These fault-finders are a very ancient tribe of people. They had their representatives among the Patriarchs of old. They kept the line of their lineage down to the days of Christ. Pilate was not a fault-finder, although he was surrounded by a whole rotinue of his race. One thing has always offeractorized this people. They have never been doors. They have never accomplished much for the good of the race. They can never find a proper place in which to work. They are the critic of the laborers of the earnest workers in life's great work shops.

What skillful and accomplished Generals there are, who have stayed home from the war. These are found at the corner of every street. In the exercise of an unquestioned right, they criticise the movements of the army. If every move is not a victory, they charge the failure, of course, to the imperfect plan.

There is nothing so strange as the shortsightedness of the Executive and the Generals. Alas! that so much wisdom should be pent up at home. Alas! that the army could not have the profit of this skill and experience. But, then, fault-finders are a positive curse to all progress. They are not the friends who kindly advise, but self appointed critics, who talk only of failures and faults. Go to work my friends, and give a practical demonstration of your superior skill. We expect that this kind of buzzards will follow in the wake of the Union army to catch at what may appear to be faults.

THE WAR.

Everything appears to be going on well with our army. General Lee has retreated beyond the South Anna river, surely advancing. About one thousand prisoners were captured on Tuesday.

General Butler, in a despatch from Headquarters in the Field, reports that sharp about it. But Noukosmos! n currency, and are of equal convenience s a permanent or temporary investment It is believed that no securities offer so great inducements to lenders as the various escriptions of U.S. Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for in sums from \$50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

It may be useful to state in this contion that the total Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was \$768,965,000. The interest on this debt for the coming fiscal year will be \$45,937,126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1864, has been so far at the rate of over \$100,000. 000 per annum.

It will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasurer for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to \$150,000,000 per annum. Instructions to the National Banks acting

as loan agents were not issued from the

United States Treasury until March 26th, but in the first three weeks of April the subscriptions averaged more than TEN MILLIONS A WEEK. Subscriptions will be received by the First National Bank of Philadelphia, Pa.

Great Central Fair,

FOR THE SANITARY COMMISSION.

OFFICE OF THE COMMITTER ON LABOR, INCOMES AND REVISUES, No. 118 Sorm 778 Sr., PRILL, APRIL 4, 1864.

The Committee on "Labon, Income and Revenues," invite co-operation with them in the particular work for which they have been appointed. As no portion of the people are more particular than the working men and women of the country, it is but just and proper that they should alike have an opportunity to contribute to the objects of the Fair. The most equable, plan for accomplishing this, and, at the same time the ensiest one, is to ask for the contribution of a SINGLE DAY'S LABOR from all classes in the community. Many will contribute a day of their labor willingly, who would not subscribe their money. To reach every department of industry and art will be a work of great labor, but, if attained, will be productive of immense results.

The success of the plan will depend upon the hearty co-operation of every element of influence within our limits, and we invite all the guardians of the industrial interests, and all others to take hold with reserve. EVENUES, No. 118 South 7th St., Phila., April 4, 1864

all the guardians of the industrial interests, and all others, to take hold with us in furthering this great work of patriotism and humanity.

The Committee is charged with the following days to with the sollowing days and the sollowing days and the sollowing days are sollowed as the sollowing days and the sollowing days are sollowed as the sollowing days are sollowed as the sollowing days are sollowed as the sollowed days are sollowed days and the sollowed days are sollowed days are sollowed days and the sollowed days are sollowed days.

The Committee scharged with the following duty, to wit:

First.—To obtain the contribution of fone day's labor," or earnings, from every artisan and laborer, foremun, operative and employee; president, cashier, teller and clerk of every incorporated and unincorporated comments. employee; president, cashier, teller and clerk of every incorporated and unincorporated company, railroad and express company, employing firm, bank, manufactory, fron works, oil works, mill, mine and public office; from every private banker and broker, importer, auctioneer and merchant; clerk, agent and salesman: designer, fuisher and artist; publisher, printer and mechanic; from every government officer, contractor and employee; grocer, butcher, baker and dealer; farmer, horticulturist and producer; from every mantua maker, milliner and female operative; every individual engaged in turning the soil, tending the loom, or in any way carning a livelihood, or building a fortune within the States of Pennsylvania, New Jersey and Delaware. Second.—To obtain the contribution of one day's "Revenue." from all the great employing establishments, firms, corporations, companies, railroads and works.

THIRD.—To obtain the contributions of one day's income from every retired person, and person of fortune—male and female—living upon their means, and from all cler-

and person of fortune—male and female—living upon their means, and from all elergymen, lawyers, physicians, dentists, editors, authors and professors; all other persons engaged in the learned or other professions.

fessions.

Much of this work must be performed by the personal influence and efforts of Indies and gentlemen associated, or to be associated with the Committee in carrying out this plan.

The Committee feel the responsibility of the work that have undertaken which to

with the Committee in carrying out this plan.

The Committee feel the responsibility of the work they have undertaken, which to be successful, will require a very perfect ramification of their plan, and they therefore call upon all earnest people, to assemble themselves together in overy town township, and counties, and form organizations of ladies and gentlemen to co-operate with them in this great work and labor of love. In the manufacturing counties, the coal and oil regions, and in the agricultural districts,—especially, let there be organizations in the large towns, so that the young people may have an opportunity thus to render assistance to their relatives and friends righting the battles of their country in the armies of the nation.

The work of this Committee may be prosecuted where no other effort can be made for the Fair, as in the mines of the coal regions. A day's carrings of the miners, and a day's product of the mines, can be obtained, where no portable article could be procured for transportation. Indeed there is no part or section of these States where the day's labor may not be obtained, iforganizations can be formed to reach them.—The Committee cannot close without urging upon all Proprietors of Establishments, the duty of taking prompt and energetic action to secure the benefit of the day of tabor from all within their control.

The Committee deem it unnessary to do more, than thus to present the subjects to the people of the three States named. In the coming campaigns of our armies, the labors of the "Sanitary Commission" will be greatly augmented. By the first of June 700,000 men—one of the largest armies of modern times—will be operating in the field So large a force, scattered over regions to which the men are unacclimated, must necessarily carry along with its large amount of sickness, suffering and death, to say nothing of the gathered horrors of the battle-field.

These sufferings, it is our bouden duties, as men and Christians, to relieve. A great

nothing of the gathered horrors of the pattle-field.

These sufferings, it is our bonden duties, as men and Christiaus, to relieve. A great and enlightened people, enjoying the blessings of a government of their own making, cannot refuse assistance to men suffering to maintain its anthority, and we will not believe that the "GREAT CENTRAL FAIR," drawing its products from the three States of Penniylvania, New Jersey and Delaware, so affluent in all mineral, agri and AFFORD EVERY FACILITY TO

States of Penniylvania, New Jersey and Delaware, so affluent in all mineral, agricultural and industrial wealth, shall ful behind any similar effort which has yo been made for the relief of the Nation's children.

As it is desirable not to multiply circulturs; no further authority than this circular will be necessary for any employing firm or company, or any respectable committee of tadies and gentlemen, to proceed at once, in the work of this committee: and it is hoped that under it, organizations will spring up in all the towns and busy regions of the States of Pennsylvania, New Jersey and Delaware.

Subscriptions will be thankfully acknowledged in the newspapers of Philadelphia; and it is very desirable that they commence soon, as each fresh acknowledgment will stimulate effort in other localities.

All subscriptions should be addressed to MAN CAGHON TOTAL
