Hints to Skaters. As the season for skating is at hand,

the following excellent advice to those who indulge in the inspiriting recreation, from a wise authority in such matters, will be found worthy of attention. The preservation of health is an art of great-DRUGS.
MEDICINES, er importance than the restoration of health; yet few take the necessary precautions in keeping well;

Skating is one of the most exbilarating of all pastimes, whether on the ice or over our parlor or hall floors, with roller skates. A number of lives have been lost in connection with skating, the following suggestions are made:

I. Avoid skates which are strapped on the feet as they prevent the circulation, and the foot becomes frozen before the skater is aware of it, because the deprives it of feeling. A young lady in tention of the public. tight strapping benumbs the foot and Boston lost a foot in this way; another, in a fresh lot of pure and reliable New York, her life, by endeavoring to which receive the forepart of the foot in a kind of toe, and stout leather around the heel, buckling in front of the ankle only, thus keeping the heel in place without spikes or screws, and aiding greatly in supporting the ankle.

· 2. It is not the object so much to skate fast as to skate gracefully; and this Dr. W. S. McCORKLE is sooner and more easily learned by skating with deliberation; while it prevents over heating, and diminishes the story of the story of fancy goods, perfumers and fine story of the story vents over heating, and diminishes the chances of taking cold by cooling off too soon afterward.

3. If the wind is blowing, a veil should be worn over the face, at least by ladies and by children, otherwise, fatal inflamation of the lungs, 'pneumonia,' may take place.

4. Do not sit down to rest a single half minute; nor do not stand still if there is any wind; nor stop a moment after the strategy are taken offthut walk about so as by Low & Son, London, Archive, Education of the state of skates are taken off; but walk about so as to restore the circulation about the feet shades are taken off; but walk about so as by Low & Son, London. American, English and French Tooth and Hair Brushos in every variety. and toes and to prevent being chilled. 5. It is safer to walk home than to ride the latter is almost certain to give a cold.

6. Never carry anything in the mouth while skating, nor any hard substance in the hand, nor throw anything on the ice; none but a careless, reckless fellow would thus endanger a fellow skater a fall.

7. If the thermometer is below thirty, and the win t is blowing, no lady or child should be skating.

8. Always keep your eyes about you, looking ahead and upward, not on the ice that you may not run against some lady, schild, or learner.

9. Arrange to have an extra garment, thick and heavy, to throw over your shoulders the moment you cease skating, and then walk home, or at least half a mile, with your mouth closed, so that the lungs may not be quickly chilled by the by the cold air dashing upon them through the open mouth, if it passes through the nose and head, it is warmed

10. It would be a safe rule for no child or lady to be on skates longer than an hour at a time.-Hall's Journal of Health.

before it gets to the lungs.

-Don't be foolish."-You can make Six Dollars from Fifty Cent: Call and examine an invention urgently needed by everybody.
