under which this gloomy prophecy is Plain Mourning Goods, made. The necessary conditions for its fulfillment are, in general terms, a failure of the grops during the present year, and bad management on the part of those having charge of the finances. These are necessary to create any serious, widespread disturbances in business affairs, but what reason is there to expect them? So far the reports in regard to the crops are encouraging, and particularly is this the case from all sections of the South. The signs are said to be most propitious, and there is a prevalent belief that a kind Providence is about to smile on the land, blessing it with plenty and relieving the wants of those who have suffered long and bitterly. We have also abundant promise in the past able management of Secretary McCulloch that his administration of the finances will not be wanting in the skill requisite to the emergency. In this aspect of the financial situation, there is really nothing on which to base misfortune-rather it is an earnest of increased prosperity, and while it remains unchanged we may look forward to a steady falling off in priceseasier living-less speculation, and greater security.

If had long seen and feit the want of some reme-dy which would strike at the root of disease, and so prevent much of the suffering which the human lamity was then compelled to endure. The great question was presented to his mind overy day in vivid colors as he moved among the sick and dying, and observed the inefficiency of nearly all the remedios then in use. Thus he was lead to think and experiment; and after ten years of study and habor, he presented to his fellow-man the wonder ful Zinguri Bittels. The effect of this prop-station in the prevention and cure of disease, was so marvellous and asionishing, that the most flat-tering marks of royal favor were bestowed upon him who discovered it. Immediately after the bile my hand swelled to a very large size, and the poison appeared to be work-ing up my arm. I suffered great pain in my hand and arm; I had to quit work and was afraid I would be compelled to have my hand amputated. I came to you, and by your advice washed my hand and arm with your Herb Bitters at the same time taking it inwardly. In eleven days I was able to go to work again. The old saying that an ounce of prevention is worth a pound of cure, applies with mirvelous force to cholera, and therefore any remedy that will pro-tect us against this territhe disease should be freely and persistently used. All pathologists now agree that the cholera poison acts on the excretery organs, and keeps them in working order, must prevent a sufficient accumula-tion of the poison to exercitis terrible elfects on the organism.
