THE WEATHER.—For the past few days we have been favored (?) with copious and frequent storms of rain interspersed with the costomary thunder and lightning, but the temperature has not been exactly what it should be at this time of the year, and the east winds which have been so prevalent have not been exactly "tempered to the shorn lamb," nor the tender buds of the young peach trees. No danger, we believe, is apprehended from frost, and the evidences are that the fruit crop this season will be a large one.

Logan, Commander in-Chiefof the Grand Army of the Republic, designating Sunday, the 30th of May, as an appropriate occasion to "decorate the graves of comrades who died in defence of their country during the late rebellion, and whose bodies now lie in almost every city, willage and hamlet churchyard in the land. The appeal to the soldiers to observe the occasion is couched in elegant language, and we are pleased to learn that the Posts in Columbia and elsewhere propose to take action in the matter, and adopt a pro-

METAL TIPPED SHOES .- The increasing demand for metal shoes, both silver and copper, the former being extensively used on fine shoes, shows conclusively that the public appreciate their value. It is astonishing that any parent should buy any other, as they save half the expense in keeping children supplied with shoes.-N.

BEAUTIFUL.-We examined some of the specimen wax-work made by Miss Scobell, yesterday, at the Franklin House, and found them to bear favorably the closestinspection. Flowers of every description, color and shude-large and small, rich and rare, were strewn over her table, and actually we scarcely knew but what they were natural. An ornamented vase, filled with flowers, all made of pure white wax, which she has just finished, is a most superb piece of work. See specimens in window of Hess' book store.

He has just purchased a splendid assortment of pipes, tobacco boxes, and fancy goods in his line, in the New York market-direct from the importers, and offers greater inducements to country merchants and others who wish to buy at wholesale. His supply of meerschaum pipes cannot be excelled. He has an excellent supply of segars and tobacco of his own manufacture, and his prices will compare favorably with any other house. Indeed, his rates are much cheaper than Philadelphia prices. He has also a tremendous stock of smoking tobacco -any kind and any price; snuffs of all kinds. Also fine cut and fancy tobaccos of all grades, some of which are entirely new in this market. Call and see for vourselves

After being freely discussed by the guests, it was referred to the host, upon whom was the burden of fourscore years. He asked if they had noticed a grove of trees before the dwelling, and said, "When the spring comes and in the soft air the buds are breaking on the trees, and they are covered with blossoms, I think how benutiful is spring! And when the summer comes, and covers the trees with its heavy foliage, and singing birds are all among the branches, I think how beautiful is summer? And when it is sere winter, and there is neither foliage nor fruit, then I look up, and through the leafless branches, as I could never until now, I see the stars shine through." The Republican Town Meeting.—
The Republicans of Columbia and vicinity met in town meeting at the Town Hall, on Thursday evening last, for the purpose of expressing their views with regard to the treachery in the United States Senate, which threatens the safety of the party and the well-being of the country.

Samuel Allison was chosen President, and J. G. Hess, John B. Bachman, Henry Sourbeer, Philip Gossler, John Q. Denney, Morris, Clark and William Reese, Vice Presidents. Samuel Evans and A. O. Newpher, Secretaries.

On motion of Samuel Evans, a Committee of five were appointed to draft resolutions expressive of the sense of the meeting. Committee—Samuel Evans, Thomas It. Supplee, Joseph Mifflin; Edward Becker, Jacob Auwerter. The Committee reported the following resolutions:

Resolved, That the Republicans of Columbia and vicinity, in mass meeting assembled, view with unfelgined sorrow and regret, the course of those United States Senators elected by Republican votes, who have fattered, through cowardice, jealousy, or something worse, and have falled to discharge their duty as became true men, and declare the apostate who now occupies the Presidential chair by virtue of a traitor's builet—guilty of high crimes and misdemeanors, clearly proven.

Resolved, That any Senator elected by Republican votes who betrays the party, and the loyal people South, is infamous, and should be scerned and excerated by all, and doomed to suffer the pains and penalties due to all traitors.

Resolved, That while we depreceate the perfluity of those recreants who thus disappointed the just hopes of the loyal people, we consider it a pleasing duty to tender our warmest supportand commendation to those faithful Senators who have withstood the blandishments of power, and remained true to their high trust.

The resolutions were adopted unanimously, and the neeting adjourned with three rousing cheers for Gen. Gra. Nr., our

COUNTY ITEMS.—The Inquirer says a young woman named Austin, residing near the Gap, in this county, committed suicide last week by taking arsenic. Henry Sandoe, of Marietta, an inmate of the insune department of the County Hos-pital, committed suicide by hanging him-

pinal, committed suction by language interested of Tuesday morning.

During last week fire broke out several times in the dwelling of Christian Munma, East Donegal township. The cause of the fires is not known, and the persons in the neighborhood are much excited in regard to the matter. to the matter.

When the Pittsburg freight train arrived in Philadelphia on Monday morning, a brakesman named Wm. Ford, was found dead upon the top of one of the cars. He had evidently broken his head against a bridge at some point on the railroad. The office of S. & B. Heistand, lumber merchants in Marietta, was burglariously entered recently, and robbed of a small amount of postage stumps, &c. amount or possage stamps, etc.

The office of S. F. Eagle, was also entered, but the robbers had nothing but their labor for their pains. The whole night's job was rather profitless. Our farmers are now measurably through

with their corn planting, and by the end of the week, all will be planted. Under the "gas light" is being played in Lancaster. Base Ball is breaking out over the county.

Inspector A. C. Leonard has seized 2.300 gallons of illicit whisky which was being shipped to San Francisco, California, from this county.

The Strasburg and Millport Turnpike Road Company has declared a dividend of two and a half per cent, on its capital stock, for the last six months. From all parts of the country reports are coming in which prove that the recent fright occasioned by the heavy frosts was needless. The fruit in most districts remains uninjured, except such as may have suffered during the winter.

THE COLUMBIA BRIDGE .- There has been as yet no reliable or detailed statement or account of the new bridge now being constructed across the river, at this place. As it is a subject of great interest to all, on both sides of the river, to know what manner of structure is to supply the place of the old one, we have obtained all the information required, from Mr. C. M. Bird, the obliging and courteous Engineer and Superintendent of the work; and consequently the facts here given are reliable and may serve a good purpose as a reference for future use. There are several very serious objections to the bridge which will be more fully understood when it is known that no teams or carriages will be allowed to cross while a train of cars is upon it, for the reason that there is not sufficient space allowed for them to pass. This will necessarily cause much delay and confusion at either end. Another objection is, particu larly among the boating fraternity, that there is to be no towing path. Aside from these disadvantages, the structure will be one of great strength and durability, permunency appearing to be the great object sought for by the builders. One cannot help thinking, however, that the R. E. Co. have sacrificed the interests of the community to their own in thus blockading the bridge during the passage of trains. If our citizens cannot have such a bridge as they could wish they must needs take "Hobson's Choice"-such as they can get,

finitely better than none at all. The bridge is to be covered, and there is so that in case the bridge should eatch fire from either side, only one half would be burned. The Engineer confidently expects 1st, 1869, but the roof and weather-boarding will not be put on for some time after, in order to allow the timbers time for seasoning. There are to be two new piers in place sand-stone. Some idea of the magnitude of April, for the transportation of materials alone, was \$6000. The work is not yet mented to make a total of seventy carpen-

ters and one hundred laborers. The Keystone Bridge Co., of Pittsburg, are doing the wood work. The wroughtron work is furnished by A. P. Roberts & Co., Philadelphia; and the timber, which by the way, is of a very superior quality, is from F. M. Bingham and A. C. Noyes: 

Estimated cost of the structure, \$300,000.

Fire Company Meeting.—A special meeting of the Vigilant Fire Company was held in their hall, on Thorsday evening. Mr. Wim. Patton in the chair. The Secretary stated the object of the meeting was to take action in regard to the letters received from Mr. Button and the Amoskeag Manufacturing Company. Mr. Button offers to build a third-class steamer for \$3,200, including silver jacket and polished iron work; and take our two engines. The Amoskeag Company made no offer for the old engines. On motion that the Company accept the offer of Mr. Button, it was carried, unanimously. A committee of three was appointed from each ward to solicit subscriptions from the citizens. The Chair appointed from each ward to solicit subscriptions from the citizens. The Chair appointed from each ward—E. K. Boice, Hirati Wilson, James McGinnis; second ward—A. J. Kaufiman, S. B. SLANDER.

Mr. Editor:—I see in the last issue of our paper a very sensible article on slander. I have just learned that a case similar your paper a very sensing acteur or started. I have just learned that a case similar to that set forth in your popular journal, has but recently occurred; and as the parties interested are of good moral character, I would here caution them, or a serious result may be the consequence. The gentleman, whom these foul-mouthed vilifyers interested themselves in, returned, and made investigation, and found the case as follows: Mrs. Squibbs told Mrs. Blarney that Mrs. — said so and so, and when Mrs. Squibbs and Mrs. Blarney were called upon for the authors of the slander, they did not say so, &c. Now it would seen that the slanderers have made themselves very small in the estimation of each other, and no good can come from their works. I advise all parties who find nothing else to do but mind other people's business, that some of them may have more to look after than will be agreeable. "A word to the wise, &c."

THE vis molicative mature in man is that providential protection from disease which the Got of nature has implanted in every tissue, nerve and filliment of our entire organization. Were it not for this invisible innate power in man's nature he would be constantly tossed like a frail bark from health to sickness, and often from sickness to dissolution. At every little change in the temperature of the atmosphere, or from the least neglect in the use of food or clothing, discuse would begin its work of destruction. It is this principle which prevents disease under ordinary circumstances, and often indeed, when it has pretty theoroughly misimared itself into the structure of the body—ballies it for a long time until at has the long bent bow becomes weak, unassisted nature sinks, the body emaciates—dies.

Reador, the object of medicine in disease is not in Itself to cure. The most that medicine can do in any case is to assist the re-medicine method in casting off the broken down tissues of the body, and building up the new, and that remedy which does the most to build up and invigorate the various functions of the animal mechanism does the most to assist nature and
