Improve the Mind.

Let us form Libraries, Reading Circles or Lyceums, whereby the minds of our young men may be improved. We think this a subject of vital interest to the community. One of the most dangerous and demoralizing practices of young men is that which is vulgarly called killing time: Their nature peeds recreation and amusement; they seek associations such as exist about them, from which their habits and morals are formed We have several fraternal associations that meet perhaps once a week or once a tion, are engraved upon the mind unper- are they !- Blackwood's Magazine. ceived; whose influence is felt wherever they exist, and whose fruits will be seen

We therefore suggest, that those of our welfare and morality to make an effort to induce our young men to form associabe benefited.

The peace and good will which has prevailed in the School and its increasing numbers, testify to the wisdom of the course pursued To correct reports which are in circulation it is stated that Girls, as day scholars, will be admitted into the institution as heretofore. The Academic year of ten months has been divided into three terals, instead of four quarters, the first of which commences on the 7th of Sept. The rates of tuition are the same as heretofore. It is earnestly desired that Students enter at the opening of the term. and that their attendance be as regular as possible, as but little progress can be made unless they are regular in attend-

ance as well as studious. The advantages of such an institution to Columbia are obvious to all. Its establishment with forty or fifty boarders would bring annually into the place several thousand dollars so that there is not a merchant or any business man who is not directly or indirectly, pocuniarily interested in its success. To those who wish to give their children a liberal education it is a saving of three fourths the expense necessary to send them from home to enjoy like privileges. But the mere pecuniary advantages, however great, are nothing compared with the invantages such an institution affords. To H. S. ALEXANDER.

THE Dividend of Profits is made in Jan-

THE Dividend of Profits is made in January of each year. It is allowed upon every payment of Premium made, and it is placed to the credit of the Pohcy. In case of the death of the party insured, it will be payable together with and in addition to the amount insured.

For instance, suppose the premium paid to the Company to be \$100 per annum, and the dividend equals //fty per cent. After the fourth year, the party insured will pay the Company, for the next year, only \$50 premium on his insurance. After the fourth year, the Policy holder receives his dividends aptually.

When the premium amounts to fifty dollars or more, anually, one-half may be paid in a note at twelve months with interest. In such cases the Company retains four notes against the policy, but there is a corresponding number of dividends standing to the credit of the policy, and the dividends will be paid in said notes.

This plan enables the insured to realize his profits, during lifetime, and this is much to be prefered to the system of adding to the amount insured, and the continuadce of the high rate of premium during the whole life.
