P. SHREINER & SON, Front Street, near Old Bridge.

THOCKING ACCIDENTS.

MANY KILLED AND A LARGE NUM-BER WOUNDED. Over two hundred accidents from kicking and running away of horses occurred during the past year, in Lancaster county alone nearly all of which resulted in injuring the drivers, killing some, maining and wounding others, and in most cases, breaking costly carriages and hurting the horses

horses.

Of the above, nine-tenths were tame family horses. The safety bridle will put an end to all such needless accidents, and an end to all such needless accidents, and with the Safety Lines the speed of every horse is easily much increased.

At the speedal meeting of the Saddlers of Lancaster city, Nov. 27, 1855, the following resolutions were unanimously adopted:

WHEREAS, The usefulness, power and safety of Dr. Hartman's Safety Bridle and Lines have been publicly demonstrated demonstrated in the presence of from one thousand to fifteen hundred persons to their entire satisfaction; and since it was proven at the Millersville horse exhibition on four of the most vicious and confirmed kickers and runaways, that with the Safety-Bridle and Lines it is utterly impossible for a horse either to kick or runaway;

for a horse either to kick or runaway; therefore Resolved, That we the Saddlers of Laneaster county, Pa., believe that the Safety Bridle and Lines accomplish all and even more, than is claimed by the patentee, in preventing horses from kicking and run-

ning away.

Resolved, that in view of the above facts Resolved, that in view of the above facts we deem it our legitimate duty, both individually and collectively, to exert all honorable means to at once introduce the Bridle and Lines, because in doing so we in a very great measure prevent all accidents with horses, while with the old and defective bridle we put in great jeopardy both life and limb.

Resolved, That hereafter we manufacture no other but Safety Bridles, unless especially ordered.

no other but Safety Bridles, unless especially ordered.

The price of individual Rights is \$5 each; County Rights, from 100.00 to 500.00 according to population—these containing large cities excepted.

No other investment before the public presents such inducements of making money. In every county there are at least twenty townships, and in each township at least one hundred persons who drive horses—which at five dollars for an individual right will amount to \$500 per town-

at least one hundred persons who drive horses—which at five dollars for an individual right will amount to \$500 per township, and ten thousand dollars (\$10,000) for each county at the rate of twenty townsnips at five hundred dollars each! I have not the least doubt but that amount of money can be made out of a county with proper business tact and energy. The price of counties is so small as to place the investment, in the hands of every one, for few are so poor as to be unable to raise one hundred dollars.

Another feature about this invention is that the proprietor of the territory need not manufacture the bridles and lines as the ordinary bridle can be easily altered into a Safety. The lines only require to be made to order, and these can be made by any saddler for a trifle more than the ordinary lines. Hence, unlike other patents, the right to use it only is sold.

No man need wish for a greater fortune than right of a State. To show the confidence the patantee has in his invention, he offers to pay 1,000 dollars for any horse that can either kick or run away when under the influence of the Safety Bridle and Lines. For County and State rights address for circular, and for Individual Rights, enclose five dollars to S. B. Hartman, Millersville, Lancaster co., Pa. dec. 9 tf
