Preserve the Trees There is a great want of reflection in the American husbandman as to the gross neglect and wilful waste of the forests. Every where is the old woods being felled by the pioneer's axe, and destroyed by the conflagrations. The new settler clears in a single year more acres than he can really cultivate in ten. And this totally independent of the legitimate consumption of trees for ship-buildings, the arts, manufactures, plank-roads, railroads, firewood, &c., to the amount annually of millions of dollars. Independent of the beauty of trees in our country, where exposure, in consequence of the remarkable clearness of the atmosphere, to the burning heat of the sun is great, the use of trees for shade is evident. A tree is both a shade and a pleasure to a house. The plainest looking house looks beautiful, if it has a grass-plot before it shaded with a tree. Trees should be planted not only by dwelling houses, but they should be in every pasture, by watering places, and near every barn-wherever cattle, horses or sheep are. Animals are so grateful for a shade from the burning snn, as pay back thanks in the shape of

milk, ticece, and strength for the favor. Trees also improve a soil. The roots by penetrating deeply into the ground, let in the air to produce their slow but sure effects. The radicles decompose the grains of sand, and extract from them some of the elements essential to the soil. They drink in the carbonic acid formed beneath, and thus purify the air while nourishing themselves. The annual deposit of leaves, and the final decay of the branches and trunk go to constitute the mould upon which other plants grow. And the soil thus formed is not so liable to be washed away, as that on uncovered rocks, and the sides of mountains.

Trees also serve as conductors of lightning, and thus give activity to the vital powers of plants, and causes the clouds to discharge their contents upon the earth. A few trees on the summit of a hill are sufficient to produce this effect. A thunder cloud which will pass over a bare mountain unbroken, will pour down its gladdening moisture, if its electricity is drawn off by these natural conductors. It is probable that much of the sterility of Mexico, Spain, &c., is owing to the destruction of the forests; for these not only shade the ground in the summer, but coat the earth and keep it warm in winter. It is stated that in Honduras the first mahogany cutters found the cold so great under the immense forests, that they were obliged to kindle fires to keep themselves warm, though within 16° of the equator. Rain falling on the woods of a hill-side is retained by the deep spongy mass formed by the leaves, instead of it rushing down and carrying away loose soil. Trees also equalize the temperature, and proteet from the extremes of heat and cold. dryness and humidity. Trees protect houses, barns, &c., as forests protect a country from the violence of winds. Sugar plantations existed in the valley of Mexico in the time of Curtez, but the cutting down the trees has rendered the spot now too cold for the sugar cane to thrive. The laws of atmospheric motion show that a bare hill gives no protection. The wind pours over it as water over a dam, but if the hill be capped with trees, the wind is broken into spray, and its violence sensibly diminished. On the prairies of Illinois, the wind often blows a gale so violent as to render men unable to stand. Settlers are obliged to shelter their habitations under the lea of forests or promontories. Forests not only protect from winds but protect their formation. The air resting over a broken surface can not be rapidly heated to a uniformly high temperature, so as to rise upwards in great masses and create a violent wind. An English farmer has justly observed that the local climate of any country may

be bordered with rows of trees, so that cattle may now and them browse in the From these and a thousand other considerations easily suggested, it must be apparent how important that the wanton waste of them should be stayed, and supplies provided for the wants of those spots now destitute. Some one has said, "put up a picture in your room," and we say, stud your homestead, and your fields with

HAIR PREPARATION'S. REPARATOR CAPILLI,

Throw away your labse frizzes, your switches your wig—
lestructive of comfort, and not worth a fig;
Come aged, come youthful, come aged, and fair,
And rejoice in your own luxuriant hair. REPARATOR CAPILLI.

REPARATOR CAPILLI.

For restoring hair upon bald heads (from whatever cause it may larve failen out) and forcing a growth of hair upon the face, it has no equal. It will force the beard to grow upon the smoothest face in from five to eight weeks, or hair upon bald-heads in from two to three months. A few ignorant princticloners have asserted that there is nothing that will force or hasten the growth of the hair or beard. Their assertions are false, as thousands of living witnesses (from their own experience) can bear witness. But many will say, how are we to distinguish the genuine from the spurious? It certainly is difficult, as ninetenths of the different Preparations advertised for the hair and beard are entirely worthless, and you may have already thrown away large amounts in their purchase. To such we would say try the Reparator Cappilli; it will cost you nothing unless if fully comes up to our representations. If your Druggist does not keep it, send to one dollar and we will forward it, postpaid, together with a receipt for the money, which will be returned to you on application, providing entire satisfaction is not given.

Madame H. A. PERRIGO.

Madame H. A. PERRIGO.

She reveals secrets no mortal ever knew. She restores to happiness those who, from dolent events, catastrophes, crosses in love, loss of relations and friends, loss of money, &c., have become despondent. She brings together those long separated, gives information concerning absent friends or lovers, restores lost or stolen property, tells you the business you are best qualified to pursue and in what you will be most successful, causes speedy marriages and tells you the very day you will marry, gives you the name, likeness and characteristics of the person. She reads your very thoughts, and by her almost supernatural powers unveils the dark and, aidden mysteries of the future. From the stars we see the firmment—the maletic stars that overcome or predominate in the configuration—from the aspects and positions of the planets and the fixed stars in the heavens at the time of birth, she deduces the future destiny of man. Fail not to consult the greatest Astrolegist, on earth. It costs you but a trifle, and you may never again have so favorable an opportunity. Consultation fee, with likeness and all desired information, \$1. Parties living at a distance can consult the Madaine by mail with equal safety and satisfaction to themselves, as if in person. A full and explicit chart, written out, with all inquiries answered and likeness enclosed, sent by mail on receipt of price above mentioned. The strictest secrecy will be maintained, and all correspondence returned or destroyed. References of the highest order furnished those destring them. Write plainly the day of the month and year in which you were born, enclosing a smail lock of lair.

MISHLER'S COLUMN. MISHLER'S BITTERS WILL CURE

INTERMITTENT AND REMITTENT FEVER Intermittent Fever is similar to Fever and Ague and its origin can be traced to the same causes. As its name implies it is remittent in its effect, recurring at stated periods. As in Fever and Ague this disease is preceded by a dull, listless feeling. Soon the Fever, accompanied by a violent headache, comes on. After raging a length of time it disappears for a few hours, only to return with increased severity, and leaving the sufferer prostrated mentalty and physically. In ordinasy practice the first resort of the physician in the treatment of this complaint is quinine and mercury. The disease by this treatment is checked—not cured—and is liable at any time to return.

MISHLER'S BITTERS

WILL CURE

CHOLERA. Mishler's Bitters curcs effectually all such Mishler's Bitters cures effectually all such cases by inducing a healthy action of the Liver and by their unsurpassed tonic properties prevent a recurrence of the disease.

When Mishler's Bitters were first introduced to the public the propriotor did not feel justified in recommending it as a specific for Cholera During the fall of 1865, Dr. Mishler received the following note from Jacob L. Baker, Esq., of Lancaster Pa., a member of the Philadelphia College of Pharmacy. Mr. Baker had a great deal of experience in the treatment of Cholera is a druggist of sixteen years standing was Hospital Steward in the Jefferson Hospital, Philadelphia, for three years, and is withal a gentleman of undoubted integrity and one in whose statement the most implicit confidence can be placed:

Lancaster, November 3d, 1865.

Dr. Mishler—Dear Sir:—Knowing that the Cholera with its dreadful ravages is now up on our land, and knowing that no medicine now in our country possesses such a caloric influence "which is the vital reme-

up on our land, and knowing that no medi-cine now in our country possesses such a entoric influence "which is the vital reme-dy for all diseases of this kind," as the Bitters you now making I request you to prepare such a quantity of your bitter as would suit all demands, as I assure you they will be an invaluable remedy, and will be hailed as a blessing by all who will use it

would suit all demands, as I assure you they will be an invaluable remedy, and will be hailed as a blessing by all who will use it.

Yours respectfully.

JACOB L. BAKER.

Being thus urged, and having noticed the Bitters were constantly curing the most violent cases of Diarrhea, Cholera Morbus and kindred complaints, Dr. Mishler at last offered his compounds as a cure for Cholera The result has exceeded his most sanguine expectations and fully justifies all that Mr. Baker says in his note. It certainly proves that Mr. Baker's practical knowledge of nedicine far exceeds that of most doctors who too often dose their patients with deleterious drugs on some absurd theory.—For the purpose of showing that Mishler's Horb Bitters will cure Cholera we give below a few facts.

All intelligent persons who have investigated the origin of cholera, agree that it is caused by poison introduced and generated into the system by impure water, dampness, filth and over-crowded rooms with deficient ventilation. This is proved by the fact that cholera always rages worse on board of ships where all of the above causes are found more or less combined. To cure cholera, and also to prevent it, it is necessary to nentralize this position, and that Mishler's Bitters will do this is proven by the following:

The steamship Virginia, arrived at the Port of New York about the middle of April with cholera a board a number of the passengers, having died during the voyage with this complaint. Among the passengers were a family named Schmith, from Baden, Germany. This family was attacked with cholera. Fortunately for them they had friends living in this city 1 ancaster, Pa.,) who knew the virtues of Mishler's Bitters and who procured a bottle and sent it to the Schmith family. When this package arrived at Quarantine, the doctors examined it and confiscated the contents. Another bottle was procured and packed in a more secure manner: it safely reached the Schmiths. On its arrival aboard the Virginia, Henry Schmith and Christ, Schmith were both labo so instantaneous was the relief be experienced that he gave it to his wife and brother

both of whom it at once relieved. They used the entire contents of the bottle and all three were so much relieved that the physicians permitted them to leave the Virginia, after being confined at quarantine Virginia, after being confined at quarantine aboard that scourge ship forty-two says.—The Schmiths proceeded to their relatives in Lancaster, and at an early opportunity called on Dr. Mishler to express their gratitude for the timely relief they had found in his Bitters. Mr Henry Schmith stated that all the compounds the doctors had given him did no good, but that one glass of Mishler's Bitters made him feel like a new man, warming his whole system, giving him a healthful heat and causing him to perspire freely. His statement was substantially was substantially as given above, and he further said that if the doctors had not kept the first bottle from reaching him, his son would yet hrve been living. Mrs. Schmith was still weak from the effect of cholera, but the continued use of the Bitters were most surely restoring her accustomed vigor.

It is not to be excepted that provide M. of the Bitters were most surely restoring her accustomed vigor.

It is not to be expected that regular M, Os. will admit that any remedy not to be found in the Dispensatory will cure Cholera or any other complaint, but candor compels Dr. D. H. Bissell of the Cholera Hospital ship "Falcon" to admit that he believes Mishler's Bitters to be a "very good Tonic." In reply as to a case of Bitters that was sent to him by a well known gentleman of Lancaster, he writes as follows:

gentleman of Lancaster, he writes as follows:

Hospital Ship Falcon,
Quarantin, New York, June 7th, 1866.
George S. Rowbotham, E.q.— Dear Sir:
Yours of the 23d, inst. is to hand. In reply, I beg leave to say, that I received the case of Bitters you sent me for trial &c., that I gave them to the convalescents in Hospital. I believe them to be a very good tonic Bitters, well adapted to all cases requiring Tonic remedies.

D. H. BISSELL, Physician,
Hospital Ship "Falcon."
This letter from Dr. Bissell, just after the reception of the Bitters, and before he had time and opportunity to thoroughly test their wonderful medicinal properties is considered an important endorsement, as that gentleman to-day occupies the most important position of any physician in America. The passengers and crews o emigrant and merchant vessels that arrive in the Port of New York from foreign countries, are subject to his inspection and control, and the great experience he has had in the management of that dreadful disease, Cholera, gives an endorsement by him an unusual importance. This letter together with the statement of the Schmith family—who while in the Steamer Virginia, were under Dr. Bissell's control, shows what the Bitters have done and can do.

Another case of Cholera cured by Mishshows what the Bitters have done and can do.

Another case of Cholera cured by Mishler's Herb Bitters is that of Mr. Pearsol of York county, who, after suffering severely from all the symptons of Cholera, finally became collapsed and while in this state, the doctors stating that he was beyond relief) a friend administered freely, Mishler's Bitters. The effect was instantaneous; heat was generated in the body, perspiration was induced and after using one bottle Mr. Pearsol was entirely restored.

Mishler's Bitters cures Cholera by counteracting the poison which is the cause of the disease. Poison in the system, whether generated by bad air, fifth, &c., as in Cholera, or introduced by the bite of a venomous snake or mad dog will be expelled and all bad symptons allayed by the use of Michler's Herb Bitters. The above proves this to be the fact in Cholera and the cortificate of Mr.Rhimehart proves that Mishler's Billers will cure the bite of a poisonous snake:
